

PHILADELPHIA WIN THEIR THIRD GAME

MacDonald's Great Peace Appeal Heard Around World Millions Listen to British Premier's Words Against War

Rt. Hon. Ramsay MacDonald, in Speech at New York, Tells People Old Diplomacy Is Left Behind and Leaders Now, Instead of Taking Risk of War, Take Risk of Peace.

New York, Oct. 12.—To-day, the 47th anniversary of the discovery of North America by Christopher Columbus, Premier Ramsay MacDonald, a visitor from the continent from which the explorer came, rested here to-day, with no official engagements, while the people of the United States considered an appeal he made last night, a great world peace effort, heard by radio listeners in this country, Canada, Great Britain and other parts of Europe. It is said more millions heard that speech than had ever before in the history of the world listened simultaneously to a message against war.

The speech, the third delivered by the Prime Minister here yesterday, was made before a great audience gathered at a banquet in the Ritz-Carlton Hotel under the auspices of the Council of Foreign Relations. Elhu Root was chairman. The eloquence and fervor of the visiting statesman created a deep impression on all who heard him and at many moments he was forced to pause until the applause subsided. Closing his remarks with a plea for confidence among the people and support for the leaders who were working to end all war, he said:

"So, when I look ahead, I think both of us (Great Britain and the United States) are justified in seeing the shining feet of the peace-makers coming over the horizon to gladden our hearts and to make us feel that all our long efforts for peace have not been in vain."

The wall behind the speaker was draped with two large flags—a Union Jack and a Stars and Stripes.

FULL REPORT OF SPEECH
Following is a full stenographic report of Premier MacDonald's speech before the Council of Foreign Relations:

"It was a very kindly thought of those responsible for the arrangement of these dinners to invite me to come and break bread with you at your table."

"You were certainly not unknown to me, because for some time now I have read a magazine for which you are responsible, both with pleasure and with profit. I refer to Foreign Affairs. And when I heard that the chairman, who is by my side at the present moment, Mr. Root, was to take the chair, the honor you had done me by sending me your invitation was indeed crowned with a glorious pleasure."

TRIBUTE TO ELHU ROOT
"Only last night for the first time have I met Mr. Root in the flesh. It is a very, very long time ago since I learned to respect him as one of the conspicuous workers in the cause of international peace. And to-night when I met him again sitting so bravely under his heavy load of years, what comes to my mind is Simon, waiting on the steps of the Temple for the Messiah's appearance. My hope and my prayer, sir, is that you may feel in these days, when the cause of peace has been so substantially advanced, some of those feelings that must have come to Simon on that great occasion."

NEW DIRIGIBLE R-101 IS TUNED FOR FLIGHT

Cardington, Bedfordshire, Eng., Oct. 12.—The R-101, giant new British dirigible and the British bid for supremacy in the air, was taken from its hangar here at an early hour to-day for the first time and moved to a mast half a mile away, preparatory to a flight, probably Monday.

There was no wind and the ground crew of 400 men had no difficulty in taking the ship, which is the largest aircraft in the world, being considerably larger than the Graf Zeppelin, from its hangar and leading it across to the mast. It took about three minutes to manoeuvre the ship from the hangar, where it had been weather bound for days.

MANY SAW AIRSHIP
The roads were crowded with sight-seers in automobiles, on bicycles and on foot.

BRUCE PARTY IS DEFEATED AT THE POLLS

With Two-thirds of Votes Counted, Labor Victory in Australia Indicated

Melbourne, Australia (Canadian Press Cable via Reuter's), Oct. 12.—Defeat of the Bruce Government, a coalition of the Nationalist and Country Parties, was indicated as counting of the ballots cast in to-day's general election progressed to-night. With more than two-thirds of the votes counted, it seemed safe to assume the Labor Party, led by James Henry Scullin, would have a clear majority in the next House of Representatives. Possible standing in the next House, compared with that just dissolved, is given as follows: Labor Party, 50-52; Nationalists, 16-30; Country Party, 8-13. Total seats, 75.

Hon. E. G. Theodore, one of the outstanding Labor chiefs, was elected. Sir L. Groom, Speaker of the last House, who declined to make a casting vote when the Government was defeated, was at the bottom of the poll in Darlingdowns in early returns.

THOUSANDS OF PERSONS GATHERED outside newspaper offices where results were broadcast, despite showery weather.

BRUCE'S POSITION
Early reports showed Premier Stanley M. Bruce running 1,300 votes behind his Labor Party opponent in Flanders, but it seemed possible later that the Prime Minister would be returned with a majority.

The estimate of fifty Labor members in the next House includes the three Nationalists who voted against the Government in the last House, thereby precipitating to-day's election on the Labor arbitration issue.

Running as independent candidates against Nationalists, but unopposed by the Labor Party, election of the three Nationalists to-day appeared to be certain. (Continued on page 19)

DOUKHOBORS AT OAKALLA END HUNGER STRIKE

Vancouver, Oct. 12.—An investigation of the reported refusal of some of the 113 Doukhobor prisoners in the Oakalla jail to eat is being conducted by Col. J. H. McMullin, superintendent of Provincial police, who has arrived from Victoria.

Supt. McMullin said he believed the situation was not serious. Some of the Doukhobors had refused to eat, he explained, but he thought they were consuming their rations again.

FOOTBALL IN BRITAIN TO-DAY

Results of Soccer and Rugby Contests in Cities of United Kingdom

London, Oct. 12.—Football games to-day resulted as follows:
ENGLISH LEAGUE—FIRST DIVISION
Arsenal 1, Derby County 1.
Aston Villa 3, Everton 2.
Blackburn Rovers 0, Sheffield United 1.
Leeds United 2, Bolton Wanderers 1.
Liverpool 1, Birmingham 1.
Manchester United 2, Grimsby Town 1.
Middlebrough 1, Huddersfield Town 1.
Newcastle United 2, Burnley 1.
Preston North End 1, Sunderland 1.
Sheffield Wednesday 1, Sunderland 1.
West Ham United 1, Leicester City 2.

SECOND DIVISION
Blackpool 3, Cardiff City 0.
Bradford City 3, Bristol City 0.
Bury 2, Barnsley 1.
Chelsea 1, Bradford 2.

PREMIER BRUCE

UNION PARLEY ATTRACTS MANY FROM VICTORIA

Thirteen Delegates From Greater Area to Attend Convention Next Week

Thirteen delegates from the Greater Victoria area will attend the Union of British Columbia Municipalities' convention, to be held at Harrison Hot Springs on Monday, following sessions of the Good Roads League and the Municipal Officers' Association.

The resolutions committee will bring into action on Monday, followed by the general sessions of the convention on Tuesday.

Mayor Herbert Anscomb, Alderman William Marchant, John Harvey, John Worthington and William Cullen will represent the city. Reeve William Crouch, Councillor William Stubbs and R. R. F. Sewell, municipal clerk, will represent Saanich. Oak Bay will be represented by Reeve E. C. Hayward, Councillor New Peterson and R. E. Blandy, municipal clerk. Reeve James Erick and Councillor Alexander Lockley will attend from Esquimalt.

France to Start Navy Conference Plan Discussion

Paris, Oct. 12.—It is authoritatively learned France will begin conversations with Great Britain and Italy in an effort to prepare the basis of a London naval conference and to determine and harmonize if possible, the respective standpoints.

It is said this is in keeping with the text and spirit of the conference invitation issued by the British Government this week.

PALESTINE INQUIRY

London, Oct. 12.—The British Parliamentary Commission of Inquiry into the recent Palestine disorders left London for Palestine to-day.

REG. U.S. PAT. OFF. — CUBA

JAPAN'S ENVOY WILL STRIVE TO CEMENT TIES

Aim of Japan and Canada Must Be to Know Each Other More Intimately and Co-operation Should Be Watchword, Says Hon. Iyemasa Tokugawa, First Minister of Japan to Canada, on His Arrival Here To-day.

As diplomatic representative of His Imperial Japanese Majesty, Emperor Hirohito, Hon. Iyemasa Tokugawa, K.C.V.O., envoy extraordinary and minister plenipotentiary of Japan to Canada, and descendant of the ancient Shoguns, reached Victoria to-day from Tokyo to take over his post at Ottawa.

On the arrival of the Canadian Pacific liner Empress of France at the Rithet docks this morning, Hon. Mr. Tokugawa was met by Hon. T. Fukuma, Japanese consul, the vice-consul and other members of the B.C. consulate staff. After giving an audience to the welcoming delegation and granting an interview to members of the press, Hon. Mr. Tokugawa left the ship and proceeded to Government House, where he was met by Lieutenant-Governor R. Randolph Bruce. He left by the afternoon boat for Vancouver.

DESTINIES LIE TOGETHER
The friendly relations between Canada and Japan is in nowise a new development and moreover, their destinies lie together on the great Pacific ocean," said Hon. Mr. Tokugawa.

"We both want peace in this particular region and in order to attain (Continued on page 19)

PATTULLO BACK FROM INTERIOR

"Liberalism Buoyant Wherever We Went," Says Opposition Leader

T. D. Pattullo, Liberal leader in the Legislature, returned to Victoria this morning after a three-week tour of the southern interior of the province. He was accompanied by S. F. M. Moodie, provincial Liberal organizer.

"I found Liberalism buoyant wherever we went. It must be remembered that, in spite of a large following in the Legislature, the present administration received little more than a bare majority of the popular vote. Liberals of British Columbia realize this and look upon the events of July, 1928, as a temporary setback only, to the progress for which the party stands," said Mr. Pattullo.

Business conditions throughout the southern interior are excellent. While some crops are light, prices for practically all products are good and market conditions favorable. There is great activity in mining. Mr. Pattullo reported.

"I found everywhere a feeling of confidence in the Ottawa Government whose foreign trade policy has done so much for building up Canadian commerce. I prefer an increased following for the Federal Government from British Columbia," Mr. Pattullo said.

JAPAN TO LIFT GOLD EMBARGO

Tokio, Oct. 12.—Juichi Tsushima, Government financial commissioner, will sail for New York, arriving there about October 31, to conduct negotiations for lifting of Japan's twelve-year embargo on gold exports.

After negotiations in November with New York bankers and Washington officials, he will continue to London for similar negotiations there in December. The press to-day predicted he would attempt to negotiate contracts with London and New York banks for funds to be at the disposal of the Bank of Japan.

Overcome Eight Run Margin To Secure Decision

Connie Mack's Sluggers Put Three Cub Pitchers to Rout in One Inning After Allowing Chicago Lead of Eight Counters; Two Home Runs and Succession of Singles, Doubles and Walks Give Them All Their Runs in Seventh Session; Lefty Grove Holds Cubs Scoreless in Last Two Innings; Score 10-8.

HIS HOMER WAS GREAT FACTOR

GEORGE "MULE" HAAS

centre-fielder of the Athletics, who contributed a home run in the melee of hitting which the team enjoyed in the seventh inning of the fourth world series game to-day. Haas scored Joe Mauer and the Athletics' lead.

After putting the Cubs away in one, two, three order in the fifth, the Athletics' pitcher, Walter Johnson, again was presented with a first-inning scoring opportunity, when Miller got a single after his hard hit bounced off Root's glove. Hack Wilson then committed his first error of the series by dropping Jimmy Dykes' fly ball. With two men on and none out, everything looked rosy for the Athletics.

BOX SCORE To-day's Game

Chicago	AB	R	H	PO	A	E
McMillan, 3b	4	0	0	1	3	0
English, 1b	4	0	0	2	1	0
Hornby, 2b	5	2	2	1	0	0

U.S. Senate Tariff Vote in November

Washington, Oct. 12.—Chairman Smoot of the Senate finance committee, in agricultural conference with President Hoover to-day, expressed confidence the Senate would reach a final vote on the tariff bill by November 20.

PLANES FITTED WITH SKIS FOR SEARCH IN FAR NORTH

Winnipeg, Oct. 12.—Fur-garbed airplane pilots and mechanics busied about to-day in two northland outposts, making the last moves with supplies laid in for a winter air search to find seven missing mining companions.

Shibe Park, Philadelphia, Oct. 12.—Connie Mack's Athletics created a world series record to-day when they scored ten runs in the seventh inning of the fourth series game against the Cubs and won what appeared to be a hopeless game. The score was 10-8.

Eight runs were piled up by the Cubs in what seemed a tremendous margin in the first seven innings. Then the Athletics went wild. Ten hits in one inning and ten runs in one inning, the seventh, turned defeat into victory.

Eight pitchers all told were used by the two teams. Quinn Walberg, Rommel and Lefty Grove took the mound duty for the Athletics, Rommel getting credit for the victory. Root, Nehf, Blake and Carlson tried to stop the Athletics.

FIRST INNING

Chicago—McMillan up, he walked on four pitched balls. English, up, flied out to Miller. Hornby fanned. Wilson singled to right. McMillan taking second. Cuyler fanned on called third strike. No runs, one hit, no errors. Two left on bases.

(Continued on page 2)

A GREAT INNING
The barrage of hits which drove three pitchers in succession from the box in the seventh was the greatest ever seen in a world series of recent times. At the first, the Athletics' starter, Walter Johnson, the Athletics' starter, started the fireworks with a home run into the left field stands. Base hit after base hit came from the fiery bats of the Athletics. The Athletics' starter, Walter Johnson, the Athletics' starter, started the fireworks with a home run into the left field stands. Base hit after base hit came from the fiery bats of the Athletics. The Athletics' starter, Walter Johnson, the Athletics' starter, started the fireworks with a home run into the left field stands. Base hit after base hit came from the fiery bats of the Athletics.

Connie Mack then trusted his speed-baller, Lefty Grove, with the task of holding down the Cubs for the rest of the game. As a result, the three Braves who got up to bat went out in order, two by the strikeout root.

The play by play account follows:

FIRST INNING

Chicago—McMillan up, he walked on four pitched balls. English, up, flied out to Miller. Hornby fanned. Wilson singled to right. McMillan taking second. Cuyler fanned on called third strike. No runs, one hit, no errors. Two left on bases.

Malady Causes California Man To Lose Height

Los Angeles, Oct. 12.—Physicians have disclosed that Joseph Mayott,

fifty-four, a veteran of the Spanish-American War residing at the Soldiers' Home at Seattle, is afflicted with a rare malady which causes him to grow shorter in stature.

The disease, for which no cure is known, has been called Paget's disease. It is a strange ailment which gradually reduces the size of the bones. Physicians, more than 400 of whom have examined Mayott, say the shrinkage may stop any time. They assert Mayott is in no pain and is in no particular danger of an untimely death.

**WANTED — A
Million College Graduates!**

"THE best positions in industry today go to university trained men," President Hoover recently said. "In the next ten years Canada and the United States will need a million college graduates."

What of YOUR boy? Decide NOW to give him the priceless advantage of a college training—the knowledge, culture and poise that will ensure distinction for him in business and social affairs.

THE GREAT-WEST EDUCATIONAL POLICY

Is the surest and most economical means of ensuring a successful career for your son or daughter. Example: You deposit a certain sum each year with the Company. When the time comes, the money is available for a complete university course. If, meanwhile, you die or become disabled (as defined in the policy) the Company will pay all the remaining premiums. If your child dies before age eleven, the money will be returned to you with 5 per cent. compound interest. Should he die after age eleven, the full amount of the policy—plus substantial profits—will be paid to you as ordinary insurance.

NEW EVIDENCE ON OLD CLAIM BASED ON FIRE

Washington, Oct. 12.—New evidence on the \$40,000,000 sabotage claims against Germany, based upon alleged responsibility of German agents for the Black Tom and Kingsland, New Jersey disasters of 1916 and 1917, shortly is to be laid before the Mixed Claims Commission. The evidence tells how Theodore Wasmak, who worked at the Kingsland foundry and had been widely sought for more than twelve years, appeared at the office of the German agent of the commission in Washington several weeks ago, admitted the Kingsland fire started at his work bench, denied he was in the service of Germany and told how he had lived in New York while the search for him was in progress.

The new evidence purports to meet United States charges implicating directly two other alleged German agents—Kurt Jahake, admitted head of the German secret service in this country during the war, who has now returned to his home and become a member of the Prussian Diet; and Lothar Witzke, the only German who ever was tried in this country and convicted, and sentenced to be hanged as a spy.

Reading like so many chapters from a war novel, the new evidence tells how a representative of the German agent received a telephone call from New York, to the effect that a man describing himself as Wasmak had appeared at the consulate there and declared his identity. He said he had read a news story of a hearing of the commission held last winter, and that he had remembered his own connection with it. Far from being a German agent, the man said he was a Russian sympathizer, the evidence explains, and he wanted to tell his story to the proper authorities.

Describing how civil authorities held him for questioning immediately after the Kingsland fire, he is quoted as saying he told them at the time that he was employed in the foundry, and how he had noticed the fire's beginning—small flames that leaped from a machine at which he was at work, into a container of gasoline, spreading quickly thereafter until it destroyed the tremendous quantity of munitions held nearby.

Wasmak is said to have declared he never "disappeared," as the United States agent holds he did after the first investigation. Of Witzke, the evidence offers to show that he wrote from California a letter to his parents, dated two days before the explosion, for which the United States case holds him, with Jahake and one Mike Kristoff responsible. Kristoff died last year.

STATEMENT ON LIQUOR PROFITS IS CALLED FOR

In Ontario Election Campaign
Liberal Leader Challenges
Premier Ferguson

Kingsville, Ont., Oct. 12.—Will Premier Ferguson now tell the people of Ontario the revenue from the Liquor Control Act for the fiscal year 1928-29, which will end October 31, the day after the provincial general election? This was the challenge issued here last night by W. E. N. Sinclair, K.C., Liberal leader, by way of reply to Premier Ferguson's challenge to him to say whether he favored a return to the Ontario Temperance Act.

The Liberal leader said the Premier had charged him with want of courage. He now had an opportunity to display real courage himself if he had any. The Premier knew what the figures were, and the people of the province were entitled to that information.

PARALLEL SEEN
The story of David and Goliath had a parallel in the present election, he said. Goliath had gone for forty-one days clad in shining armor and glorying in his strength, issuing challenges to the people of Ontario.

"The exact length of the present election campaign is forty-one days," he continued. "Here we have the great Goliath of Ontario going up and down the country issuing challenges to me, and he will get his answer on the forty-first day."

FERGUSON SPEAKS
East Windsor, Ont., Oct. 12.—Premier Ferguson, carrying his election campaign into Essex County yesterday, addressed a meeting at Leamington in the afternoon and a meeting here last night. He spoke in defence of the Liquor Control Act. He said he wished to ask W. E. N. Sinclair, Liberal leader, for a clear-cut statement of the policy of the Liberal Party on the liquor issue.

At the same time the Premier gave a pledge that every promise made by him in this campaign on any public question would be carried out.

CENSUS CHANGE FORESHADOWED

Will Be "Canadians" in Racial
Classification, Says Hon.
Fernand Rinfret

Montreal, Oct. 12.—That steps would be taken by the Federal Government at the earliest opportunity, either by means of legislation or through the census in 1931, to establish a distinction between British subjects born in Canada and those who have come from other parts of the British Empire or from foreign countries, was a statement made by Hon. Fernand Rinfret here yesterday.

The Secretary of State declared the Government would endeavor to create a Canadian nationality, taking into account that citizens of this country are part of the British Empire and that as such, wherever they go in foreign countries, they can be considered only as British subjects.

"The question is a complex one," said Mr. Rinfret, "which engaged the attention of our predecessors for many years. Though we are an autonomous nation, we are, nevertheless, part of the British Empire and not an independent nation. Therefore, as long as we retain the British bond, as long as foreign countries will accept us only as British subjects, we cannot be given Canadian passports and have a full status as Canadian citizens."

OFFICIALS AT WORK
"The most that can be done is to make a distinction between the Canadian-born British subjects and those who have come from other parts of the British Empire, who have come from foreign countries and have been naturalized as British subjects here. That will be done as soon as possible. The question has now in the hands of the statistical branch of the Department of Commerce, which will report in the near future."

The time is now at hand when any improvements to the garden that have been the result of the war, such as a house, or which seem necessary, should be taken in hand. There is no doubt that many gardens, particularly those that were laid out years ago, and those that have been the result of gradual growth, rather than a definite plan at the outset, stand in need of re-designing in part, if not in whole.

Often one of the simplest ways of effecting an improvement is to deprive the garden of a "square" or formal look by the simple means of imparting to the paths and beds more graceful lines. Straight paths and lines must in some cases be used, but a much softer and more graceful look can be achieved by using slight curves.

It is a fact that the object of a path is to lead from one place to another by the most direct route, but a slight curve can be introduced without such loss of time on the journey and will, in many cases, add much to the look of the garden as a whole. It must be remembered, however, that any such curve must be given a "nose" for its existence. Curving outlines for borders and shrubberies, particularly when they are situated near the outside of the garden, not only rob such features of formality but show off the flowers and shrubs to much better advantage.

VANCOUVER ISLAND NEWS DUNCAN SETS POPPY DAY DATE

Flower of Remembrance Will
Be Distributed November 9

Duncan, Oct. 12.—Complying with a suggestion made by the Canadian Legion, the Women's Auxiliary decided to hold their annual poppy day on Saturday, November 19. Mrs. Tisdall will have charge of the room and Mrs. Gordon will arrange for the taggers.

Mrs. Barnard of Nanaimo, who is the president of the B.C. Women's Provincial Council, Canadian Legion, will address the meeting in Duncan on November 13.

Mrs. Kennett reported visiting sick patients in the hospital, and gifts made to them.

The question of holding the monthly meetings in the evening, instead of the afternoon, was brought up, but it was thought best to leave the decision to the annual meeting.

After adjournment tea was served by Mrs. Goddard and Mrs. Dunkley. Mrs. J. Dunkeld presided at the meeting.

CALEDONIAN DANCE
The Caledonian Caledonian Society held their regular monthly dance on Thursday evening in the Guide Hall, Duncan. This was the first time the Guide Hall has been used by the society, and it was found most satisfactory in every way. About eighty people attended, and dances, "old and new," were excellently played by Henry Robinson's orchestra. Miss Eme Sanders was the fortunate winner of the "tombola" and Mr. and Mrs. H. Cross of the "spot" walk.

Mention must be made of the floor, which had been treated and waxed by an energetic committee, and was in excellent condition. Those responsible for this were A. H. Campbell, W. Robinson, H. Evans and J. Ross.

Refreshments were served under the direction of Mrs. A. H. Campbell and Mrs. E. W. Carr-Hilton.

Chemainus

Chemainus, Oct. 11.—Miss Lee, matron of Chemainus General Hospital, who has just returned to duty after a month's vacation, has tendered her resignation to the hospital board.

Constable Cline of Victoria was a visitor to Chemainus on Monday.

Mr. and Mrs. Noel Lang have returned home from a two weeks' vacation spent in Vancouver and Victoria.

Mr. and Mrs. James Robertson and child, who have been guests for two weeks of Mr. Robertson's parents, Mr. and Mrs. Robert Robertson, have returned to Duncan.

Mrs. Cook, who has been visiting relatives here for several weeks, has returned home to Vancouver.

E. E. Wootton, after a few days' visit to Mr. E. R. Hahnd, has returned home to Victoria.

Percival Rivett-Carnac has left on an extended visit to California.

Mr. and Mrs. Malcolm McLeod returned to Chemainus on Sunday from Vancouver. Mr. McLeod has returned to Kerringer, Cowichan Lake. Mrs. McLeod is spending a few days in Chemainus with friends.

"BUILD B.C." It Makes Nice Dishes

Mrs. George C. Wilson of Revelstoke writes a letter from which we take the following excerpt:

"Many nourishing dishes can be made with Pacific Milk. For instance, every child loves a sultana and bread pudding, made with a generous supply of this rich milk; and a fine dish is raw apple sliced, or oranges—served with Pacific Milk, adding a little sugar."

MR. MACDONALD'S SPEECH

PREMIER RAMSAY MACDONALD'S
last speech on United States soil will be written into the history of the mission which he has just concluded as one of the most moving appeals for a peaceful understanding between nations in this generation. It is by no means incorrect to say that he was speaking to the world at large, because those who did not listen to his message as it came to them through the air will read it in the newspapers of many lands.

The British Prime Minister often has been referred to as an idealist, a dreamer of beautiful dreams. He does not deny it, and it would be better for the world if it shared his idealism and dreamed some of his dreams. But while Mr. MacDonald makes no apology for his idealism or his dreams, the speech which swayed his listeners indicated also that he is a very practical idealist, who knows how to make his dreams come true.

"Mr. MacDonald admitted the existence of doubters. There are those who cannot conceive of two statesmen coming together unless they have some sinister purpose in view. 'Their suspicions do not arise because they know,' said the Prime Minister; 'they arise because they are old-fashioned.' Not many years ago these old-fashioned people ridiculed the idea of a heavier-than-air machine flying. They declared that Blériot would not get across the English Channel because it had not been done before. It was the same with dealings between nations; if the old style diplomacy had failed, how could the new form succeed? But sceptics of twenty years ago have been confounded; the airplane and the airship have annihilated time and distance, frontiers have been rolled back, and we know not yet what aeronautical science has in store for us. It is so with diplomacy, of which Mr. MacDonald spoke in such impressive terms last night. Here are his words:

The spirit of an open diplomacy, the spirit of men coming together, not for the purpose of dividing the world into alliances and groups, but for the purpose of their own agreements, helping the world to come to a general agreement that will be universal and not meticulous. That was the spirit that made Mr. Hoover and myself meet together and talk over affairs of mutual interest to our countries.

I want to say quite definitely and clearly, I want the whole world to know it, and I say it without any reserve, any withholding of any kind whatever, that during the entire course of our conversations there has never been any idea whatever of an exclusive understanding between Great Britain and the United States. There has been nothing discussed which the two Governments would not be happy to see discussed on the same basis with all the powers of the world. The understanding we have been trying to establish will always be incomplete and unsatisfactory until it has become the common possession of all nations on the face of the earth.

Mr. MacDonald could not have been clearer or more candid in explaining the invitation to a five-power disarmament conference which has been transmitted to the Governments of France, Italy and Japan—and, of course, to the United States. It is too early even to speculate upon the nature of the reception which these invitations have received in the three capitals. It may be too much to expect that they will be accepted unreservedly. One thing must be patent to all the world, however, and that is that the Prime Minister of Great Britain and the President of the United States have spoken for the united peoples of two nations on the vital subject of world peace and disarmament; and, to quote the words of Mr. MacDonald again, "there has been nothing discussed which the two Governments would not be happy to see discussed on the same basis with all the powers of the world."

Prime Minister and President put their cards on the table. Neither spared for position. For their part and for their countries, moral disarmament—the prerequisite to material disarmament—as a result of the conversations which have just been concluded, can be regarded as an accomplished fact. Hence, with this much accomplished, the stage has been set for what should be a great forward movement in the interests of humanity, for if the powers that will send representatives to that gathering next January are really desirous of following the example Great Britain and the United States have set, practical progress towards moral and material disarmament will be made.

It would be impossible in the space at our command to deal with more than the general trend of Mr. MacDonald's speech. It is interesting, however, to observe his simple interpretation of the Optional Clause in the statutes of the World Court—which provides for compulsory arbitration for international disputes—and how nations which have signed it should regard its significance. He puts it this way:

We have pledged ourselves to refer all these questions that have, hitherto developed into wars, to refer them to a judicial court sitting at The Hague. We have nothing to fear; if we are right we will win our case. If we are wrong we don't deserve to win our case.

Mr. MacDonald is too much of this world to suppose that mistakes will not be made; "but balance the mistakes on the one hand and put against them the losses, the destruction, the criminality of war, and where does the balance lie?" The Prime Minister agreed that human mistakes may be hard to bear by the victim of the mistake; but the sort of thing that had been going on, generation after generation, century after century, under the false impression that any nation could get security from military force, altogether outweighed the evils of human mistakes.

From the two aspects of the speech—printed in full elsewhere in this issue—with which we have dealt, it will be obvious that Mr. MacDonald first of all made it clear to the world at large that he and President Hoover set for their initial objective an under-

standing between Great Britain and the United States, which could be used as a basis for an all-embracing conference with other powers; that they first of all composed their differences to show that the thing could be done; that the time for the new or open diplomacy was at hand; and that only by universal understanding from the moral standpoint could war be avoided.

SAMUEL G. BLYTHE AND GOLF

AFTER PLAYING GOLF FOR VERY
nearly thirty years, Samuel G. Blythe, the well-known writer, tells the public through an article in the Saturday Evening Post that he almost feels inclined to give it up as a bad job; not for the reason which might be supposed, not because he finds no pleasure in the pastime; but because of the growing mania for making golf courses longer and more difficult, until the average player who furnishes most of the money for the upkeep of golf clubs is beginning to find the game more of a labor than a means of enjoyment.

Mr. Blythe has touched a point in which practically every golfer is more than ordinarily interested. Time was when a course of 6,000 yards was considered very long indeed and quite difficult enough when plentifully littered with bunkers and natural hazards; but it was not long before these were stretched out to 6,500 yards, while most of the new courses, where the land is available, now are running to 7,000 yards, and, as Mr. Blythe says, others are already touching the 7,500-yard mark.

It is estimated that golf club membership in Victoria and Vancouver alone is approximately 11,000. Of these 11,000 members, the number who play well enough to threaten par is negligible; the great majority are those who are continually struggling to keep as far under the hundred mark as possible. All British Columbia courses are of reasonable length; but there are already indications that some of these, the regulation championship courses, are soon to be subjected to more stretching operations. The question then presents itself: If so many find it so difficult to retain their golfing respect, by avoiding three-figure scores, are to be made to struggle still harder, what eventually will their reaction be?

True, golf has obtained a tenacious hold upon the people of many countries. But if the golf architect is to be allowed to design new courses and remodel old courses so that only the professional golfer will have any sort of an acquaintance with par, the average player, to make a decent score, either will have to make up his mind to exchange a pleasant pastime for an intense trial, or take his exercise in some other form. Golf is too fine a game to challenge its popularity by overdoing the tendency to which Mr. Blythe refers.

PATRONIZING CANADIAN PRODUCTS

WHOLESALE, RETAILERS, AND
consumers generally are to be asked by the Canadian Manufacturers' Association to co-operate in a country-wide movement in behalf of greater patronage of goods produced in Canada.

A campaign of this sort obviously is necessary; but it will have to be kept up if it is to accomplish its object. It will have to be intensive and in detail. Generalities, appeals to civic, provincial or Dominion loyalty in this regard are all very well, but they are of little use when an effort to enlist the practical interest of the purchasing public is to be made.

The Canadian Manufacturers' Association knows what articles are produced in Canada, how these commodities compare in quality and price with similar commodities which compete with them in this market, and the first move would seem to be to tell the consumer all about the Canadian product.

Canadians naturally would rather buy a Canadian than a foreign article. But it is all a matter of price and quality. This is where the obligation of the producer comes in. And he must advertise, and advertise in the most effective form.

WHAT OTHER PAPERS SAY

When a woman's teeth chatter they usurp her tongue's prerogative.—*Sault Daily Star*.

Mr. Snowden says his success at The Hague was entirely due to his wife. He'll be a great man yet.—*Border Cities Star*.

Our idea of prison reform is to add a couple of large wings.—*Toledo Blade*.

England ought to know pretty soon whether a Labor Government will work.—*Detroit News*.

ONE ASPECT OF AIR-MINDEDNESS

The Edmonton Journal

The tendency to ape the sky-scraper in art is especially noticeable in decorative forms of architecture, arches, canopies, monuments and the like. The designs in the magazines are simply another aspect of it.

But people are going to get tired of the new fad. Straight lines grow tiresome. And some day a commercial artist, flying to a distant city to keep an appointment is going to be struck with a new idea, a new way to capture the jaded public eye. He is going to see nature from a new point of view. Hitherto our pictures of nature have been from close-ups. From the air we see nature in panorama. Artists who think they have exhausted the possible combinations of straight lines and angles may see in the new traceries of nature something to intrigue their desire for the novel.

THINK OF OTHERS

Great Thoughts (London)

An old man who had met life serenely and tranquilly for more than eighty years was asked the secret of his cheerfulness. He answered in four words: "Thinking of other folks." "You can't travel very far in this world," he explained, "without finding that your path is all tangled up with other folks' paths. Some people think that if they can only travel their paths without getting hurt themselves, they're going to be happy."

"But there's more to it than that. When you've learned to dodge a collision, not because you're afraid of getting hurt yourself, but because you're afraid of hurting the other fellow, you're getting near to happiness. But when you arrive at a point where it's a genuine pleasure never to cause grief to another living soul, you're still closer. In other words, when you get so far that it's a joy to you just to make others happy, you're about there yourself."

A THOUGHT

I have not sat with vain persons, neither will I go in with dissemblers.—*Psalm xvi 4*.
Extension almost always overdoes the original, and hence exposes itself.—*Hosea Ballou*.

Loose Ends

Dr. Steinhach starts something which he cannot finish—ables are shown to cost too much—under our present system—and King Michael's nose is left unpatched—which is unfortunate.

By H. B. W.

IN VIENNA lives Dr. Eugene Steinhach, and what this eminent scientist has been doing lately is of vital concern to us all. Dr. Steinhach, as is recorded in the *Medizinische Klinik* of Berlin, has been crushing the brains of tree frogs and making from the juice thus extracted a substance called centronervin. When this centronervin was injected into live frogs it seemed to speed up their entire system. The treated frogs saw flies more quickly than normal frogs and caught more of them. In the same way the brain extracts of rats, dogs and cows stimulated individuals of those species. Now Dr. Steinhach, while denying emphatically the popular report that he has discovered a cure for insanity, suggests cautiously that his successful experiments on animals might be continued on human beings to speed them up, restore damaged nerves, prolong life, make them able to catch more flies.

THE POSSIBILITIES of this treatment are enormous. Just how far-reaching they may be was indicated in Berlin as soon as the Austrian scientist had announced his discoveries. An aged man, over seventy years old, applied to the public insurance fund to pay for a Steinhach operation upon him. This staggered the Berlin insurance executives. For if the operation were successful and the old man's life were prolonged, many others would demand the same treatment and all the mortality calculations of insurance companies everywhere would be entirely upset.

THE OLD MAN will not be operated upon, for in our modern civilization life is not a human question any more. It is a matter of dollars and cents, calculated out years in advance. Governments all over the world have budgeted for old-age pensions and similar services on the basis of life as it exists now. They simply can't afford to let it last any longer. Many a finance minister will wish Dr. Steinhach would mind his own business instead of interfering with frogs' brains.

THESE SAME considerations apply to the other end of life's span. At Memphis, Tenn., recently, baby specialists from all over the United States were in session, and Dr. J. W. Keefe, eminent medical man of Providence, quoted elaborate statistics to show that the high cost of babies is responsible for curtailing American families. Under our efficient system we can't afford to prolong life towards the unproductive end or to encourage it too much at the expensive beginning. I have enough faith in the efficiency of our system to believe that in the end it will achieve real economy by limiting life strictly to the productive years between twenty and sixty.

AT THE moment, however, the more we progress in civilization, the less able we seem to be in the management of such things. At this same meeting in Memphis it was shown that the United States, whose women are supposed to get the best medical care in the world, has the highest maternal mortality rate among civilized nations. For every 2,000 children born alive in the United States thirteen mothers die, as against 3.8 in the United Kingdom and 2.3 in Holland. Apparently western civilization although (and perhaps because) it produces unequalled female tennis players and bridge players, does not produce as successful mothers as the supposedly less civilized countries of the old world. When you get right down to it you can't build future generations without mothers; and apparently, despite all the efforts of the Steinhachs of science, the old-fashioned way of doing these things remains still the best.

FOR SEVERAL years now the Roumanian court, and especially the Roumanian King, have been ballyhooed to the world with publicity designed to send thrills up and down the spines of sentimental old ladies and make hard-belled business men whimper into their silk handkerchiefs. First it was the dastardly thunder of publicity which accompanied the tour of Queen Marie to this continent. Later the sob sisters have been concentrating upon her grandson, the young King Michael. They love to tell about the democratic upbringing of this young ruler, how he is treated like any other boy, without any pampering, and how they are going to make a great, strong, simple, demo-

cratic man of him. It is all very affecting.

LATELY, FROM Transylvania, has come some news which rather spoils the story of the ballyhoos. In Transylvania an inquisitive editor discovered the reason why the private school specially founded for King Michael had been broken up suddenly, after being given publicity all over the world as another evidence of the King's democracy. The reason was related to the editor by a little German boy who had been a pupil at the school. "You see," said the King's former schoolmate, "he (the King) was always hitting us. And so we decided that King or no King, we would hit him back. And so we hit him on the nose and then they stopped the school."

ALTOGETHER, THE noble experiment in democracy seems to have been a flop. They are determined, evidently, to make poor little Michael into a king even at the expense of not making him into a man. He probably thinks now that it is fine to be able to hit other boys on the nose and preserve his own royal visage from attack, but he may be sorry twenty years from now. When little Michael is a little older perhaps he will read of a more famous monarch, the first Charles of England. He may read that, as a boy, Charles visited the house where another boy, named Oliver Cromwell, lived; how the two boys got to fighting and young Oliver made young Charles's nose bleed; and how Charles took advantage of his royal prerogatives and made Oliver kneel down and kiss his hand in apology.

THEN YOUNG King Michael, if his education is complete, will learn that later on, Oliver cut Charles's head off. And all because Charles was brought up with the idea that there was something about him different from other boys. If Roumania wishes to avoid any unpleasantness of this sort when King Michael reaches manhood it ought to let him continue hitting other boys on the nose, but it should insist that in the process his nose also should be hit with equal frequency. Since Charles's time British kings have been brought up according to that principle, taking their punches on the nose like everyone else, and on the whole the system has worked out very satisfactorily. An unpunctured nose, like that of King Michael, is apt to be carried too high for its owner's health.

The Weather

Daily Bulletin Published by the Meteorological Department

Victoria, Oct. 12.—5 a.m.—The barometer remains stationary on the coast, and rain has been general over this Province. Frost has occurred in the prairies.

Reports
Victoria—Barometer, 30.17; temperature, maximum yesterday, 57; minimum, 48; wind, 4 miles N.E.; rain, .02; weather, cloudy.
Vancouver—Barometer, 30.14; temperature, maximum yesterday, 56; minimum, 45; wind, 4 miles S.E.; rain, .01; weather, cloudy.
Estevan Point—Barometer, 30.06; temperature, maximum yesterday, 54; minimum, 50; wind, 4 miles S.E.; weather, cloudy.
Tatoosh—Barometer, 30.12; temperature, maximum yesterday, 54; minimum, 50; wind, 18 miles E.; rain, .34; weather, cloudy.
Portland Ore.—Barometer, 30.16; temperature, maximum yesterday, 62; minimum, 56; wind, 4 miles N.; rain, .01; weather, cloudy.
Seattle—Barometer, 30.16; temperature, maximum yesterday, 58; minimum, 52; wind, 4 miles S.; rain, trace; weather, cloudy.
San Francisco—Barometer, 30.09; temperature, maximum yesterday, 64; minimum, 56; wind, 4 miles E.; weather, cloudy.

DESERVE SUPPORT

To the Editor:—Where horticulturists are gathered together, there may be differences of opinion, but the underlying feeling is always happiness and concord. The spirit of goodwill was very marked at the Victoria Horticultural Society's annual supper social the other night.

A society like this, which is working to enhance the beauty of Victoria and district, should, undoubtedly, receive the whole-hearted support of the entire community, because the community generally will benefit from the effects of horticulture.

I am of the opinion that more people would willingly join the organization, were they aware of the unique opportunity they would have and add to their store of horticultural knowledge.

To cite a recent opportunity: Dr. Newton's talk before the society on "Plant Diseases," etc.

ROSICRUCIANS

To the Editor:—There is so much now being published in regard to the Rosicrucians as a famous fraternity of mystics and metaphysicians of the Middle Ages that I was wondering if you, or some of the readers of your valuable paper, could throw some light on the history of the origin and present activities of these workers in the fields of science and metaphysics.

As far as I have been able to ascertain, the organization started in the mystery schools of Egypt and after spreading its teachings and activities throughout the world, seemed to have a period of silence. Then, in the seventh century, it suddenly burst forth in a strange way in Germany. Notwithstanding the fact that some encyclopedias intimate that the organization finally died out in Germany, these same records which show that they continued their activities in different parts of Europe and actually came to America in a large following in 1694, establishing buildings, schools and laboratories in what is now the city of Philadelphia.

Since then the work of this unusual organization has been quietly carried on in America, and increasing references to them in American literature seem to indicate that the Ancient Mystical Order Rosae Crucis, usually referred to in a veiled way through the use of the abbreviation "A. R. C.", in the form of AMORC, is still very active in different parts of the world, especially in America, but on account of it being a non-commercial and non-sectarian organization, it does not enter into the limelight as do so many other organizations.

It appears that there is a national headquarters of the organization in San Jose, California, and I understand from some occasional public references that there are branches in every large city in America. I would like to know more about the purpose of the organization and its activities in behalf of humanity. Any information in this regard will be greatly appreciated.

"SEEKER."

Accidents and Illness Closely Connected With Fatigue

By DR. MORRIS FISHER

Two factors enter into fatigue among people who work: the physical changes that go on in the body, and the mental changes.

When a person works, his muscles burn up energy. Energy is represented by the fuel taken into the system and by the material that has been used. After prolonged working, a person is likely to be tired. A person who feels tired is disinclined to work and slows down. At the same time he is likely to become dissatisfied with his job.

Mental work produces a different type of tiredness from the standpoint of its wear and tear on the body, but the same kind of dissatisfaction that is produced by tiredness from physical work.

All sorts of methods have been worked out by the experimenters to measure fatigue and tiredness. These indicate that when a person begins work in the morning he is fresh and has a rising curve of ability. This begins to fall after several hours, briefly after the noon period of rest, and then drops for the rest of the day.

In the same way, the curves of accidents follow the curve of fatigue. There are relatively few accidents in the morning, and the number gradually increases as the workers become more and more tired. The number of accidents decreases toward the end of the working day.

This is explained by the fact that the speed has slowed down and in the last hour many workers are merely making time, hence there are less likely to be accidents in this final period.

In the modern factory, experienced executives do everything possible to prevent fatigue. The posture of the individual at work is studied so as to save him unnecessary motions, to rest the back and the feet, and to put the objects worked on within easy reach. Mechanical devices do the lifting; illumination prevents shadows; vibration is overcome by the use of construction and the by architectural pads; noise is denuded by sound proof walls and individual cubicles for workers.

BUSSES TO CARRY 100 PASSENGERS

Grinnell, Ia., Oct. 12.—Motor buses capable of transporting 100 passengers are to be constructed in the near future in the plant of the Regleton Compartment Coach Manufacturing Company.

They are to be built on the semi-trailer plan and will be equipped with six, eight or ten wheels. Each is to be 34 feet long, 7 feet 8 inches wide and 12½ feet high.

Four sections, containing a smoking-room, parlor compartment, open observation platform and chair car will be included in each bus.

3 NEW THEATRES OPEN IN LONDON DESPITE TALKIES

Future of Famed Old Vic, However, Is Still Uncertain

Reuter's Special to The Victoria Times

London, Oct. 12.—Despite years of the vociferous killing the theatres, work is nearing completion on three new playhouses in the West End.

The Dominion is due to open its doors with "Follow Through" at the end of the month, and later this month the Duchess Theatre, near Drury Lane, will be finished.

Early next year the Whitehall will also be ready.

Of the three, the Duchess is the smallest, with a seating capacity of only 440, a number arrived at in order to meet the requirements of the London County Council, who will not sanction a theatre for 500 or more unless three sides of the building flank an open space. Being so small it may well escape the attentions of the films.

Of larger new theatres one would hesitate to prophesy, since the only two built since the War—the Carlton and the Piccadilly—are both now in the hands of vociferous exhibitors.

The statement that the Old Vic, which Miss Lilian Baylis has made the people's theatre of London, will transfer its work to Sadler's Wells Theatre is not confirmed by Miss Baylis. The Old Vic is on the Surrey side of the river. There Miss Baylis made its modern reputation, and a move to Sadler's Wells in North London is not considered as in itself desirable. As yet the Old Vic does not know its fate. It is certain to be set down for demolition under the new Charing Cross bridge scheme, but the London County Council has not yet made known what it intends to do, and it is unlikely to come to any decision until the beginning of the winter.

Sadler's Wells, which has a long history of its own, is under reconstruction and is intended by those who have supplied the funds to become a home for dramatic enterprises. It is still, however, in an unfinished condition, and a sum of £8,000 is required to complete it. For the time being, accordingly, the Old Vic will keep the flag of the people's theatre flying, and will work through the coming season regardless of the destruction that may overtake it in 1930.

WONDER MODELS ARE EXHIBITED BY ENGINEERS

Reuter's Special to The Victoria Times

London, Oct. 12.—Ships, aeroplanes, locomotives and scores of other models will be seen at the Model Engineers' Exhibition. They are not toys in any sense of the word. Everything in the exhibition is an exact miniature, and is scientifically accurate in every respect. All the exhibitors are amateurs, and models have been sent from all parts of the country.

One of the most ingenious of the engine models comes from Matlock. It is about the size of a pea, and the working parts can hardly be seen without a magnifying-glass. Every detail is perfect, and the model will go for months without attention.

Some wonderful miniature trains will be on view. They have real boilers and burn coal, while a track is being laid so that visitors can track rides drawn by a locomotive only two feet long. Members of the Model Engineers' Society are equipping a workshop and will show how the delicate mechanism for these tiny engines is made.

Almost every type of ship will be included, from proud Spanish galleons to a model of the Mauretania. Merchantmen of Nelson's days will stand side by side with models of modern freighters, and a miniature of the Discovery will be seen with a model of H.M.S. Rodney, made by a seventeen-year-old girl.

TWENTY-FIVE YEARS AGO TO-DAY

The Victoria Daily Times October 12, 1904

(Associated Press)
The armies of Kouroutpik and Oyama are again in battle on the ground which, as far as can be determined from to-day's advices from the front, lies generally to the north and east of the scene of the battle of Liao Yang.

Weather forecast—Victoria and vicinity, northerly and easterly winds, chiefly cloudy and cool.

A distinguished visitor, one who deserves well of his country, arrived in the city last evening in the person of Major-General Sir Charles Parsons, K.C.M.G., R.A., general officer commanding the Imperial forces in Canada.

The Empress of Japan last evening brought among her passengers a little group composing some of the famous war correspondents of the world. These were F. J. Knight of The London Post; Fred Palmer of Collier's Weekly; Richard Harding Davis of New York, who is famous not alone as a newspaper writer but a novelist; and George Lynch of The London Chronicle.

Victoria 8, Shamrocks 7. This was the score of the lacrosse game played yesterday afternoon at the Caledonia grounds.

The C.P.R. liner Empress of Japan, Captain H. Pybus, arrived last evening from the Orient with about 3,000 tons of freight.

The annual convention of the Pacific Coast Fire Chiefs' Association opened in Vancouver yesterday with fifty or sixty delegates in attendance, including Chief Watson of this city. The convention will last until Friday.

A GOWN IN THE NEW GRACEFUL MODE

Chic new lingerie incorporates the loveliest of all the new points of style into its smartness. This gown, of flesh colored rayon crepe, sponsors the moulded silhouette, belted at natural waistline, the fuller, longer skirt, achieved by a circular cut below the yoke, and rich decoration in the form of cafe au lait lace, which fashions almost the entire upper portion and extends gracefully down one side. The scalloped neckline and hem are just indicative of the gentle touch of grace most new fashions employ.

FIRE LOSS IS DETRIMENT TO ALL BUSINESS

Money That Would Be Used For Expansion Turned Into Covering Losses

Dominion-wide Move Under Way This Week to Cut Down Avoidable Fires

"A business that is worth building, is worth protecting," is a statement issued by the Victoria and District Fire Insurance Agents' Association, and attention is being drawn to the importance of safeguarding Canadian industry. "Consider what an enormous benefit would be provided throughout our country if the \$36,402,918 paid out for fire losses last year was used for building up manufacturing plants and providing employment for Canadians."

The object of setting apart one week annually, known as "Fire Prevention Week," is to reduce the tremendous fire waste of the Dominion, especially that which is directly due to carelessness and avoidable causes. Canada's fire loss is an economic waste, and almost accomplishes equal destruction every year. Every precaution should be taken by public spirited citizens to see that their premises are protected from the "fire fiend." Industrial plants, garages, mills and all public places should be made reasonably, if not absolutely, safe from fire and knowledge of the necessary steps to that end is available from the Victoria Insurance agents. Orderliness and cleanliness should be maintained. This is the first step towards effective fire prevention. Particular attention should be given the shipping and receiving rooms, and accumulation of excess packing material and empty boxes should be prevented.

Colwood

The School basketball team again were victorious on Monday afternoon when they played a fast game with the North Sooke team on the latter's grounds. The middle periods were fairly even, but in the first and fourth the Colwood boys got many baskets, with a final score of 24-8, in Colwood's favor. T. Warder, teacher of the North Sooke School, acted as referee. On Wednesday afternoon, October 16, the North Sooke basketball will play a return game with Colwood. The installation of an improved lighting system was approved at a recent meeting of the Colwood hall committee. W. E. Bennett, contractor, will have charge of the work, with B. Parker acting as representative of the hall committee. The matter was discussed at length regarding the construction of an annex to the present large hall, but as further details were required, the matter will be discussed at the next meeting. The Colwood hall committee acknowledges the generous assistance of the Wilfert Lumber Social Club in the matter of recent plumbing improvements. Permission was given the Colwood School basketball team for use of hall, and the hall committee donated to the players a copy of the latest Basketball Year Book and Rules. Movable wire guard screens for all windows will be provided. There was a good attendance at the monthly meeting of the Woman's Auxiliary to St. John's Church on Wednesday afternoon in Colwood Hall. Material was given out to the members for articles to be made for the sale of work on November 27. Committees were formed to assist with church decorations for the harvest festival services on Friday evening, October 18, and Sunday morning, October 20. Members will also co-operate and assist with the harvest social on Monday evening, October 21, in Colwood Hall. The tea hostesses were Miss James and Mrs. W. M. Brown. Mrs. G. Kemp and P. Bugis were the winners at Wednesday night's card party in Colwood Hall, held under the auspices of the Colwood hall committee. Consolations were awarded to Mrs. Haggart and J. Hopwood. Evening services will be held at St. John's Church on Sunday, October 13.

Battalion Orders

Battalion orders, part 1, by Lieut. Col. D. B. Martyn, D.S.O., M.C., commanding 1st Battalion (16th C.E.F.), the Canadian Scottish Regiment, Victoria, Oct. 11: Recruiting—Recruits possessing the necessary qualifications will be enlisted on the strength of the battalion on Monday and Thursday nights preparatory to the yearly training. Enlistment gives opportunities to train in drill, rifle shooting, Lewis gun, Vickers gun, physical training, first aid, signaling, gymnastic work and various athletics. The battalion has a full complement of military equipment, outdoor miniature rifle ranges, fully equipped gymnasium and swimming tank, and club quarters for the use of its members. Vickers gun section, signal section, company and platoon commanders are requested to complete organization by October 28. Training—The period of training for the battalion will commence on Monday, October 28, when a battalion smoker and concert will be held at the Drill Hall. The honorary colonel, His Honor the Lieutenant-Governor of British Columbia, has kindly consented to be present and will present certificates and various prizes won during the past year. Vickers Gun and Signaling Schools—Names of those who wish to take these courses, particulars of which will be published in due course, should hand in their names to the orderly room as soon as possible. Attestations—The undermentioned men having been duly attested are taken on the strength of the battalion and posted to companies shown opposite their names: 1005 Pte. C. A. McEllan, No. 3 Co.; 1006 Pte. D. M. Hogarth, No. 3 Co.; 1007 Pte. R. Hunt, No. 3 Co.; 1008 Pte. F. M. Nixon, No. 3 Co.; 1009 Pte. R. Caldwell, No. 4 Co.; 1010 Pte. W. Caldwell, No. 4 Co. Appointments and Promotions—To be acting sergeant: 937, Corpl. J. A. McCallum, No. 2 Co.; 839, L.-Corpl. J. L. Hendon, No. 2 Co. Struck off Training Strength—639, A-Sgt. A. M. Robertson, H.Q. Co.; 684, Sgt. E. B. Chalmers, H.Q. Co.; 628, Sgt. R. J. Hill, No. 4 Co.; 597, L.-Corpl. H. Nixon, No. 4 Co.; 844, L.-Corpl. A. M. Miller, No. 4 Co.; 622, Pte. A. Rogers, No. 4 Co.; 837, Pte. D. S. Braidwood, No. 4 Co.; 983, Pte. R. C. Firmstone, No. 4 Co.; 955, Pte. I. E. Kerr, No. 4 Co. Transferred—Lieut. B. H. Lamont from No. 3 Co. to No. 3 Co. C. HENSON, Captain and Adjutant, 1st Battalion (16th C.E.F.), the Canadian Scottish Regiment.

H. T. Company, 11th Divisional Train, C.A.S.C., will parade on Tuesday night, October 15, at 8 o'clock, when all clothing and equipment on issue to N.C.O.'s and men of the company will be returned to store without fail, for inspection and checking by Royal Canadian Ordnance Corps. Attestations: The undermentioned men, having been attested, are taken on the strength of the Horse Transport Company, from September 17: Driver C. R. Beadnell, Driver B. S. Dyer, Driver C. E. Stroud. H. L. ROSE, Capt., O.C., H.T. Co., 11th Divisional Train, C.A.S.C.

Relieves Burns and Scalds!

Even the most careful housewife cannot escape the occasional burn or scald. But Absorbine, Jr., applied instantly takes out the pain and the Nature to heal quickly and effectively. Absorbine, Jr., is a highly concentrated antiseptic and germicide as well as a valuable liniment. It soothes the raw, tender skin, allays inflammation and removes danger of infection. It is not greasy and does not stain the skin or clothes. Try a bottle; you'll be delighted. \$1.25 at your druggist.

YOUR BABY and MINE
by MRS. MARY ELIZABETH

Mrs. Elford will be glad to answer all questions pertaining to babies and children. A stamped and self-addressed envelope forwarded to this office will bring a personal reply.

BOY WHO STEALS IS CERTAIN TO ANSWER:

LIE ALSO
Mrs. D.E.H. writes:
"I have been reading your articles a long time and think they are good. I have a very different problem and I really do not know what steps to take with this child."

"This boy of mine will be ten in a few days. Ever since he has been old enough to walk I have had trouble with him. I've punished him in different ways, but nothing seems to do any good. The thing he does most is to steal, and when I find him with money and question him, he will lie and lie and lie."

"He takes money out of my purse, or anyone's else that happens to be about when we miss it and ask him if he took it, he always denies it with such a convincing look that it is hard to disbelieve him. A few days ago he took fifty cents out of my purse. He spent it for candy, ice cream, pop and a Yale lock. I threatened to put him in a reform school if he didn't tell the truth, and he finally admitted it. Money is such a temptation to him."

"He will do anything to earn it, sells magazines, runs errands, helps a farmer sell vegetables and countless other jobs. He brings it home and puts it in a box toward his education. He has quite a nice little bank account. Perhaps you think I do not give him enough money. I let him go to a show on Saturday, and give him a nickel to spend. Can you give me any advice?"

Restless Children

Children will fret, often for no apparent reason. But there's always one sure way to comfort a restless, fretful child. Castoria! Harmless as the recipe on the wrapper; mild and bland as it tastes. But its gentle action soothes a youngster more surely than some powerful medicine that is meant for the stronger systems of adults.

That's the beauty of this special children's remedy! It may be given the tiniest infant—as often as there is any need. In cases of colic, diarrhea, or similar disturbance, it is invaluable. But it has everyday uses all mothers should understand. A coated tongue calls for a few drops to ward off constipation; so does any suggestion of bad breath. Whenever children don't eat well, don't rest well, or have any little upset—this pure vegetable preparation is usually all that's needed to set everything to rights. Genuine Castoria has Chas. H. Fletcher's signature on the wrapper. Doctors prescribe it.

MILLION IS NAMED COST STREET PLAN

(Continued from page 1)

MAYOR EXPLAINS

In a statement issued for publication after the meeting His Worship said: "This is a suggested draft of a possible bylaw for the purpose of permanent construction and improvement of main streets in the city. It is based on a request made by myself early in the year on the Engineering Department, for a definite plan of street betterment to take place over a ten-year period."

"The idea is that a concrete policy for a period of years covering city development should be settled, in order that the public may know some definite constructive plan will be undertaken in regard to our streets," continued Mayor Anson.

"It is not a formal bylaw; but a bylaw would be presented later if this plan is endorsed. It calls for a sum not over \$1,000,000, spread over the next ten years," concluded His Worship.

When the measure was presented in open council yesterday afternoon, Alderman W. T. Strath moved that it be tabled, and copies handed to each alderman for study. A plan of such magnitude could not be decided on out of hand, he said. Alderman H. O. Litchfield and others concurred.

REVERSAL IN POLICY

The proposed bylaw is the first official attack made on the "pay-as-you-go" policy this year. The "pay-as-you-go" plan was initiated in 1922, when the city's finances were sharing with the rest of Canada the pit of postwar depression. Since then necessary street work has been done from revenue, and the debt of the city has been reduced by some \$3,000,000 in the seven years.

The proposed street development bylaw will be the chief item of business on the agenda of the council for its next regular meeting to be held the week after next. Next week, five members of the council will be at Harrison Hot Springs for the Union convention and no opportunity for debate will present itself until they return.

The Woman's Day

By ALLENE SUMNER

Sometimes I don't wonder at the increasing divorce rate and the so-called decline of family life. Or rather, I should say, I wonder why more families do not dissolve than do. The other evening I had dinner at a restaurant with a man and his wife. As we sat down the waiter hovered about handing us menu cards, my host asked me what meat I would like to eat. I told him I would like lamb chops.

"But this place," he said, "is famous for its sea foods. You really must try their lobsters."

"Perhaps she'd rather have the lamb chops," suggested his wife.

"She doesn't know what she is talking about—she has never had her lobster—it is marvelous here. If she just wanted lamb chops we could have gone anywhere."

TART WORDS

He ordered lobster for three. He ordered salad to suit himself. I don't remember that we had any option about anything more until dessert.

"I'll just have coffee," I said. "Indeed you won't," said he—"you are going to have a cherry tart. There's no place in the city where they have them like they do here."

His wife protested. "Don't order anything with cherries for me, dear—you know I don't like them."

"You just think so," he returned indulgently. "The cherry tarts here can't be beaten. It's just an idea of yours that you don't like cherries. Everybody ought to like them—Walter, we'll take three cherry tarts, and coffee."

His wife did not eat the cherry tart, but she said nothing, and I don't re-

Seven Cents

member that anything was said about it.

After dinner she said to me: "What would you like to do this evening?" I said I would love to go directly to their house and see the new things his wife brought home from Europe.

"Go home nothing," said Friend Husband. "There's a swell new show just make it if we hurry. Hey, taxi. We stepped into the taxi and went to the theatre. I didn't want to see this particular review, and I know his wife did not—but we went."

HOLDING A CLUB
After the theatre, he asked our

pleasure again. I said I would like to go home immediately.

"Don't be silly," said he, "the night is yet young. Let's go over to this new night club and take a look at what's going on." There was no use protesting, against going, or against the supper he insisted on ordering.

The amazing thing about this man was, that always he asked what you wanted to do, and did exactly what he wanted to do. Your wishes only bounced against a wall and back again.

And I could understand a wife who would suddenly revolt against this sort of treatment. I could perfectly under-

stand, too, the amusement of the husband if she did, and I could hear him saying, and saying honestly:

"I can't understand women. I gave her everything she wanted. I spent all the money on her that I could afford—and more. You simply can't understand a woman."

The English walnut is not a native of England but comes from Greece, Persia and Afghanistan.

In France and Scotland, New Year's Day is a more important holiday than Christmas.

The stomach of one night hawk was found to contain the remains of 1,800 flying ants.

Canadian Daughters—Assembly No. 5, Canadian Daughters' League, will hold their regular social meeting on Tuesday evening next in the Sons of Canada Hall. An interesting programme has been arranged, and every member is expected to attend.

Guide Association—There will be a meeting of the Girl Guide Association on Monday evening at 8 o'clock in the headquarters, Sweeney-O'Connell Building.

Former Boxer Usually Makes Good Manager For Fighter

Schlossberg Should Make Schaaf Champ Bob Edgren Thinks

Recalls How Many of World's Titleholders Have Been Developed and Managed by Former Clever Fighters; Kearns Made Dempsey Use His Left by Strapping Right to His Leg; George Blake Developed Both Fidel La Barba and Jackie Fields.

By ROBERT EDGREN

Phil Schlossberg, who is developing Ernie Schaaf, New Jersey heavyweight, ought to be able to make a champion. Schlossberg was a great boxer when in the navy many years ago, I remember seeing him box on a battleship in New York Harbor, and he looked as good as any of the professionals of that day. When Phil left the navy he took up fighting professionally, and made many a dent in the big fellows, although he was too light to get up among the champions. He was a tricky, shifty boxer with a good punch. If he can drill the same fighting skill into Schaaf he'll make some money.

A former good boxer ought to be the best kind of manager for a coming fighter. Dan Hickey, who came from Australia in the time of the Boer war, and was a world champion, was a partner for several years, and a world light-heavyweight champion of Paul Berlenbach, an amateur club wrestler.

KEARNS WAS LIGHTWEIGHT

Jack Kearns, who brought Jack Dempsey up from nothing to the world's heavyweight championship, and who helped Dempsey develop the greatest hitting left hand since Jeffries' time by the simple trick of making Dempsey box his sparring partner with his right hand tied to his leg, used to be a lightweight fighter. Kearns also made Mickey Walker world's middleweight champion.

George Blake, former fighter, who was boxing instructor at the Los Angeles Athletic Club, taught and developed two world's champions, Fidel LaBarba and Jackie Fields. Blake invented the style of fighting that would carry LaBarba into a fortune, and he made Jackie Fields the cleverest featherweight among all the amateurs. While under Blake's direction Fields won the Olympic featherweight championship and Fidel LaBarba won the Olympic flyweight title in the same Olympic Games.

Fields took Gig Rooney as manager when he became a professional, and won the world's welterweight championship from Joe Dundee at Detroit under Rooney's direction. But he knew how to fight and was as clever as any professional when he left the amateurs.

TOO MUCH BRAINS

Dan Morgan, who managed Jack Britton and made a world's welterweight champion of him, was a former fighter, and a clever one. The only trouble with Morgan as a fighter was that he had too much brains. He preferred being a boxing general to being a boxing private. As manager he almost made a world's lightweight champion out of Miltie Southpaw Knockout Brown. Karpis was the most popular and talked of fighter on the continent for a year or two, and probably if he hadn't had Dan Morgan as a manager he wouldn't have been heard of.

Jim Jeffries, most powerful and invincible of all the heavyweight world's champions, tells the world that he got all his most useful ideas about fighting from Dewitt Van Court, who started him as a youngster in Los Angeles. Van Court was a famous boxer before Jeff's time.

MADAM CHAMPION

George Engel, who was a fighter, but working in the same iron works with Frank Klaus, taught Frank how to put up his hands and made him world's middleweight champion.

Tom O'Rourke, who had a few bouts in the old bare fist, London prize ring days, developed George Dixon and Joe Walcott, both world's champions.

The famous Jack McAuliffe, who retired undefeated lightweight champion of the world, made his start under direction of Billy Madden, a former prizefighter. Madden also brought out and managed Charlie Mitchell, who fought John L. Sullivan to a draw in a heavyweight championship prizefight at Chantilly, France. And Madden also

taught and managed Gus Ruhlin, who might have become world's champion if his early career hadn't clashed with that of an even bigger and more powerful youngster, Jim Jeffries.

Tom Jones, who used to be called "The battling barber," developed Ad Wolgast and Jess Willard as world champions.

Sam Fitzpatrick, a veteran from Australia, managed Jack Johnson on the way up.

Leo Flynn, manager of Dave Shade, claims that he was a fighter and fought in many states. Just a preliminary scrapper, but his experience started him as manager of fighters. Some of the champions have developed great fighters without managing them. Jim Corbett had a protégé, George Green, who took the name Young Corbett, and George came near getting into the title class. Jim Jeffries, who was a fighter and a manager, coached Ad Wolgast when Ad was just a "corner." The greatest lightweight, Joe Gans, once told me that he learned all his boxing skill from Bob Fitzsimmons. Joe left a job in the Baltimore fish market to follow a show in which Bob Fitzsimmons was boxing all comers, studied Fitz night after night, and at last got up courage to introduce himself to Bob and ask for some advice. Recognizing the earnestness and intelligence of the young negro boxer Fitz tried him out and gave him such good advice that in following it Gans went to the top of the lightweight class.

TAUGHT HIS BROTHER

Willie Britt, himself a remarkably clever amateur boxer, developed his brother, Jimmy Britt, as a fighter, and added quite a bit of skill to the fighting ability that made Stanley Ketchel one of the greatest of all the middleweight champions.

And I may be remembered that Jimmy Dunn, who could swing a tricky glove himself, brought out Johnny Kilbane, as clever a featherweight as ever held the title.

(Copyright, 1929, by The Bell Syndicate, Inc.)

Cuban Boxer Is Knocked Unconscious

Philadelphia, Oct. 12.—Benny Bass, Philadelphia featherweight, scored a quick knockout over Armando Santiago, Cuban boxer, in the second round of a ten-round fight at the Phillies' ball park last night. Santiago was knocked unconscious in the second round with a right to the jaw. He weighed 125 and Bass 128½.

ALL-ROUND BEATING

San Francisco, Oct. 12.—Huerta Evans, 122 of Los Angeles, gave Young Nationalist an all-round beating last night to win an easy ten-round decision over the Filipino featherweight, Nationalist, weighing one-half pound more than Evans.

RACE DRIVER

KILLED WHEN CAR CRASHES

Little Rock, Oct. 12.—Ray Hesse, of Joliet, Ill., automobile race driver, was killed during a race at the Arkansas State Fair grounds yesterday, when his car, traveling at high speed, crashed through a guard railing and plunged down a thirty-foot embankment. His head was crushed. He apparently lost control of the car as it rounded a curve.

Hidden-hole Play Won By Mrs. Lee

With a handicap of 8-13, lowering her gross score of 33, to 2-3, Mrs. J. R. Lee won the women's hidden-hole competition played at Colwood Golf Club yesterday.

Mrs. F. J. Hall was awarded the consolation prize with a gross 42, handicap of 8-13, and net 29-3.

Competitors in the Tombstone round next Tuesday are asked to arrange their own starting times and select their opponents.

HE MADE SURE

"Gus" said Bill, as he caught up with him on the way back for camp. "Are all the rest of the boys out of the woods yet?"

"Yes," said Gus. "All six of them?"

"Yes," said Bill, "they're all safe."

"Then," said Bill, "his chest swelling, 'I've shot a deer'."

Saving Time In Football

Method of Solving Throw-in Question Suggested; Danger of Free Kick Penalty; Time Wasting by Players.

By J. W. SMITH (Portsmouth)

Football is always changing. This season we have seen come into force a new law that has caused much debate about which there are many different opinions. I refer to the rule which debars goalkeepers from moving on their line when a penalty kick is taken.

I am not going to discuss this matter in full, a goalkeeper is the best person to do that, but it shows plainly that every season the game is carefully considered and the changes are made as they are deemed necessary. So it is perhaps not out of place to think about another matter which may come under the notice of legislators in the future. For some years the question of the throw-in has been debated and the problem of saving time considered.

WASTING TIME

It is not necessary to go into details about the suggested change that a free kick should be allowed when a ball has been sent out of play. There are, of course, times when men kick a ball out of play deliberately to waste time, and possibly the introduction of a free kick as a penalty would do much to stop that evil, if evil it is.

APART FROM DELIBERATE WASTING OF TIME there are the hundreds of occasions when a ball is sent out of play by accident, or when one or other course is open to the player. These should be borne in mind.

In such instances it seems scarcely fair that a free kick should be awarded.

GREAT DANGER

One can imagine what would happen. A ball that was kicked out of play ten yards from the goal line would be of greater danger than a free kick. In fact, almost every time a ball went out of play in your half of the field there would be the danger of a goal. An accurate centre would cause great concern.

YOU MAY THINK THAT THIS IS EXAGGERATED. I ask you to consider how many goals come from corner kicks. Why is that? Because they are few.

In my opinion there is not much danger to a goal from a corner because they are so placed that a goalkeeper would be able to see them. Perhaps eighty per cent of corner kicks are cleared by the goalkeeper, who has the great advantage of being able to use his hands.

NOT SOUND

I am willing to admit that often we players do not deal with this kick in a sound manner. It always seems to me that we should do well to send all the tallest men into the mouth of the goal when these kicks are being taken, even though it might necessitate bringing up a full back. It would then, of course, be essential to send another man back.

When forwards are short stature they have not much chance with a ball from the corner, so I would put the tall men there and bring the short forwards back—there is also a chance that if the ball comes out the forwards, who are supposed to be the best shots, will have an opportunity to show their power and skill.

TOO DRASTIC

All the foregoing is caused because from the corner the ball comes across sufficiently near to the goal to allow the custodian to run out and clear.

This would not be so with a kick taken say, ten yards down the field. It would come across at a very awkward angle and it would be a straight duel between the defender and the attacker.

The penalty, therefore, of a ball being sent out of play would be a little too drastic.

right in theory, but in practice I am afraid it would lead to no little misunderstanding and confusion, to say nothing of dissatisfaction.

Time saving is the big thing to be considered and I am inclined to agree that it is necessary. Where most of this valuable time is lost is in getting the ball and bringing it back to the exact spot where it went out of play.

THROW IN ANYWHERE

I have been trying to think where this can be put right. The following suggestion might help: Instead of the ball being thrown back exactly where it went out of play, why not let it be thrown back anywhere along the line, the only stipulation being that it is not thrown back nearer to the opposing goal than it was kicked out?

WASTE TIME. A defender, to waste time, kicks the ball out of play with great force. It crosses the line in his own half, but travels up the field towards the other end, perhaps past the goal line. Now what happens? Somebody has to fetch the ball; kick it down the field and everybody wait to take up positions covering another man; time is lost.

MY WAY WOULD BE THE FOLLOWING

procedure: If the field at the other end was clear, as would be likely, the nearest player to the ball, probably the full back, would race for the ball, throw it in, probably to his other back, and it would be punted up the field again. In less time than it would have taken under the present rule, the ball would be in play and back near the goal of the man who had tried to waste time.

Whether it would stop deliberate kicking out I doubt very much, but it would I am convinced, make it much less common and in every way save valuable time.

When the ball is sent out of play the object is to get it back into play as soon as possible, and if it is to be done this, it is carrying a step farther the law which allowed the ball to be thrown back without the player having to place his foot upon the line.

MISS GOURLEY

Wins British Golf Honors

Brookstone, Eng., Oct. 12.—Miss Mollie Gourley, of Cambridge, Heath, is the new English women's golf champion. In a thirty-six hole final yesterday she defeated eighteen-year-old Daisy Whitwick, of North Foreland by 6 and 5.

Will Discuss Commercial Hockey Plans

With the start of the big league hockey season only a short time away and incidentally the opening of the local arena about three weeks off, amateur hockey prospects are coming under consideration at local enthusiasts.

A meeting has been called for next Monday night at 7 o'clock in the Y.M.C.A. to talk over plans for the Commercial Hockey League here.

KENNEL CLUB PLANS SHOWN

First of Winter Series to Be Held on October 26

The first of a series of evening shows to be staged during the winter will take place on Saturday, October 26. William Pym, the popular B.C. director of the Canadian Kennel Club, has been asked to officiate in the capacity of judge. Through many years of experience in judging and raising dogs of all breeds, he has gained a wide knowledge and very seldom is the opinion of such an experienced man offered at a parlor show.

CHAMPIONS TO BE SHOWN

In the past champions have been barred from competing at parlor shows, but in view of the fact that there are so many in and around Victoria, and also to give the amateurs an opportunity to see the calibre of the champions, a special class will be put on for them and they will compete among themselves.

The principle of a parlor show will be strictly adhered to in the case of the puppies and junior and senior classes. The former will be provided for all breeds of six months of age and the latter for puppies aged under twelve months. Three handsome prizes have already been donated to be awarded to the best junior, best senior and best puppy in the show.

CHILDREN'S CLASS

The children's handler class which is always such a popular number will be put on and will be free to children under fourteen years of age. Previous winners of this class will not be allowed to compete.

Locations for staging this event are under consideration, but no definite decision will be made until next week.

MISS HOGAN WINS

Golf at Duncan

Miss P. Hogan was the winner of the monthly medal competition held for the ladies of the Cowichan Golf Club on Wednesday, with a gross score of 96, which with her handicap of 18, made a net 78. Mrs. Boyd Wallis was second with 100, handicap 19, net 81.

Others competing were Misses A. Easton, J. S. Robinson, Mrs. Morton, E. Brock, W. S. Harper, Miss Bond, Miss Clark and Miss Reid.

NEW MEMBERS

When hitting any shot Bobby Jones never hesitates. He doesn't look down the fairway and back at the ball, then does another measuring glance. He doesn't waggle his club even once. He steps up, puts his clubhead behind the ball, instantly swings back in a leisurely, unhurried way, and hits with perfect confidence and ease. His expression doesn't change. There isn't a sign of effort. He doesn't wriggle his body "into the shot." He doesn't even follow through in the usual way. The club goes far enough and stops; that's all there is to it. Just like Abe Mitchell, England's longest driver, whose club never comes up to his left shoulder after a shot.

There may be another like Jones some time—a fellow who can play consistent championship golf year after year. But just now there's only one Bobby Jones.

Damon Runyon, who always has a pretty good line on fighters, says that Max Schmeling wouldn't go three rounds with Vittorio Campolo, the sensational giant from the Argentine, without winning. Evidently Schmeling's board of advisers had the same notion when they shipped him back to Germany right after Campolo knocked out Tom Heene.

The report that Charlie Harvey, veteran manager of fighters, is recovering nicely from the effect of his latest automobile crash will have a cheering effect on thousands of Charlie's friends. As yet is one of the few light managers with a record that President Roosevelt would have characterized as "clean as a hound's tooth."

Charles started many years ago as a follower of amateur sport. When he began to dabble with the professional end he kept his high standard of sportsmanship. This is the second time Charlie has had his skull fractured in an auto accident, and he's no spring chicken, even if he still has a thick crop of hair and looks younger

MRS. PHILBRICK AND MRS. CAREW MARTIN WIN TITLES

Two New Champions Are Crowned at Victoria Golf Club; Mrs. Philbrick Plays Brilliant Game to Defeat Mrs. K. C. Allen in Final; Prizes Are Presented.

After putting the trophy representing the women's city championship away on the shelf, Mrs. R. B. Philbrick, captain at the Victoria Golf Club, went out yesterday and added the club "A" title to her many golf honors.

Mrs. Philbrick defeated Mrs. K. C. Allen 4 and 3 in the eighteen-hole final played yesterday afternoon over the tricky Oak Bay course.

Playing practically par golf, the new champion, who ascends the throne formerly occupied by Mrs. Hutchinson, was never down to her opponent. She captured the first two holes in par, and then allowed Mrs. Allen a half by knocking her ball into the hole on the third. After Mrs. Allen rallied on the next hole, a birdie two and put three on the eighth and ninth holes brought Mrs. Philbrick to the turn three up.

FINE APPROACHES

The next two holes were taken by Mrs. Philbrick, but Mrs. Allen, playing beautiful approaches, secured the twelfth and thirteenth. Mrs. Allen overran the pin on the fourteenth with a chip shot and the hole was won by

Mrs. Philbrick making her fourth four. The next hole was halved in five ending the match.

Mrs. Carew Martin captured the "B" section honors by defeating Mrs. Barber-Starkey, the medalist, 2 and 1. The winner came from behind on the last nine to set the decision, her opponent being one up at the turn.

PRIZES PRESENTED

Prizes were presented by Mrs. A. C. Burdick following the finals. The awards made were:

Mrs. Philbrick, champion of Class "A".

Mrs. Allen, runner-up.

Mrs. Forbes Wilson, medalist.

Mrs. Mary Campbell, best net in Class "A".

Mrs. Carew Martin, champion of Class "B".

Mrs. Barber-Starkey, runner-up and medalist.

Miss Turner, best net of whole tourney and best net in Class "B".

Mrs. W. Parry, winner of first flight in Class "A".

Mrs. N. Wilson, winner of first flight in Class "B".

Mrs. James Gray, winner of second flight.

Mrs. Douglas Hunter, winner of third flight.

Sports Through Edgren's Eyes

By ROBERT EDGREN

Bobby Jones is the world's greatest golfer, partly because he has a perfect muscular equipment for playing golf. He started young, playing in championship tournaments from the age of thirteen, and quickly went up among the low scorers in championship play. When he was five-foot-four and just out of short pants he weighed 165.

So to-day Jones hits his shots without any noticeable effort. When he wants to he can drive as far as any man in golf. His range of accurate driving isn't his longest range and he can let

out twenty or thirty yards more if he cares to. He showed that several times at Pebble Beach, playing with Tolley and other long hitters in the practice rounds. Noticeable in one remarkable round early in the practice, when Tolley cracked his second shot to the 555 yard fourteenth green, to lie within six feet of the pin. Jones followed with a second shot to the green. This is an uphill hole and very few golfers can possibly reach it in two. Jones's ball passed the cup and lay twelve feet beyond. Jones said his third shot for an eagle. Tolley missed his shorter putt and took a birdie.

NEVER HESITATES

When hitting any shot Bobby Jones never hesitates. He doesn't look down the fairway and back at the ball, then does another measuring glance. He doesn't waggle his club even once. He steps up, puts his clubhead behind the ball, instantly swings back in a leisurely, unhurried way, and hits with perfect confidence and ease. His expression doesn't change. There isn't a sign of effort. He doesn't wriggle his body "into the shot." He doesn't even follow through in the usual way. The club goes far enough and stops; that's all there is to it. Just like Abe Mitchell, England's longest driver, whose club never comes up to his left shoulder after a shot.

There may be another like Jones some time—a fellow who can play consistent championship golf year after year. But just now there's only one Bobby Jones.

One knockout doesn't stop a real fighter. Here is Vittorio Campolo, the six and one-half foot giant from the Argentine, chasing ambitious heavyweights and being completely off the calling list of the Sharkey and the Stribling and the rest of the husky gentlemen who pride themselves on their business acumen. When Campolo was a first hand of Monte Munn, a large gentleman from Nebraska who had clouded a few in this country, went down to the Argentine and socked Campolo temporarily out of the picture. And now Munn is forgotten and Campolo, under the auspices of Humbert Fugazy, has hopped into the spotlight.

On well, some fighters take a shelling as an experience, and come ahead faster for having learned something. That seems to be the case with Vittorio Campolo.

To Broadcast Horse Show And Moran And Mac From Sound City

At 8 o'clock to-night KXA will be ready to take the whole Pacific Northwest to Seattle's International Horse Show. The KXA's handy man at the "mike" and "N. J. mirror."

Proceeding this event KXA is scheduled to carry a Columbia chain programme featuring Moran and Mac, the "Two Black Crows" of stage, film and radio fame.

Bobby Jones on Golf

It is apparently not a difficult thing for a youngster, upon giving a fair amount of attention to golf, to develop a swing which on occasions will produce good results. And it would seem also that there is allowed him considerable freedom in selecting the manner in which he will go about it. Supply joints and muscles and the strength and vigor of youth make up for a multitude of golfing sins.

But if one will watch closely it will be observed that few of these youngsters manage to endure, and those who retain their effectiveness or improve with age are those who have built upon a firm foundation of form and style may not mean much in a short span, a day or a year, but over the long route the sound swing is bound to win in a game where matches and tournaments to endure are played when muscles are virile and nerves under perfect control.

GRIP OF GOOD PLAYERS VARIES LITTLE

It has been particularly striking to me that nearly all of the young players whom I have observed within the last few years have one common tendency. All of them seem to want length at whatever cost, and they have, whether consciously or not, adopted the obvious but most dangerous means of getting it.

It will be found that most of the star performers of to-day employ a grip which in its essential element differs little from the grip which has been named for Harry Vardon. The Vardon grip is an overgripping one, and while some of the better players interlock and others neither interlock nor overlap, the positions of the hands upon the club vary very little among them. All in nearly every case the most opposed, the left against the front of the shaft and the right against the back of it, with the V's formed by the thumb and first finger of each hand pointing directly upward in the line of the shaft. The variation from this in a particular case will be found to be very small.

ORTHODOX STYLE MOST EFFECTIVE

Now the tendency among the younger players of whom I have spoken has been to turn the left hand more to the upper side of the shaft and to drop the right hand underneath it. The first effect of this change is to increase greatly the power of the wrists, because as they lash into the stroke the clubhead can be moved through a greater distance in the act of turning into the ball. This much is fine, so long and only so long as it is under perfect control. But the more even temperament and the best trained muscles cannot remain in perfect concert all the time, and when a swing of this kind is not clicking the error, whatever it is, will be exaggerated in its effect upon the shot.

The position of the hands which I have described places the entire body in a strained position, where the natural tendency is to have the left shoulder upward before the ball is hit and so strike the ball an ascending blow. Since it is thus difficult to keep the clubhead traveling close to the ground, it will be noted that players addicted to the habit of gripping in this manner are more likely to top their drives than others who employ a more orthodox style. Shots mislaid in this way must reach some sort of difficulty, but no foe can be as complete as a top.

Our very best players are not extraordinarily long hitters. They do not need to be. They have learned the value of control where a fine iron shot after a good straight drive has been found to be more effective than a loosely played, pitched after a Herculean wallop.

SKATING SEASON OPENS IN LONDON

London, Oct. 12.—In spite of the hot weather the skating season in London began this week when the big indoor rink at Richmond, the largest in the world, opened again after a brief summer break.

This date is rather earlier than skaters had expected, but the opportunity thus afforded for practice before the competitive events of the new season are in full swing will certainly be welcome, particularly as the London ice club does not reopen until early in October, and the new public rink at Golders Green is not yet completed.

Phil Taylor, the Canadian track skater, and Howard Nicholson, the American professional champion, gave exhibitions and the rink is available for the public.

RACING ON SKATES

Indoor ice racing, which was first begun in England at Richmond last winter, will probably be a feature of the season. Experts hold that the experimental races controlled by the National Skating Association, not only proved that indoor speed events are practicable from the official point of view, but also that they are likely to prove a success as a public spectacle. They are not quite so exciting as ice hockey, but they have two advantages—they take less time and so cause less inconvenience to those who wish to skate themselves, and the expense of bringing over foreign ice hockey teams is avoided.

Do You Catch Cold Easily?

Are you one of the many who spend days each year in bed—who constantly catch colds, sore throats, influenza, and other ailments which take the joy out of life?

Many acquire these illnesses because their bodies are not fortified to withstand disease. Nerves are weak,

blood thin, and vitality below par.

By taking a short course of **Fellows' Syrup** you can strengthen your nerves, increase your vitality, and enjoy, in healthful activity, the hours formerly wasted in bed. It cannot be successfully imitated.

Fellows' Laxative Tablets are specially prepared for the rational treatment of, and ultimate recovery from constipation.

FELLOWS' SYRUP

HOUSE FOR SALE

Modern Bungalow—Five bright, airy rooms, handsome fireplace, full basement, fine furnace, stationary wash-tubs and warm garage. First-class condition, near two street cars, school, stores and churches. Wide paved street and low city taxes. Garden has peaches, pears, logans, cherries, roses and flowers. Ready for occupancy now. Owner advertising and will sacrifice.

WRITE BOX 61 TIMES

Brentwood

The marriage was solemnized at St. Andrew's Church, Vancouver, on October 8, of Miss Margaret Brown of Toronto and Mr. F. M. Gowsdy of Brentwood, formerly of Guelph, Ontario. The Rev. Kerr officiated. Mr. and Mrs. Gowsdy will make their home on Steillys Grove Road.

The Mount Newton Social Club opened its winter activities with a card

party on Wednesday evening, nine tables being engaged in military five hundred. The prize-winners were: First Mrs. R. Hall, Miss H. Hagan, Mr. Hall and Mr. Gosselin, with a score of 28; second, Mrs. Lacoursiere, Mrs. A. Guy, Mr. Rougeois and Mr. Rochon, with 24. The next card party will be held on October 23 and will be the commencement of the series.

Miss R. Hagan has returned from a three weeks' holiday spent in Burnaby and Vancouver.

Mr. and Mrs. F. Walker have returned from a week's holiday in Vancouver.

Reports Given By Historical Society Here

Activities of Year Sketched; Many Talks Given; Need Greater Membership

Beaumont Boggs Succeeds V. L. Denton as President of Local Association

Election of officers, reading of reports and general discussion of the society's business featured the annual meeting of the British Columbia Historical Association in the Provincial Archives last night.

During the evening C. C. Pemberton was elected an honorary life member of the association in appreciation of the work he had done for the organization.

Beaumont Boggs was elected president of the association. V. A. Newcombe was named vice-president. Lieutenant-Governor Randolph Bruce was retained as patron, while Hon. S. L. Howe, Provincial Secretary, was appointed honorary secretary.

Other officers elected were: Second vice-president, Arthur Anstey, M.A., Vancouver; honorary secretary, Major Harold T. Nation; honorary recording secretary, Miss A. M. Russell; honorary editor, Donald A. Fraser.

For council: Hon. Mr. Justice Archer Martin, John Hoole (provincial archivist), Major F. V. Longstaff, Mrs. Arthur Cree, C. C. Pemberton, Miss Blanche MacDonald, M.A. (Nanaimo), Rev. J. C. and Mr. Gosselin, with a score of 28; second, Mrs. Lacoursiere, Mrs. A. Guy, Mr. Rougeois and Mr. Rochon, with 24. The next card party will be held on October 23 and will be the commencement of the series.

Miss R. Hagan has returned from a three weeks' holiday spent in Burnaby and Vancouver.

Mr. and Mrs. F. Walker have returned from a week's holiday in Vancouver.

During the meeting the announcement was made that a volume dealing

comprehensively with the work of the association during the last four years would be published shortly.

Reports on activities in all phases of society were read by the different committee chairmen as follows: Educational committee, Mrs. A. Cree; historical committee, Major F. V. Longstaff; Indian affairs, W. A. Newcombe; mining, Major Nation; and biographical committee, Miss A. M. Russell.

In giving the secretary's report, Major Nation spoke of the different papers that had been read before the club during the year. He also touched the other ceremonies held by the association since its last annual meeting. Included in the latter were, the unveiling of the Bastion Plaque at the Minor Court Building, the old-timers' dinner, the placing of the explanatory tablet on the Gosselin Monument, and placing of a wreath on the Cook bust at the Parliament Buildings.

Congratulations had been expressed to the Women's Canadian Club on its publication of "Pioneer Women of British Columbia" and to A. S. Deaville for his volume on colonial postage systems and stamps of Vancouver Island, the report stated.

Satisfaction was also expressed over the banquet commemorating the arrival of Governor Blanshard on Vancouver Island, held by the association.

NEED MORE MEMBERS

Necessity of increasing the membership of the society was stressed by C. McTavish, treasurer, in his report. This showed a membership of fifty-one with a balance on hand of \$47.12.

Co-operation between the British Columbia Historical Association and the Native Sons of B.C. was urged by the retiring president, V. L. Denton. In his report, Mr. Denton also spoke at some length on the date of birth of Victoria and British Columbia.

While speaking on the keeping of documents relating to the University of British Columbia, Mr. Denton expressed the opinion that all should be kept in one repository, but that copies of the same should be sent to other centres interested in the institution's development.

BLANSHARD DINNER CRITICISED

He then dealt with the association's banquet commemorating the landing of Governor Blanshard. The society had been subjected to considerable criticism for holding this ceremony, he stated, saying that several people had thought the fête belittling to the memory of Chief Factor Douglas who later became the second governor.

During his talk, the retiring president stated that controversy had arisen about the birthday of the province. Victoria was born on March 10, 1850, when Blanshard read his commission at Fort Victoria, he stated, while British Columbia became a British colony in November, 1858.

Fortunately, he added, all agreed that

the province entered Confederation in 1871.

In conclusion, Mr. Denton suggested the formation of branch societies in Vancouver, Kamloops, Nelson, New Westminster and other points. Failing the formation of auxiliary associations, he suggested the interchange of speakers between the central body here and representatives from districts where field work was being carried on.

City Calls Tenders For Airport Here

Public Seaplane Base Is Authorized By Dominion Air Officials

Site at Dallas Road and Erie Street to Be Leased in Return For Erection

Tenders for the construction and operation on lease of a public seaplane base at Victoria, on plans prepared by the City Engineer, and approved by the Royal Canadian Air Force and the Civil Aviation branch at Ottawa, will be called for forthwith by the city, it was decided at the City Council meeting yesterday afternoon.

Alderman W. T. Straith, chairman of the industrial committee, explained that differences in regard to the choice of site had been ironed out by the visit of Squadron Leader J. H. McLeod, in command of the Dominion Air Station at Jericho Beach, and after negotiation with the lumber interests and others here.

A site at the foot of Dallas Road and Erie Street was now approved by both the officials at Ottawa, and the Dominion Air officer, and it would be leased soon as the required facilities were in place, he said.

The resolution of the industrial committee was endorsed by an unanimous council reads as follows: "That this committee be authorized to call for tenders for the construction of facilities for a seaplane base in the Inner Harbor, on the basis of a lease of the site for a period of years, in return for construction and supply of facilities and equipment required, and also to draw up regulations for the operation of the same, in accordance with the plan prepared by the R.C.A.F. and the Civil Aviation branch of the Air Department, Ottawa."

TENDERS CALLED

The council endorsed the resolution forthwith, and tenders will be called immediately for the leasehold of the privilege, in return for the construction and operation of the facilities required.

The city plan shows a large hangar, with access to tide water by means of a ramp, or allway, and a low-lying buoyant float on which passengers would alight, and the refueling of the machines would be attended to. Inside the hangar space would be provided for customs examination, waiting room, and other conveniences for the use of the facility by visiting airmen and their passengers.

The plans were described as "an excellent layout" by the Ottawa authorities, said Alderman Straith in conclusion.

LT.-GOVERNOR VISITS SHOPS

Work of Disabled Veterans Is Praised By Gubernatorial Party

Hon. R. Randolph Bruce, Lieutenant-Governor, and Miss Mackenzie, paid a visit to the Red Cross Workshop yesterday afternoon, and renewed acquaintance with the disabled veterans working there. Much interest was taken in the manufacture of wreaths and poppies, and His Honor placed orders for several wreaths to be sent to different parts of the Province.

Lieut.-Gen. Sir Percy Lake, K.C.B., K.C.M.G., J. Cashmore, works manager, and H. W. Hart, honorary organizer of the Red Cross Workshop, were in attendance during the visit. Subsequently, the Lieut.-Governor sent the following letter to Sir Percy Lake:

"Dear Sir:—In response to your request for a message, may I say, after visiting the Red Cross Workshop, that it is a most inspiring sight to see the disabled men overcoming their grievous infirmities and performing useful tasks. I find that the motto of the shops in the service command—'Carry on'—that they are still animated by the same spirit of endeavor and courage which has permitted them to triumph over all disabilities and enabled them to develop the great skill and efficiency in the many beautiful varieties of articles they are producing.

"The wreaths and poppies, which are now made in the Victoria shop for the whole of British Columbia, are beautiful examples of skilful work. And it is particularly pleasing to know that they afford employment for men who, by reason of their disabilities, are unfitted for other duties.

"The Armistice Period Committee is performing a valuable work in undertaking the sale of these poppies, and their decision to place them at the disposal of school children, who are unable to contribute, shows a true appreciation of the sacredness of Armistice observance.

"I am glad to learn that the wreaths to be deposited at the Cenotaph on Monday, November 11, will, on the following day, be placed on soldiers' graves in Ross Bay and Royal Oak cemeteries, thus affording the families of sailors and soldiers who rest in foreign soil, an opportunity to honor the memory of their dear ones and, through them, place symbols of remembrance on the graves of other heroes in Canada.

"Armistice is a period of remembrance. I am glad to hear the committee have adopted the commendable course of arranging for Sunday, November 3, to be observed as Preparation Day in places of worship, by preparation the people will be made ready for the solemn observance of

Empire Health Week

Co-operating with the Royal Sanitary Institute of London, England, Thomas Landreth, City Sanitary Inspector, issued the following statement to-day:

Two important factors in connection with health which we cannot afford to ignore are rats and flies. Both these agencies are the cause of much sickness and discomfort.

Let us minimize this danger to health as far as possible by having our basements light and well ventilated and kept free from rubbish. Clear out and burn the rubbish in those outbuildings on the lot, and if the buildings themselves are dilapidated and diseased pull them down. They harbor rats and other vermin.

Rats will not stay around a place unless they can get food. See that rats do not have access to your foodstuffs.

There is no better way of getting rid of waste foodstuffs than by burning. Keep the cover on your garbage can.

Flies are bred in filth and travel considerable distances. They contaminate your food. See that there is nothing around your premises to encourage them.

Fly screens to doors and windows are a good investment in season. The storekeeper selling foodstuffs who has adopted methods to prevent the contamination of his goods from flies, dirt, dust and vermin, is a benefactor and should be encouraged by receiving your patronage.

Armistice at the services which will be held on the following Sunday—November 10, and Monday, November 11: "Miss Mackenzie joins me in admiration of the splendid spirit shown by the disabled men in the Red Cross Shop, and we trust the appeal to the citizens, to support the Armistice and Poppy Day observances, will meet with a widespread and generous response from the many who, by concerted action, can do much to help those who helped us during the dark days of war."

"Yours faithfully,
"R. RANDOLPH BRUCE"

REVOLUTIONARY... in its new and advanced type of beauty, its extreme comfort and roominess, its velvet-smooth performance... its speed of 80 miles an hour... and in its sensational low price... \$2140

Presenting the new 100 h.p. HUPMOBILE EIGHT

Again Hupmobile has produced an original motor car. And in every respect—beauty, comfort, control, performance—it advances all standards by which motor cars have been judged... Today, at Hupmobile salesrooms, this new 1930 Hupmobile Eight is on display. See it... ride in it... drive it... as soon as you can do so. By no flight of imagination can you anticipate the thrill that awaits you. Your Hupmobile dealer invites you.

HIGHLIGHTS OF THE NEW 1930 HUPMOBILE EIGHT
80 miles per hour... 100 horse-power. Acceleration from 5 to 50 miles in 16 seconds... The first motor car ever designed to present a unit of harmonized beauty. A single style motif is used throughout... Dual elimination of vibration by counterweighted crankshaft in addition to vibration damper... Oil delivered under pressure to 46 points in engine... New hydraulic shock absorbers, deep cushions, more width, greater comfort.

BODY TYPES
5 Passenger, 4-door Sedan \$2140... 4-door Town Sedan \$2245... Coupe \$2140... Convertible Cabriolet \$2245... 7 Passenger Sport Phaeton \$2215. Custom equipment for all models at slight extra cost. All prices f.o.b. Windsor, C.I.A. 208.

New Plane Good For Air, Water, Land

Three-element Test Machine a Success: British Zepps Nearly Ready

Reuter's Special to The Victoria Times

London, Oct. 12.—The forthcoming trial flights of the British craft R100 and R101 will be of unusual interest.

These vessels are said to represent the very latest in airship construction. They are intended to place Great Britain ahead of all other countries in respect of airship design and operation.

If they come up to expectation, they may almost hazard the opinion that the future of vessels of this kind is definitely assured.

One airship expert has, indeed, already expressed the conviction that within ten years from now airships of 800 tons, carrying 200 passengers and twenty tons of mail or goods to America at eighty knots, will be in existence.

Meantime, the great achievement of the German Go Zeppelin is a fact which certainly augurs well for the future.

A THREE ELEMENT AEROPLANE

One of the most remarkable British aircraft ever built made a successful trial flight this week. Described as a three element machine, it is a tiny two-seater. It can manoeuvre on ground on pneumatic-tired wheels, float on the water on a special metal pontoon fitted below its hull, and fly rapidly by a set of ordinary aeroplane wings.

The machine is a Moth, built by the De Havilland Company, and its novel amphibious gear has been designed and constructed by Messrs. Short Brothers of Rochester.

SUITABLE FOR USE OVERSEAS

Piloted by Captain Lancaster Parker, and with Eustace Short as a passenger, the machine, launched on the River Medway at Rochester, rose from the surface steadily, and flew to the Stag Lane Aerodrome, London. Just before arriving the pilot lowered wheels beneath the boat-shaped pontoon and made a perfect landing. Then he ascended again and flew to the Welsh Harp, alighting this time on the water and taking off again to fly to the Croydon Aerodrome. Here, as the machine came circling down, the wheels were again lowered, and the Moth taxied briskly across the aerodrome.

The aircraft is considered to have great possibilities for use overseas. Starting a flight from near an open stretch, its occupants could fly high over mountains, forests, and, if necessary, make a safe descent on any lake or river or road.

Dog Days Now Work Days For Civil Servants

Reuter's Special to The Victoria Times

London, Oct. 12.—It is sometimes suggested that the Civil Service does not work very hard, but the old-fashioned civil servant would have been horrified if he had been called upon to work, as his successor is now, during the dog days.

Formerly, peace descended upon Whitehall when Parliament rose. The heads of departments went placidly on holiday, feeling that nothing was going to happen during the next three months, and if anything startling did turn up, a decision was placidly deferred.

All this is now changed, and August and September mean much work for most of the government offices. The Hague Conference is keeping both the Foreign Office and the Treasury busy, while the trouble in the cotton trade, and other industrial problems have involved heavy days for the ministry of Labor, and Premier Ramsey MacDonald's conversations with General Dawes have their relations on the Admiralty.

The Air Ministry has been humming with excitement over the Schneider Cup, and the most peaceful ministry seems for the moment to be the Home Office.

The League of Nations' meeting this month adds to the labor of the Foreign Office, and high officials are finding it difficult to take their summer leave. The Hague Conference was especially troublesome, although it ended victoriously for Britain, thanks to the Hon. Philip Snowden.

Here's How "Sundae" Got Its Name

Reuter's Special to The Victoria Times

London, Oct. 12.—How many lovers of that popular ice cream, the "Sundae," are aware that it owes its name and origin to an accident?

This occurred in a drug store in America on a Sunday evening many years ago. An assistant who was preparing an ice-cream soda drink consisting of ice cream, syrup and soda water, after placing the first two ingredients in a glass discovered that the soda water pipe had burst. As it happened, the customer who had ordered it decided to sample the contents of the glass, and was so delighted that he called for more. He afterwards recommended the concoction to his friends and fellow townsmen, who referred to it as the "ice that Mr. Dagb had on Sunday."

Hence its name and later its fame.

The circumference of the index finger of the Statue of Liberty at the second joint is three feet six inches.

For Evening Wear

Delightful

New Dance Frocks

To array yourself in one of these newest style Dance Frocks is to put yourself into the mood for dancing—they are so suggestive of lightness, brightness and "joie de vivre," with the sparkling bit of metal cloth so cunningly introduced into the dainty satin taffeta, soft velvet satin or filmy net.

The sleeveless bodices and bouffant skirts are becomingly feminine and the newest pastel shades seem just right for girlish types.

By the way, the new hem lines are circular and uneven—sometimes transparent and scalloped. Sizes \$15.95 for misses and women. Priced at... \$15.95

A fine assortment of other Evening Frocks, shown in net, moire, georgette, transparent and moire velvet in bright and pastel shades; also in black. Prices, \$25.00 to \$45.00 and up
—Second Floor, HBC

NEWS IN BRIEF

Knocked down by a motorcycle yesterday afternoon, On a Chinaman, suffered minor injuries.

The cause of the fire has not been ascertained.

S. Osborne, 2349 Graham Street, was slightly cut on the head yesterday in a collision at the corner of Hillside and Quadra Streets.

Data relating to the Rhodes Scholarship for British Columbia, may be secured from D. N. Hossie, Provincial secretary, at 626 Pender Street, West Vancouver.

Tom Moore, president of the Canadian Labor Congress, will address a meeting to be held in the Chamber of Commerce on Wednesday night at 8 o'clock. The public is invited.

The annual general meeting of the Ward One Sanitary Association will be held in the Liberal rooms, 607-609 Pender Street, on Tuesday next at 8 p.m. All Liberals of the district are invited to be present.

Fire Chief Vernon Stewart this morning announced that, following the recent rains, rubbish burning permits issued by the Fire Department will be good for ten days. For several months the department has limited permits to the day of issue.

J. Pottinger and H. Fairweather, charged before Magistrate Jay in the city police court with being intoxicated yesterday were each sentenced this morning to pay a fine of \$50, with the alternative of ten days. Both admitted previous convictions.

"Oddfellows are invited to attend the meeting of Victoria Lodge, No. 1, I.O.O.F., on Monday evening when the "Gavel of Friendship" will be presented by a delegation of members from Dominion Lodge No. 4. There will be a programme and refreshments.

The board passenger walk and fence which, since the early part of the year has enclosed the new east wing of the Empress Hotel, have been removed and placed in front of the property where the new power plant and laundry will be erected on Humboldt Street, beyond Douglas.

No. 1 Company 11th Machine Gun Battalion C.M.G. will parade at 8 p.m. Tuesday, October 15, 1929, at the Armories. A full attendance of all ranks is requested. There are still vacancies for a few recruits. Any young men desiring to learn more about the machine gun service are invited to inquire at the Orderly Room on any Tuesday, from 8 to 10 p.m.

Donald Anderson, six, son of Mr. and Mrs. Albert Anderson of 119 Bush Street, was knocked down and severely injured by a truck driven by E. Lebus yesterday afternoon, at the intersection of Fairfield Road and Moss Street. The lad was playing tag with a companion on his way home from Sir James Douglas School. Dr. E. W. Boak attended.

A protest against the city proceeding with the erection of a new grandstand at the Royal Athletic Park at the location picked out for it was filed with the City Council yesterday afternoon by R. J. Porter. Mr. Porter drew the attention of the council to the destruction of cutting through Vancouver Street from Caldecott Avenue to Balmoral Road, and for which purpose ground now to be built upon would be required. The complaint was tabled for report.

Wilfred Haddon and William Barera elected speedy trial by a judge without a jury, before Judge Lampan in County Court to-day, and were remanded for trial at 2:30 p.m. on October 14. The accused are charged with the theft of two Winchester rifles and a shotgun from Esquimalt premises. W. B. Colvin, of the Attorney-General's Department, appeared for the Crown, on the election.

The Ladies' Musical Club will give their first recital for the season at the new Shrine Auditorium on View Street on Wednesday, October 16, at 8:30 p.m. It will be a two-part recital by Myrtle Jacobson and Berthe Poney, with Alice Bogardus, soprano, as assisting artist. Old and intending members of the club are requested to send their subscriptions before the night of the recital to Mrs. F. G. Aldous, Cadboro Bay Point, treasurer of the club. Memberships will be taken on the night of the recital, however.

Twenty-four parcels with an upset price of \$1,438, were bought in by the city at the resumption of the annual sale to-day. The sale was adjourned until 10 o'clock on Monday, when it will be concluded. Upwards of \$10,400 has been realized from private bidders, offering over-ripe parcels to that amount. In the neighborhood of 100 parcels were withdrawn from the sale at the last moment, when owners redeemed the properties by paying charges outstanding. It is stated by C. E. Smith, City Treasurer.

ANNOUNCEMENT

SAILOR DENIES HE CUT EYE OF VESSEL'S COOK

Claude Creed, a member of the crew of the steamer Princess Adelaide, was this morning arraigned in the city police court on a charge of assaulting Lee Olin, chief cook of the vessel, with intent to do grievous bodily harm. The alleged assault was stated to have taken place on the C.P.R. dock yesterday morning.

The accused elected trial by Magistrate Jay and pleaded "not guilty." City Prosecutor Harrison then stated that the injured man was in hospital and produced a certificate that Lee Olin is suffering with a severe injury to the right eye.

A. R. Lowe, on behalf of the Chinaman, stated that a severe cut had been inflicted on his client, apparently by use of some instrument, as, in his opinion, such a wound could not be inflicted with the fist.

Magistrate Jay remanded the accused until next Thursday.

Premier Will Be Speaker At Gyro Luncheon

Founders' Day to Be Commemorated By Clubmen By Meeting in Empress Hotel

Rotarians to Meet in Shrine Temple; Table to Hear Comte de Suzannet

Premier S. F. Tolmie will be the speaker guest at the "Founders' Day" luncheon of the G.Y. Club in the Empress Hotel on Monday. It was announced by secretary A. Trevett to-day. Although the club usually meets in the Chamber of Commerce for their regular meeting, they have secured the Empress for this special date.

On Thursday the Rotarians will assemble at the Shrine Temple for their regular luncheon. Since this will be one of the least public functions to be held in the new hall a large number of clubmen are expected to attend and enjoy the programme which is being arranged by Walter Luney.

Comte Jean de Suzannet will address the "Founders' Day" luncheon at the Empress Hotel on Monday. The French View of the Reparation Question. Since the Comte has just returned from a nine months' tour in his homeland on this problem, he is instructed to take the subject of international interest. The address will follow the club's regular dinner in the private dining room of the Empress Hotel at 6 o'clock on Tuesday evening.

The G.Y. Club will hold its guest night for October on Tuesday at 8 o'clock in the club's rooms, 521 Bastion Street. Vivian Shoemaker of the Y.M.C.A. will address the gathering at this meeting.

Mr. Shoemaker is also scheduled to speak to members of the "Y" Men's Club the same evening at 6:30 o'clock following their supper in the Y.M.C.A.

OTTAWA FOLDER NAMES ISLAND FOR SETTLERS

Department of Interior Report Recommends Victoria and District

B.C. Capital Will Be Focus of Hangers With Aeroplane Development

Selecting the southeast of Vancouver Island as a district in Canada specially suited to settlers with moderate means, the Natural Resources Intelligence Service of the Department of Interior is circulating a fourteen-page circular throughout the Dominion and abroad.

A number of copies have also been sent to the Victoria and Island Publicity Bureau for distribution.

The island is dealt with from many angles and Victoria is referred to as a choice Pacific resort and capital of a huge province rich in resources and industry. Victoria cannot fail to grow in importance, the circular states.

ON WORLD HIGHWAY
Victoria is singled out as a city that will benefit from development in aerial transportation. "Victoria is on a world highway, and a part of call for the many famous men who travel round the world," one paragraph reads. "Besides daily steamers to Vancouver and Puget Sound ports, there are regular boats to and from San Francisco, Alaska and the Yukon, China, Japan, New Zealand and Australia and now that the seaplane and aeroplane are competing with the motor car, Victoria will be a focus of hangers."

Regarding the prospects for settlers, the article states:
"The part of Vancouver Island, most likely in its present stage of development to meet the needs of the settler with means, is not large. It is in the southeast corner, extending north to Duncan and Cowichan River, west to the Sanich Peninsula and west to embrace Colwood and Esquimalt. Eastwards it looks across the Haro Strait to the mountains of the Coast Range and southwards across the wider strait of San Juan de Fuca to the Olympian range of Washington state, U.S.A."

OVER FIVE MILLION IN LAND DEALS

Sales and Transfers of Victoria Property Total \$5,370,350 to Date

Construction Programme Has Grown to \$3,568,784 in Same Period

Sales and transfers of property within the city from January 1 to October 7 amount to \$5,370,350, according to title changes recorded during the period, it was stated by George Okeil, city assessor, to-day.

This is the highest volume of trading in land within the city recorded in any year since pre-war days. Building permits for the period of January 1 to October 11 saw \$3,568,784 as the value of new construction placed under way.

The sale of two important downtown locations is recorded this month. The northwest corner of Douglas and Fort Streets, formerly owned by the S. S. Kresge Company Limited of Montreal, Que., an internationally known chain store. The property was declared as value at \$20,000.

Another corner was sold by a group of five Victoria business men to another Victorian, in which property at the northwest corner of Blanshard Street and Fort Street, 60 by 112 feet in extent, passes for \$20,000. The property was purchased by the syndicate less than a year ago, and represents a tidy profit on the resale.

In September, \$377,760 was declared value of property changing hands in one of the quietest months of the year. For the first seven days in October, \$367,410 worth of property passed to new ownership, bringing the total for the year to date to \$5,370,350.

Building construction has kept pace with the brisk turnover in land, 568 permits for a declared value of \$3,568,784 being taken out since the first of the year. It is stated by James Barr, city building inspector. The building figures are admittedly conservative, as few contracts overestimate the ultimate cost of construction, and a tendency to under estimate the figures is a problem facing city building officials most of the time.

New construction for the first ten days of this month included twenty-four permits for a declared value of \$77,487. At \$2,856.78 to date, city building figures have almost doubled the record for the whole of last year, itself a peak year in post-war construction.

J. Fyfe-Wilson Is President Of Radio Club

J. Fyfe-Wilson was last night elected president of the Victoria Radio Club at the annual meeting, held at the Dallas Road clubrooms. Other officers unanimously named were: Honorary president, Harold Grant; vice-president, J. Frampton; secretary, E. Hawkins; treasurer, W. T. McElbourn; directors, K. M. Chadwick, F. Holmes and F. Paget.

A financial report showed a substantial balance and votes of thanks were tendered the secretary and treasurer.

The Radio Club will urge the Federal Government to take speedy action on the Radio Commission's report and will interview D. B. Plunkett, M.P., on the same matter. The executive was authorized to offer its aid and co-operation to newly-formed short-wave radio club.

Tenders for ten police overcoats and thirty-five pairs of uniform trousers will be called by the City Council at the request of the City Police Commission.

OBITUARY

Funeral services were held this morning at 10:30 o'clock at the B.C. Funeral Chapel for the late Alfred Oliver Shepherd. Rev. H. P. S. Luttrell officiated at the chapel and graveside, the hymns sung being "Lead, Kindly Light" and "Jesus, Lover of My Soul." Many floral tributes were received. The pallbearers were: A. Shepherd, G. Shepherd, Davidson and G. Francis. Interment was made in the Royal Oak Burial Park.

The funeral of the late Mrs. Sarah LaRue Galbraith, who passed away at St. Joseph's Hospital on October 8, was held yesterday afternoon from the Sands Funeral Chapel, service being held at Holy Trinity Church, Patricia Bay, by Rev. T. M. Hughes. Relatives and many friends attended the service and the beautiful flowers covered the casket. Mrs. James Copithorne presided at the organ and the hymns sung were "Lead, Kindly Light" and "Nearer, My God, to Thee." The pallbearers were G. Clark, R. H. Chippell, B. Meara, C. Moses, H. W. Duffin and A. S. Copithorne. Interment took place at Holy Trinity Churchyard, Patricia Bay.

The funeral of the late Mrs. Sarah LaRue Galbraith, who passed away at St. Joseph's Hospital on October 8, was held yesterday afternoon from the Sands Funeral Chapel, service being held at Holy Trinity Church, Patricia Bay, by Rev. T. M. Hughes. Relatives and many friends attended the service and the beautiful flowers covered the casket. Mrs. James Copithorne presided at the organ and the hymns sung were "Lead, Kindly Light" and "Nearer, My God, to Thee." The pallbearers were G. Clark, R. H. Chippell, B. Meara, C. Moses, H. W. Duffin and A. S. Copithorne. Interment took place at Holy Trinity Churchyard, Patricia Bay.

An invitation to address the Redwood Empire Association and nine affiliated units at a convention in San Francisco this month has been extended to George I. Warren, publicity commissioner.

The convention will be held October 16, 17 and 18 and the main feature will be the Pacific Coast International banquet, at which consideration will be given to the development of a greater volume of travel with longer stop-overs throughout the Pacific.

County board supervisors and commissioners, city councillors, Chamber of Commerce presidents, managers and directors of organizations in fifty-eight communities, bankers, service club representatives, hotel resorts, auto camps, garage and service station operators and leaders and executives from all lines of enterprise will be represented.

DR. RALPH MAGEE WILL PREACH AT FAIRFIELD

Popular Seattle Preacher Will Occupy Fairfield United Pulpit at Both Services Tomorrow; Will Discuss "White Man's Problem" at Annual Church Supper on Monday Night.

The official board of Fairfield United Church has been particularly fortunate in securing Rev. Dr. Ralph Magee of Seattle as preacher for to-morrow's services. Dr. Magee is a fearless and forceful speaker, and is well known on the Pacific Coast. Many admirers who have heard him on the radio will want to hear him in person.

Dr. Magee's theme at the morning service at 11 o'clock will be "A Divine Example." As a preacher, Dr. Magee is a powerful speaker, and is well known on the Pacific Coast. Many admirers who have heard him on the radio will want to hear him in person.

The evening subject selected by Dr. Magee will be "An Evolution of Prayer." Dr. Magee is a powerful speaker, and is well known on the Pacific Coast. Many admirers who have heard him on the radio will want to hear him in person.

REV. DR. RALPH MAGEE, pastor of the Methodist Episcopal Church of Seattle, famed as orator, will preach at Fairfield United Church.

ST. ANDREW'S TO HEAR MISSION'S WORK EXPLAINED

Rev. G. M. Dunn of Toronto to Discuss Work of Presbyterian Church

To-morrow morning St. Andrew's Presbyterian Church will hear Rev. G. M. Dunn, the newly appointed secretary of the board of administration of the Presbyterian Church in Canada, and formerly minister of the Bascom Church in the city of Toronto.

Mr. Dunn is charged particularly with the duty of presenting to congregations the latest information concerning the work of the Presbyterian Church at home and abroad, and ways and means of financing that work. In the evening Rev. H. P. S. Lettrell will preach on "The Religious Athenians," Acts xvii 22.

On Monday evening at 7.45, there will be a series of sessions of St. Andrew's School of Missions for the study of missions in theory and practice. There will be two meetings each week for three weeks, on Monday and Wednesday evenings. After the opening devotion, there will be group study classes until a quarter to nine, which will discuss Prof. J. F. McFadyen's "The Missionary Idea in Life and Religion." The group will then assemble to hear an address on some phase of missionary work.

Rev. G. M. Dunn of Toronto will be the speaker on Monday next, and on Wednesday evening E. G. Marriot will give an address on "My Observations in India." These meetings will have nothing of the denominational about them, and not only St. Andrew's people, but friends from all the churches are cordially invited.

OAK BAY WOMEN THANK OFFERING TUESDAY NIGHT

United Church Will Hear Address By Returning Missionary

Sermon topics at Oak Bay United Church to-morrow will be: Morning—"To Sense the Uselessness of So Many Things." Evening—"To Raise the Spiritual Temperature of Our Churches."

The choir will sing in the morning, "Lord, For Thy Tender Mercies," and Mrs. C. E. McNeill will contribute a solo, theme selected. At the evening service the anthem will be "The Sun Shall Be No More," by Woodward.

Monday night there will be a literary evening for the young people. Miss Jessie Ferguson will read a paper on "The Writings of Hugh Walpole."

The Women's Missionary Society announces its thankoffering service for Tuesday at 7.45 in the basement auditorium. One of the returning missionaries to China, sailing from Victoria on Thursday, will address the meeting. It will be an open house and many friends of this work outside the society will be interested.

The adult mid-week service on Wednesday will provide for spiritual song, a devotion, a short fellowship in prayer, with the discussion study in the Life of Jesus. "Some Scenes From the Earlier Ministry in Galilee." The Men's Club has reorganized for the autumn and winter. J. B. Cleary has been elected president following Capt. F. R. Wright. T. F. Oliver is vice-president and J. H. Elliott retains the secretaryship. An additional executive of the leading laymen of the church present at the meeting was also appointed. Among the earlier features proposed are a congressional club and an evening with Fairfield Club as guests.

STORY EVENING AT CENTENNIAL

Rev. G. Pringle to Relate West Coast Experience of Human Interest

The subject of the morning sermon to-morrow at Centennial Church will be "The Central Figure of Our Faith." The text will be taken from Amos v 5, 6, "Seek not Bethel, nor enter into Gilgal, and pass not to Beersheba. Seek the Lord and ye shall live." The evening service will be a "Story Night," when Rev. Mr. Pringle will relate an experience of deep human interest he had while in charge of the mission-house "Sky Pilot," patrolling the West Coast. The story will take the place of the usual sermon and will be entitled "The Rescue of the Lees." The choir will render "Like as a Father," "Vance" in the morning, and "Lead, Kindly Light" (Pugh-Evans) in the evening.

A special feature of the evening service will be the solo, "Tell Me the Stories of Jesus" (Parker) sung by Frank L. Tupman.

SYNOD TO MEET IN ROYAL CITY

Vancouver, Oct. 12.—The Presbyterian Synod of British Columbia, which has been meeting since Thursday in Mount Pleasant Church, decided before closing to meet next year in St. Andrew's Church, New Westminster.

A report on "Welfare of Youth" was presented by Rev. Wm. Patterson of Point Grey, who stated there was an increase in all departments of young people's work. Several recommendations were adopted.

The report on "Church Life and Work" made by Thomas Humphries of Victoria, deplored the spirit of indifference to the church and its work. Regret was expressed by Mr. Humphries that the Bible was excluded from the public schools and at the lack of home life, with the consequent absence of proper training of the young. It was the opinion of the synod that juvenile crime would soon show a marked decrease if young people were properly instructed in regard to their duty to God and man, and due recognition given to the value of the church in any community.

Rev. G. M. Dunn of Toronto gave an inspiring and informing address on the work of the Presbyterian Church in Canada, and to-morrow will speak in four of the Presbyterian churches of Victoria.

Many Attended Rally Thursday

Miss Bona Mills of Toronto, of the United Church Board on Religious Education, addressed the Young People's Rally Thursday evening in the Metropolitan United Sunday school room.

The gathering consisted of young people's societies from the city and district, including large groups from Sidney and South Saanich, together with C.G.I.T. girls and tuxis boys and their leaders, and numbered over 200.

Organization and program material groups reported good progress, the delegates having gone into their deliberations very seriously. The C.G.I.T. with their secretary, Miss Fountain, and the Tuxis, under Mr. Fidler, boys' secretary, turned in reports which showed constructive work. The group in Christian Fellowship, led by Miss Hill, was well attended.

The closing service, conducted by the Mills, was inspiring and of interest to everyone present. After the refreshment it was kindly given by the Metropolitan Young People's society.

POLICEMAN'S VIEW OF GOSPEL TO BE OFFERED

Rev. W. J. Sipprell, D.D., Will Discuss Rockefeller, Man and Magnate

Rev. Dr. Sipprell of Metropolitan Church, will tell to-morrow evening what a policeman considers the gospel to be. It will be of interest to the policemen of this city.

Preceding this sermon will be a brief talk on "Rockefeller, the Man and the Magnate." Congregational singing will also be a special feature of the evening service.

At 11 a.m. Rev. Dr. Sipprell will speak on "The World's Need—The Church's Opportunity." This brief study will consider the age in which we live and what the church can do to meet it.

After the morning service the Sacrament of the Lord's Supper will be dispensed.

Soloists to-morrow will be Miss Dorothy Parsons and Mrs. Arthur Dowell.

At 3 p.m. in the Sunday school session Rev. Dr. Sipprell will offer to the Bible class the third study on "Jesus and Life."

FAREWELL MISSIONARIES

On Wednesday evening at 8 o'clock the united churches of the city will hold a union meeting in Metropolitan Church to bid farewell to several missionaries who sail on Thursday for the Orient. They are Rev. and Mrs. Grace, Rev. and Mrs. Kitchener, Rev. and Mrs. Thompson, Miss Clearburn and Miss Hodge. There will also be present Dr. and Mrs. Murdoch McKenzie, who are paying a visit to the mission fields in the Orient.

TO HEAR MODERATOR

On Tuesday evening, October 22, a large gathering of men will meet for a study at 6.30 in Metropolitan Church to listen to Rev. Dr. W. T. Gunn, moderator of the United

Many Missionaries Leaving to Labor in Eastern Lands

Eighty-four Men and Women Recently Sent by United Church of Canada to China, Japan, India and Other Fields; Women's Missionary Society Supports Thirty-three Women Workers.

Vancouver, Oct. 12.—With every sailing of the great Pacific liners to the Orient this autumn, the United Church of Canada is being more deeply committed to the enterprise of foreign missions. Fifty-one representatives of the Board of Foreign Missions and thirty-three under the auspices of the Women's Missionary Society make up the grand total of eighty-four missionaries proceeding to their fields in Asia, Africa and the West Indies under United Church support.

On her last departure for the Orient the R.M.S. Empress of Asia carried nine more missionaries bound for China under auspices of the United Church Board of Foreign Missions. They are Rev. and Mrs. Fred J. Reed, Woodville, Ontario; Rev. and Mrs. A. Walker, Duncannon, Ontario; Mr. and Mrs. Howard J. Veale, Omeene, Ontario; and Miss J. K. McIntosh, Brantford, Ontario, all returning to the West China Mission. Mrs. J. H. Bruce, Lanark, Ontario, returning to Honan Mission, and Mr. and Mrs. A. Stewart Allen, going out for the first time under appointment to West China to fill one of the vacancies created by retirements of medical missionaries. Dr. Allen is from Nelson, B.C., and Mrs. Allen from Montreal, P.Q.

Booked to sail on the Empress of Canada on October 17, Rev. and Mrs. J. Kitchen, Oshawa, Ont., and Rev. and Mrs. A. J. Bruce, Toronto, are returning to West China, and Rev. and Mrs. Andrew Thomson, Owen Sound, to Honan, accompanying the veteran, Dr. Murdoch Mackenzie, one of the founders of the mission, and his wife, of Toronto.

On the same boat go Miss Florence Clearburn, Central India Mission, and Misses Bertha Hodge and Margaret A. Mitchell, Honan Mission. Miss Eleanor Graham, Roland, Manitoba, another W.M.S. worker, sails on November 2 for West China aboard the Empress of Russia.

On November 2, Rev. Dr. and Mrs. G. W. Sparling of St. Mary's, Ontario, sail on the Empress of Russia for Shanghai to rejoin the West China Mission. They will accompany Rev. J. H. Arnp, D.D., secretary of foreign missions, on the river journey 2,000 miles inland to Chungking.

Prior to the party which left on the Empress of Asia, thirteen missionaries had set out for West China, and sailings for that field this fall of foreign board workers will total twenty-eight men and women, a number sufficient to increase the working force at the stations there by forty per cent, although this will still be far below normal strength in personnel.

CAN BEGIN AT ONCE
Five sailings for Honan, and departure of Dr. and Mrs. W. B. McClellan for the South China Mission, make a total of thirty-four foreign board missionaries taking up work in China this year. Only three of these are new appointments, the thirty-one workers being experienced missionaries.

WILL PRESENT CHURCH TASKS
Canon Chadwick to Discuss Church Unity at St. John's To-morrow

Canon F. A. P. Chadwick will preach at both services in St. John's Church to-morrow. At the morning service his sermon-subject will be "The Power of Hope," in which he will give a brief story of what Christian hope has done, through the centuries, to save and civilize the human race.

In the evening the rector will commence a short series of sermons on the "Tasks and Problems of the Anglican Church," the subject for this Sunday being "The South India proposals for Unity."

The services at St. John's will consist of Holy Communion at 8 o'clock, morning prayer at 11 and evensong at 7.30 p.m.

G. J. Burnett will render an organ recital before the evening service, commencing at 7.10 o'clock.

The Sunday school will assemble at 2.30 o'clock and the Anglican Young People's Bible Class will meet in the church vestry at the same hour. It is planned to form a special "teen-boys" class with mid-week "club" activities in the immediate future, and all eligible boys are requested to be present to-morrow.

"Adjusting Your Habits" to Be Barton's Topic

Dr. A. F. Barton will speak at both services at St. George's, the Anglican Temple on Sunday. At 11 a.m. he will take for his theme "The Sinner," and in the evening at 7.30 o'clock he will speak on "Adjusting Your Habits."

Dr. Barton will give another health lecture on Wednesday evening at 8 o'clock when he will speak on "Millions Now Living Are Dead Already." The social committee announce that a dance will be held on Monday at 8.30 in the Sons of England Hall, Broad Street, with Holt's orchestra supplying the music and Doug. Fletcher acting as M.C.

SPIRITUALISTS TO HEAR OPINION OF BRITISH EXPERT

"The Aim of Spiritualism" will be discussed to-morrow evening in the First Spiritual Church, Harmony Hall, by Mrs. Flora F. Frampton of England, who has had over twenty years' experience in the Old Land.

ORDAINING CATHOLIC PRIESTS IN MEXICO

Mexican Catholics are fast re-establishing their church in that country since the recent settlement of the conflict between the church and the government, as these pictures show. They present two views of a colorful ceremony at which Archbishop Pascual Diaz, head of the Catholic Church in Mexico, is making priests of graduates of a theological seminary whose education was interrupted by the religious controversy.

ST. PAUL'S PLANS BIG RALLY DAY

Esquimaux Garrison Church Organizing Sunday School Celebration

The fruit, flowers and vegetables brought to the St. Paul's Garrison Church for the harvest thanksgiving services last Sunday has been suitably distributed.

Confirmation classes are commencing, with separate groups for boys, girls and adults.

Services will be at the usual hours to-morrow.

Preparations are afoot for a rally day for all past and present members of the Sunday school, to be held on Sunday, October 20.

Psychology of Love Is Unity Centre Theme

At Unity Centre to-morrow morning Mrs. Gordon Grant will continue the series of talks on prosperity, her subject being "Divine Substance." The sermonette will be "The Building of Individual Temples." The children will follow with their song of praise.

In the evening, at 7.30 o'clock, Mrs. Grant will discuss "The Psychology of Love."

WILL TELL OF EARLY YEARS

Rev. C. M. Tate to Lecture at James Bay United Church To-morrow Evening

A very interesting service will be held to-morrow evening at James Bay United Church, when Rev. C. M. Tate will give an illustrated account of "Fifty Years of Life and Work in British Columbia."

Mr. Tate is one of the pioneer missionaries of the Methodist Church (now the United Church) among the Indians of this province. He is this year celebrating the jubilee of his ordination and also of his wedding.

Mr. and Mrs. Tate have had a very colorful history and have a most fascinating story to tell, which will be made even more thrilling by reason of the fifty pictures he will show.

The service will be conducted by the minister, Rev. Thos. Keyworth, who will also conduct the morning service and preach to-morrow week.

A congregational meeting will be held on Monday evening, when an important programme will be presented, and discussion of a public meeting of the church will be discussed, and a full membership attendance is sought.

The W.M.S. Auxiliary will meet on Thursday afternoon, at 2 o'clock, at the home of Dr. Helen Ryan, 651 Battery Street, when Mrs. Carnochan will be the principal speaker.

"Joy of Living" At New Thought

"The Joy of Living" will be the topic of Evelyn Davis to-morrow at the New Thought Temple, 7201, Fort Street. The questions that will be discussed in the evening of a public meeting, knowledge is most helpful in building a foundation in truth, "Is mind God?" and "Is matter real?"

On Wednesday evening Mrs. Davis will continue her talks on the psychology of success.

"Bible Testimony to Theosophical Truth" will be the subject of an address and discussion at a public meeting of the Victoria Independent Theosophical Society, to be held on Monday evening, at 8 o'clock, in the rooms of the society, Jones Building, Fort Street.

THE GRAPHIC BIBLE

By LEWIS BROWNE
Author of "This Believing World" and "Stranger Than Fiction"

XV.—The Phoenicians Are Called In

One of Solomon's first projects was the building of a series of fortresses to protect the frontiers. But Solomon's far more splendid and expensive project was the beautifying of Jerusalem in the centre of the land. Here alone he wanted to erect a magnificent palace and temple to show the world how vast was his power and how deep his devotion to Jehovah. But no Israelite was capable of planning and erecting such structures, for none had seen any great palaces or temples. So Solomon had to call on his neighbors, the Phoenicians, for help.

Phoenicia lay to the northwest of Palestine between the Lebanon Mountains and the Great Sea. It was a narrow strip of coastland—no narrow, indeed, that its inhabitants were almost forced to take to the sea to find any room in which to move about. Fortunately for them, their coast was not unbroken in Palestine. On the contrary, their coastline was heavily indented and possessed many fine natural harbors. Therefore the Phoenicians could do what was quite impossible for the people dwelling to the south of them: they could become seafarers.

The Phoenicians had never once tried to invade the Hebrew kingdom, probably because they had never felt the need to spread inland. They had all the seven seas to roam. They were the great traders of the ancient world, and their galleys were to be seen in the ports of the furthest empires. Also they were the most noted industrial people of the time, and their dyed-purple, jewelry, silk, and glassware were to be found in all the great cities of the world.

It was natural, therefore, that Solomon should call on these neighbors for help. The Phoenicians knew all about architecture and interior decorating, for they had seen the palaces of all the great potentates of the world. More than that, they could also provide fine building material, for the forests of their Lebanon Mountains were thick with tall cedars. And the Phoenicians were delighted to dispose of both their knowledge and timber for a price. So Solomon struck a bargain with Hiram, who was king of Tyre, one of Phoenicia's chief cities, and forthwith the building operations in Jerusalem began.

The site Solomon chose for his palace and Temple was the hill rising to the north of the stronghold now called David's City. Mt. Moriah this hill was named in later years.

Apparently the palace was the more magnificent structure, for it took thirteen years to build, whereas the Temple required only seven and a half. The sanctuary itself was but a very small building, 60 cubits long and 20 cubits wide—that is, about 90 feet by 30 feet. The royal residence was considerably larger. Its assembly hall alone, built of huge cedar logs, was actually 150 feet by 75 feet in size.

Of course, compared with those in Babylonia and Egypt, even this palace was a small structure. But small as it may have been, it was tremendously costly to erect. It required 30,000 Israelites to fell the timber in the Lebanon forests, and 80,000 state slaves to quarry and shape the stones. The logs were floated down the coast in rafts, picked up at Joppa, and then trundled up the hills to Jerusalem. The stones were transported on the backs of 70,000 slaves. The Phoenicians supervised the whole work, exacting as their pay an annual tribute of 80,000 bushels of wheat and 180,000 gallons of the finest olive oil.

Fortunately for Solomon, he was a brilliant organizer, and this alone made it possible for him to draw out of his little kingdom the great wealth he needed. Disregarding the old tribal divisions he substituted twelve federal districts, each with a governor in charge. These governors had to collect the produce for the Phoenician hirelings and also for Solomon and his court. The Bible tells us that each day the provisions for the royal court alone consisted of 380 bushels of fine flour, 600 bushels of meal, 30 oxen, 100 sheep, and an odd assortment of gazelles, roebucks, harts, and fat fowl.

So much provender was needed because Solomon had a large family to feed. Not merely was there his standing army, his corps of servants, his counselors and secretaries to care for, but in addition he had his harem of a thousand wives and concubines. This, too, must be realized, was more for show than comfort, for in those

HOLY CITY TO BE DISCUSSED

Rev. J. S. Patterson Will Preach To-morrow Morning

In St. Paul's Presbyterian Church, Henry Street, Victoria, West, Rev. J. S. Patterson will preach to-morrow by special request on the "Holy City." There will be special music appropriate to the theme.

In the evening at 7.30, the address will be given by a great Toronto preacher, Rev. G. M. Dunn, field secretary of the administrative board of the Presbyterian Church, who will give an inspiring message.

COMMUNION AT FIRST UNITED

Quarterly Observance of Lord's Supper to Be Held To-morrow

The quarterly observance of communion will be held to-morrow at First United Church at the morning and evening services. Rev. Bruce Gray will preach in the morning on "The Ascended Life," and Dr. J. K. Unsworth will take the evening service, when his subject will be "The Possible."

This congregation is anticipating with considerable interest the coming next Sunday, October 20, of Dr. R. B. Cochran, until recently minister of St. Augustine Church, Winnipeg, and now secretary of the national Home Mission Board of the United Church of Canada, who will preach at the morning service.

Large numbers of young people are attending the weekly gatherings every Monday evening and also the Sunday services.

The choir will render the following music to-morrow:

Morning: Anthem, "They That Work" (Sterndale); evening: Ladies' chorus, "Saviour to Thy Dear Name" (Llewellyn); anthem, "Rock of Ages" (Dudley Buck); soloist, Mrs. R. M. Higgins.

Offers Answer To Vital Query

Rev. Henry Knox will conduct both services in Emmanuel Baptist Church to-morrow. Continuing the series of sermons on adventures, at the morning service of worship, Rev. Knox will preach on "Adventures in Disbelief."

The choir will render the anthem, "Rejoice To-day" (Spinnery). At the evening service the sermon will be based on a question which is vital to everyone. The manner in which others have answered the question will be considered. The anthem, "Prevent Us, O Lord" (Adams) will be sung by the choir.

Sunday School will meet at 9.45 o'clock, as usual, but beginning to-morrow the primary department will meet in a newly-equipped room at 11 o'clock. The session will thus be held during the hour of the morning church service.

To Point Way Through Dark Towards God

Rev. James Strachan will preach morning and evening to-morrow at the First Baptist Church. His sermon-subject will be "The Birth of a Nation." Master W. Inglis will sing "The Night of Bethlehem." This service is at 11 o'clock, and is followed by the church school at 12 o'clock.

In the evening certain aspects of mankind's struggle after light and understanding concerning the things of religion will be discussed. Mr. Strachan will attempt to show that the spiritual life is a matter of progressive development, and that knowledge comes from more and more. The subject will be "Through the Darkness to God."

Miss H. Barr and Stanley Honeychurch will sing "Beyond the Dawn." The choir will sing Williams' "Only Waiting." This service begins at 7.30 o'clock.

The young people of the church gather each Monday evening at 8 o'clock in the church parlor. The mid-week meeting of the church is held on Wednesday evening at the same time and place. This week there will be a business meeting of the church.

Thanksgiving At St. Saviour's

Harvest thanksgiving services will be held to-morrow in St. Saviour's Church. There will be a celebration of Holy Communion at 8 o'clock, children's service at 10, matins at 11, and evensong at 7.30 o'clock. Rev. Robert Connell will preach at the evening service.

In connection with the thanksgiving services a harvest supper will be held on Tuesday, October 15, at 6 o'clock, to be followed by a concert.

TO PREACH ON GIVING TO GOD

The pastor's theme at Wilkinson Road to-morrow morning, and at Garden City in the afternoon, will be "Giving Ourselves 'First to the Lord'" (II Cor. viii. 5). The moderate message will be read to the congregation. The evening subject at Wilkinson Road will be "That Our Eyes Might Be Opened" (Matt. xx. 23). The pastor will lead the discussion in the Young People's Club to-morrow evening at 6.30 o'clock on "What God Does It Do to Prey?" from "How Jesus Met Life's Questions."

The Mission Circle will meet to-morrow at 2.30 o'clock at the paragona. There will be a special speaker.

"My Health is Completely Restored"

Read of this Canadian's unbounded gratitude to Kruschen Salts

First letter—written 1925:—
"I am 63 years old, and three months ago thought I was dying. After having experienced with all possible remedies without feeling any better, I had given up all hope of recovery when I happened to read your advertisement of Kruschen Salts. I tried one bottle of these Salts, and to my great surprise, soon realized that a new lease of life was waiting for me. Now, after having used the third bottle, my health is completely restored. I can take walks for one hour and a half without being tired, and feel as alert as if I were 30 years of age."

"My gratitude for the Kruschen Salts is unlimited, and that is the reason why I spontaneously want to thank you most sincerely."
July 28, 1925. A.P.B., Montreal.

Kruschen Salts

Three Years later he writes:—
"Since I wrote to you three years ago about Kruschen Salts I have not been sick one minute. I am now 66 years old and I feel as young as I was at 30, thanks to the little dose of Kruschen that I take every morning in my coffee. I would not be without it for all the gold in the world."
June 25, 1928. A.P.B., Montreal.
Original letter on file for inspection.

Kruschen is a perfect blend of those all natural salts which are vital to your body well-being. The analysis is on the bottle. There are sodium and magnesium to clear away the waste matter that clogs your system and poisons your blood. To free your tissues, thereby the tonic potassium. The daily dose of Kruschen will keep you in constant good health. Buy a bottle today and start a new life to-morrow.

At Drug and Dept. Stores at 75c a bottle. Manufactured by E. Griffiths Hughes, Ltd., Manchester, England (Estab. 1716). Importers: McMillan Bros., Ltd., Toronto.

WILL TELL OF WINNIPEG MEET

Salvation Army Congress Addressed By General Higgins, to Be Reviewed

The meetings to-morrow at the Salvation Army Citadel, Broad Street, will be led by Adjutant Merrett, who returned this week from Winnipeg, where he attended the great gathering of officers from all over Western Canada, presided over by General and Mrs. Higgins. A period of each meeting to-morrow will be given over for a short talk by the Adjutant on "Glimpses of the Congress."

There will be a holiness meeting at 11 a.m., praise meeting at 3.15 p.m., and Salvation meeting at 7.15 p.m. Sunday school is held in the citadel at 2 p.m., and new scholars are always welcome.

TEMPLE PASTOR TO TELL PERILS OF PATRIOTISM

Rev. Clem Davies Will Give Fifth of "World Peace" Addresses To-morrow Evening

"The Perils of Patriotism" will be the fifth sermon in Dr. Clem Davies' series on "World Peace" at the Victoria City Temple to-morrow evening. The series is creating a deep impression among the members of the congregation, and the response from listeners is very great.

The well-known soloist, Mrs. Rita A. MacNeill, will sing "The Lord Is My Shepherd" at the night service, while the choir sings "Gloria" from Mozart. The morning anthem will be "Break Forth Into Joy." Dr. Davies will have for his theme at the 11 o'clock service, "Changin' the Furniture of Our Minds," in which the ethics of Jesus, in relation to the use of money in these days, will be emphasized.

PENTECOSTAL CHURCH HAS FAMILY DAY

The service in the Pentecostal Church at 11 a.m. to-morrow will be specially interesting to old and young, being "The Family Service." The pastor will give a message suitable for the occasion, and the children will feature largely in the conduct of the service. A stirring message will be delivered at 7.30 on "God's Call to the Thirsty," when the preacher will present truths for the present-day needs of the human heart.

THE PAIN OF RHEUMATISM

"Fruit-a-tives" Rid Him of Trouble of Long Standing

A sufferer from rheumatism for years, Mr. S. Floyd, Nanaimo, B.C., turned to "Fruit-a-tives". He writes: "In a short while I had relief. 'Fruit-a-tives' worked like a charm. Do you have the terrible agonizing pains of rheumatism—can't work, can't sleep, torture all the time? 'Fruit-a-tives' will give you relief just as it has helped thousands of others. No more pain for the rest of your days! Get a box to-day. Sold at all druggists. (Adv.)

HAD ECZEMA VERY BADLY

Hair Fell Out Terribly. Healed by Cuticura.

"My little girl had eczema very badly. It started in small blotches on her head and then formed scales all over her scalp. Later it spread behind her ears and formed wet, sore eruptions. Her hair fell out terribly. She was bothered about three months. I tried all kinds of remedies but the trouble kept getting worse. A friend advised Cuticura Soap and Ointment so I purchased some and after using three cakes of Cuticura Soap and five boxes of Cuticura Ointment she was healed." (Signed) Mrs. Lyman Earle, Pleasant Lake, N. S., Aug. 13, 1928. Give Cuticura Soap and Ointment the care of your skin. Soap Box, Ointment Jar and 25c. Tubes 25c. Sold everywhere. English and French. Address: Cuticura, Dept. 4, P.O. Box 1000, Boston, Mass. Cuticura Shaving Stick 25c.

Luxton

Mr. and Mrs. G. W. Betts have returned to their home after a motor trip up the Island to Courtenay, where they were the guests of their son-in-law and daughter, Mr. and Mrs. Sleser. Mr. and Mrs. Betts were accompanied by Mr. and Mrs. Thos. Atkinson of Victoria.

SHOPS CLOSING AMENDMENT IS TABLED BY CITY

Definition of Department Store Eludes City Fathers at Crucial Time

Three Leading Firms Support Measure For Early Closing

A legal and binding definition of a "department store" eluded the City Council in special meeting yesterday afternoon, and held up action on a by-law designed to close department stores, novelty shops, bazaars, and other places of business which carry five separate lines of merchandise at 6 p.m. Saturdays.

In favor of the suggested legislation were letters from the management of David Spencer Limited, the Hudson's Bay Company, Angus Campbell Limited, and a petition signed by 774 of the clerks affected.

Mayor Herbert Anscomb said the council should also have representations from any others affected, including the Metropolitan and the W. Woodworth premises.

Alderman John Worthington was opposed to any additional legislation treating restrictively with shop-keeping hours.

Other members of the council thought the department stores already conformed to the suggestion, and that the inclusion of the by-law on the city's books would bring stores whose control is outside the city into line.

Alderman E. S. Woodward and R. A. C. Dewar, the sponsors of the by-law, supported its terms, but suggested an improved definition of what premises it was desired to include under the measure.

The council reported progress on the by-law in committee, and referred the draft to the city solicitor for rewording of the interpretation of the term "department store."

The amendment to the building by-law, incorporating four feet square as the maximum size of unlicensed signs, received final passage; as did the repeal of the 30-60 ratio for the construction of sidewalks by the local improvement plan.

A by-law to acquire road allowances required on Cecilia Street, received first readings without change. "Dewar Lane" and "Harvey Lane" were suggested as possible names for the new thoroughfare that would be created, but the choice of an appellation was left for decision at a later meeting.

The council ratified the sale of city lots on the west side of San Juan Avenue, and the west side of Fifth Street, for \$375 each, to local buyers, and then passed into committee to deal with other affairs.

congratulated the members on the fine workmanship on the building. Miss Ida Meyer and Miss Sykes gave a duet, "A Little Brown Bird Singing," which was followed by a short address given by Cecil Davis, president of the Young Peoples' Council, who brought greetings from the James Bay and Metropolitan Young Peoples' Clubs.

Essays on the "Ideals of Home Life" were read by three members. Miss Bertha Snider was first prize winner with Miss Myrtle Snider and Sadie Patterson second and third respectively. A humorous recitation, "Ma's Tools," was given by Miss W. Bate, which was followed by a solo given by Miss Sykes who sang "Give

Thanks and Sing." Mr. Hood, Miss Bertha Snider, Miss Sadie Patterson and Mr. Keyworth were winners of a candy contest. Refreshments were served during which Mr. and Mrs. Keyworth delighted all with a duet. A hearty vote of thanks was tendered the speakers and artists by Messrs. A. Hofer and R. Heyer.

The South Saanich Junior Institute Club held their monthly meeting at the home of the Misses Margaret and Doris Mitchell on Tuesday evening. Miss Nellie Syman presided in the absence of Miss J. Sherring. The financial statement of the recent successful dance held by the club was given by the secretary, Miss Doris Mitchell. During the evening arrange-

ments were made for entertaining the members of the Junior Institute. The next meeting will be held at the home of Mrs. W. Bate on Thursday evening, November 14. Following the business, tea was served by the hostesses. Mr. and Mrs. A. Wright and family left for Duncan on Tuesday, where they will make their future home.

W. Dean has returned home from a hunting trip spent up the Island for several days.

James Island

The weekly bridge game was held in the Moore Club, when the prize was

won by Mrs. W. Husted, Mrs. W. H. Kenna and Mr. Pauline of Victoria. Mrs. Stoddart of Queen's Avenue, Victoria, was the guest of her sister, Mrs. W. J. Van Norman, over the week-end.

Mr. and Mrs. E. Rowa and their sons Fred and Arnold were week-end visitors to Victoria.

Mrs. Dorricott and her son of Nanaimo, who was the guest of her sister and brother-in-law, Mr. and Mrs. D. A. Lake, have returned to her home.

George and Frank Aldous, who have been visiting their parents, Mr. and Mrs. George Aldous of Qualicum, have returned to the Island.

Mr. and Mrs. A. J. Dekere had as their guests at the week-end V. McKenna and Mr. Pauline of Victoria.

Under the auspices of the Ladies Aid a bridge and five hundred card party was held Wednesday evening. There was a good attendance, and the prizes were won by: Bridge, Mrs. Nelson and Mrs. J. W. Van Norman; five hundred, Mrs. J. Lynch and Mrs. G. Goldie, T. M. Robb and E. Rowa.

CHRONIC BRONCHITIS RAZ-MAH

DEAN PREACHES AT CATHEDRAL

Meaning of Structural Features to Be Told Children

Progress Shown in Furnishing Nave; Heating Being Installed

Further improvements in the interior of the new Christ Church Cathedral have been completed this week, as the contractors have been able to proceed with the final stages of furnishing the nave. Many details remain to be attended to, and it will be several weeks before the work is finished.

Progress is also reported with the installation of the new heating equipment, which will be operated from a central heating chamber located under the Memorial Hall.

TO-MORROW'S SERVICES
Services in the cathedral to-morrow will include two celebrations of Holy Communion, at 8 a.m. and 9.30 a.m. respectively. Morning prayer and sermon at 11 o'clock, and choral evensong with sermon at 7.30 o'clock. The dean will preach at both morning and evening services.

An afternoon service for children and young people will be conducted at 2 o'clock, to which parents are invited to bring their children. The addresses at these services will be an attempt to tell "The Story of the New Cathedral," in a manner that children can understand. Various parts of the building, including the baptistry and stained glass windows, will be explained in turn. To-morrow afternoon the story of "The Robin's Pill" will be told.

JAPAN'S ENVOY WILL STRIVE TO CEMENT TIES

(Continued from page 1)

that end between the countries bordering on this ocean we must co-operate and all of these nations must be determined to do so.

"When we talk about relations between Canada and Japan we must look upon them as constituting part of the group of countries bordering on the Pacific.

"I think Canada and Japan, being the two oldest countries on the Pacific, must do their utmost to strive for a continuance of the friendliest relations that exist between them, and in order to co-operate towards that end we must know each other well and we must know each other's requirements, economic and otherwise, so that we may be able to adjust differences and to those requirements, if necessary."

JAPAN'S NEIGHBOR

"On my arrival in British Columbia," went on Hon. Mr. Tokugawa, "I feel I must emphasize this point, because I need hardly say that this province is the one which is really Japan's neighbor; it also holds the greater part of the Japanese population in this country and is the province through which we do most of our trade with Canada."

"I greatly regret that I must proceed at once to Ottawa, but I hope to come back as soon as the opportunity presents itself and then, as I shall have presented my credentials to the Government, I shall be able to take part in official functions which, on this occasion, I have not been able to accept."

The purpose of his work in Canada, said Mr. Tokugawa, was to look around and determine the wisest course to adopt in the interest of both countries, particularly with respect to the development of trade.

The new Minister is fully aware of the growing importance of the Pacific from an international point of view and from the larger part which both Canada and Japan are playing on the Pacific Ocean and he realizes, apart from the cultivation of friendly relations, the importance of promoting peaceful intercourse between the two nations.

EVEN BALANCE OF TRADE

The question of trade enters largely into the work of the new Japanese Minister to Canada, Hon. Mr. Tokugawa knows that trade between Canada and Japan is a growing and vital thing, and he would like to see trade between the two countries develop to an even greater extent.

He considers it important that the balance of trade should be as even as possible, and with the object of keeping trade even he hopes a way may be found of increasing Japanese exports to Canada.

TRIBUTE FOR MARLER

On his departure from Tokyo Hon. Mr. Tokugawa was wished bon voyage by Hon. Herbert Marler, Canada's first Minister to Japan.

In speaking of Canada's minister to Japan, Hon. Mr. Tokugawa said: "I am sure Hon. Mr. Marler deserves the welcome he has received and is receiving in Japan."

"The Japanese Government is pleased to welcome such a man as minister and the hope was generally expressed in my country that his stay will be crowned with success."

"I have no doubt that he will contribute to the consolidation of the excellent understanding that exists between the two countries."

Hon. Mr. Tokugawa said he had received numerous invitations to deliver addresses on the Pacific Coast.

He had been urgently invited to

Canadian Bank Loans On Call Markets Rise; Deposits Show Increase

In two respects the statement of Canadian chartered banks as at August 31, presents interesting features. Call loans in Canada, which are shown at \$273,629,082, constitute a new high record, being about \$1,500,000 above the previous peak, established as at July 31, at \$272,129,082. It is interesting to note that while call loans outside Canada, presumably in Wall Street, rose \$5,000,000 to \$910,500,423 during August, they were below the highest level previously touched. At the end of June, they amounted to over \$833,000,000.

Another interesting feature is the savings deposits showed the first increase this year. Since January, when they totaled \$1,825,000,000, they declined steadily until at the end of July they were down to \$1,453,000,000, but in August they showed an increase to \$1,459,000,000.

One theory advanced in some quarters in explanation of the steady decline in savings deposits during the first half of the year, is interesting on account of its link with the stock market. According to this explanation, savings were drawn upon to strengthen marginal accounts or to pay off the balances due on stocks bought on margin with a view to placing the securities in "strong boxes." As the trend in savings deposits has again turned upward, it may be assumed, under this theory, that probably the development has run its course for the present at least.

C.P.R. EARNINGS SHOW BIG DROP

Montreal, Oct. 12.—Canadian Pacific Railway's earnings for the first week of October show a gross of \$4,450,000, which is a decrease of \$1,648,000 from earnings for the corresponding week of last year.

Gross earnings so far this year from January 1, total \$155,146,000, a decrease of \$14,000 from total for the corresponding period of 1928.

peak before the Japan Society, the Victoria Canadian Club and the Vancouver Canadian Club.

The new minister takes the view that he cannot consistently make speeches in this country before his letters of credence have been presented and accepted at Ottawa.

TRAVEL PLANS

He plans to travel during his sojourn in this country in order to become more acquainted with its people and become better posted as to the requirements of his office. He speaks frankly of his good fortune in being appointed as Japan's first minister to Canada. He is an admirer of Canadian life and speaks with enthusiasm of the scenic grandeur of Canada. He was last in this country in 1921 when he accompanied his distinguished father, Prince Tokugawa, to the Washington Conference.

"I have come to Canada on this occasion to study and work," remarked the visitor.

Hon. Mr. Tokugawa was born in March, 1884, and is son and heir of Prince Iyasato Tokugawa. The graduated from Tokyo Imperial University in June, 1909, and entered the diplomatic service in November of the same year, being attached to the Canadian Embassy in London.

He was appointed councillor of the Japanese Foreign Office and private secretary to the Foreign Minister in June, 1914.

In November, 1917, he was appointed secretary of the Japanese Legation in Peking.

In the source of his diplomatic career, Mon. Mr. Tokugawa was made secretary of the Japanese Embassy in London in October, 1921, and was promoted to the post of ambassador in London in May, 1923.

CONSUL AT SYDNEY

He was appointed to the post of Japanese consul-general at Sydney, Australia, in July, 1925. His appointment as envoy extraordinary and minister plenipotentiary of Japan in Canada was made in April of this year. He is a Knight Commander of the Victorian Order, which decoration was conferred upon him in April last, when he acted as a member of the welcoming committee in Japan to H.R.H. the Duke of Gloucester.

BRUCE PARTY DEFEATED AT THE POLLS

(Continued from page 1)

tain. They are Rt. Hon. William Hughes, Australia's war-time Premier, Lieut. William M. Marks and George A. Maxwell.

MINISTERS DEFEATED

Among the Ministers apparently defeated to-day were Hon. William M. Gibbons, Postmaster-General, deputy leader of the Country Party, 1,900 votes behind his opponent; Major-General the Hon. Sir Neville Blomfield, Minister of Health, 2,000 behind; and Major the Hon. Charles William Clemen, Minister of Home and Territories, 8,000 behind.

GULLETT ELECTED

Hon. Henry S. Gullett, Minister of Trade, apparently was safe, being about 3,000 votes ahead of his opponent.

The election of Attorney-General J. G. Latham also was considered certain. Hon. Earl C. Page, Federal Treasurer and leader of the Country Party, was accorded acclamation on nomination day.

There seems no doubt Mr. Scullin will have a clear majority and will be called upon to form a Government.

LABOR ARBITRATION

The issue was arbitration of labor disputes, a bitter subject in Australia for many years. The Government stood committed to abolition of the federal arbitration court and placing of jurisdiction in the hands of the state courts, reserving to the federal authorities jurisdiction only over disputes in the transport and shipping industries.

The Labor Party has stood solidly behind the principle of federal arbitration as a system achieved by the workers after years of effort, asserting withdrawal of support from the state courts would leave the workers at the mercy of competing employers.

Adrian IV, who was Pope in the twelfth century, is supposed to have been born in England.

DICKIE'S STAND ON PATRONAGE IS CRITICIZED

C. H. O'Halloran Speaking to Saanich Liberals Says Public Opinion Against Dickie

The annual general meeting of Ward Seven Saanich Liberal Association was held in Hampton Hall, Burnside Road, last night. The following officers were elected: President, Francis Simpson; vice-president, Joe Hancock; secretary-treasurer, J. Waterston; executive committee, Mrs. Smart, Mrs. Hancock, Mrs. Pass, Mrs. Ramsay and Miss Arup and H. Passmore, Geo. Foster, F. A. Grimes, A. A. Pass and J. Smart.

President Simpson, after thanking the members for selecting him, urged the building up of a strong association in Ward Seven to advance the Liberal cause, and promote the success of the Liberal candidate in the coming Dominion election.

David Ramsay, president of the Saanich Liberal Association, spoke on the subject of patronage. He also called attention to the annual meeting of the Saanich Liberal Association which will be held in Women's Institute Hall, Marginal Road, on October 22. George E. Pearson, M.P.P., Nanaimo and C. H. O'Halloran will be the principal speakers.

C. H. O'Halloran, the Liberal candidate, gave a very cordial reception last night. After introductory remarks during which he congratulated the new officers, and referred to Ward Seven as a Liberal stronghold, he was a member of the Liberal candidate a handsome majority in the last election, the speaker, quoted recent reported utterances of C. H. Dickie reflecting his attitude on patronage.

Mr. O'Halloran expressed the view that public opinion would be against Mr. Dickie, whose views were not in accordance with the best interest of the public service.

The speaker, with facts and figures ably outlined the progress of the Dominion of Canada since the McKenzie King administration came into power in 1921. He claimed that the progress of Canada, which to-day was unquestioned, was in large measure due to the enlightened policy of the Liberal Government, in basing its policy on the stable development and prosperity by steady expansion of production, said the speaker.

Mr. O'Halloran also claimed for the Liberal administration the development of a sane and what was now apparent, a successful immigration policy.

At the conclusion of his instructive address Mr. O'Halloran was accorded a hearty vote of thanks.

An enjoyable social time was spent after the speeches during which the ladies' committee served refreshments.

Plans Annual Costume Ball For Children

The Navy League Chapter, I.O.D.E. met on Thursday afternoon at headquarters, Union Building, with the regent, Mrs. Mortimer Appleby, in the chair. The members were very pleased to receive a gift of the consecration service programme of the new Christ Church Cathedral from the municipal regent, Mrs. Hebdon Gillespie, and the secretary was requested to write a letter to Mrs. Gillespie expressing the thanks of the chapter.

The educational secretary, Mrs. Alice Thomson, reported that the patriotic calendars for 1930 were now obtainable and the chapter decided to order 100. On the motion of Mrs. Gordon Smith, it was unanimously agreed that the amount required from each chapter to complete the quota for British Columbia for the I.O.D.E. was memorial should be sent forward immediately.

The chapter having purchased two of the handsome books, "Our Island Story" and "Round the Wonderful World" from the National Chapter, it was decided to present them, in the name of the chapter, to the Sea Cadets to form the nucleus of a library for their use. Mrs. Gordon Smith was asked to carry the chapter's vote to the semi-annual meeting of the Provincial Chapter at Chilliwack.

The regent, Mrs. Mortimer Appleby, was, as usual, asked to make all arrangements under the auspices of the chapter. For the children's annual fancy dress ball, to be held at the Empress Hotel on Friday, December 27, for the fifteenth year in succession. This being in the festival was planned by the C.P.E. it is expected the ball will be a greater success than ever, something quite novel being planned for the occasion.

The following ex-members are cordially welcomed back into the chapter: Mrs. T. A. Johnston, Mrs. Aubrey Kent, Mrs. J. A. Walker and Mrs. Hugh Lowder of Shanghai.

Mrs. Alice Thomson, president of the Seaside's Institute Ladies' Guild, extended a cordial invitation to the members of the chapter to the birthday tea of the institute.

NATURAL RESOURCES

Alonsa, Man., Oct. 12.—Return of Manitoba's natural resources will constitute a temporary problem for the province, it was pointed out last night by Hon. D. O. McKenna, Minister of Mines and Natural Resources, at a meeting here. The new resources, he said, would cost more than the revenue they would supply and would disrupt the balancing of the Government's budget. Eventually, however, they would more than pay for themselves.

FUNERAL HELD OF A. R. CASTLETON

Well-known Native Son Buried in Seattle; Lived Here Many Years

Funeral services were held in the Buttrworth Mortuary, Seattle, Wednesday at 2 o'clock over the remains of Arthur R. Castleton, well-known native son of Victoria, who passed away on Saturday, October 5. Rev. W. A. Major, D.D., conducted the services at which Owen J. Williams sang the solos, "Lead, Kindly Light," "Thy Will Be Done" and "Nearer My God to Thee."

Many beautiful floral tributes from Victoria, Seattle and Portland covered the casket and hearse and many friends were present. The pallbearers were: W. B. Allen, S. P. Payne, Earl Thompson, Harry Cowan, John Green and Arvid Danila. The remains were laid to rest in Lake View Cemetery.

The late Mr. Castleton was the third son of the late Richard and Sarah Ann Castleton, pioneer residents of Victoria, who left Gravescend, Kent, England, leaving school, he went to the Douglas Foundry, to learn his trade as an iron moulder. Later he worked as at the Albion Iron Works. He went to Seattle about forty years ago.

Mr. Castleton was a member of the old Volunteer Fire Department in Victoria, and also of Seattle. He was an enthusiastic hunter and took a keen interest in fishing.

He is survived by his widow, at the family residence, Seattle, one son, William W., and three grandchildren, of Seattle, one son, William W., of Seattle, one son, William W., of Seattle, one son, William W., of Seattle.

He was a member of the Court View Cemetery, A.O.P. Victoria, also Tent No. 8, Knights of Macabees, and from Moulders' Union, of Seattle.

POLICE HUNTING DRIVER OF AUTO

Girl and Brother Were Injured When Hit Near Maillardville, B.C.

New Westminster, Oct. 12.—Lying injured and practically unconscious, Miss Orrie Beale, seventeen, and her brother, Laurence, thirteen, were found by W. H. Ross, Vancouver, and F. Porke, Maillardville, who were driving near Maillardville at 1:10 o'clock.

Both the injured are progressing favorably in the Royal Columbian Hospital here.

The girl and youth were victims of a hit-and-run driver in a touring car which was speeding toward Vancouver when it came up behind them while they were walking on the main road at Maillardville, going home from a dance.

THROWN INTO DITCH
Miss Beale was thrown violently into the ditch. She is suffering from painful head injuries and bruises and her left leg may be fractured. Laurence Beale also has had injuries, bruises and a possible fracture of one leg.

They reside with their parents, Mr. and Mrs. E. A. Beale, Blue Mountain Road, Coquitlam.

As far as can be ascertained, there were no witnesses of the accident, but police hope to be able to trace the hit-and-run driver.

A broken headlight from an auto was found by the police to-day near where shattered glass was discovered on the road where the young couple were hit.

UNION PARLEY ATTRACTS MANY FROM VICTORIA

(Continued from page 1)

The imposition of a Provincial Health Tax for hospital upkeep, the enlargement of school districts to include wider territories, absolute discredence and control over the issuance of trade licenses, a price index of way and no speed limit for fire trucks responding to a call, and a number of other points are to be brought forward from the district.

Burnaby is seeking the abolition of all school boards and police commissions and a merger of their present duties in that of the municipal councils. Burnaby is also asking the reduction of old age pension limits, to apply five years earlier than at present, or at age of sixty-five.

Other municipalities have a big programme, mainly dealing with legislative changes in the Municipal Act and other statutes affecting civic affairs.

Local delegates will leave the city for the convention centre on Sunday and Monday.

BOX SCORE

(Continued from page 1)

SUMMARY
Runs batted in, Cuyler 2, Stephenson, Grimm 2, Taylor, Bishop, Haas 3, Simmons, Fox, Dykes 2, Boley; two-base hits, Cochran, Dykes; three-base hits, Hornsby; home runs, Grimm, Haas, Simmons; sacrifices, Taylor, Haas, Boley; double plays, Dykes to Bishop to Fox; left on bases, Chicago 6, Philadelphia 6; bases on balls, Quinn 2, Rommel 1, Neft 1; struck out by Quinn 2, Walberg 2, Grove 4, Root 5, Malone 2, Carlson 1. Pitchers' records: off Quinn, 7 hits and 6 runs (5 earned) in 5 innings, (none out in 6th) with 22 at bat; off Walberg, 1 hit and 1 run (unearned) in one inning with 3 at bat; off Rommel 2 hits, 1 run (earned) in one inning with 1 hit and 2 runs (earned) in no innings (pitched to two batters) with one at bat; off Blake, 2 hits and 3 runs (earned) in no innings (pitched to two batters) with two at bat; off Carlson 2 hits and no runs in one inning with three at bat. Hit by pitched ball, Miller, by Malone. Winning pitcher, Rommel; losing pitcher, Blake.

Ladysmith, Oct. 12.—A very interesting presentation took place in the office of the Canadian Collieries at the wharf recently, when the workmen gave James Weir a set of pipes and a smoker stand, on the occasion of his retirement after working for the company for thirty-one years. W. Davenport acted as chairman and called upon W. Hayes, as the eldest employee, at the wharf, to make the presentation.

READING OF BIBLE GROWS

Scripture Union Hears Reports of Progress Being Made Throughout World

The annual rally of the Scripture Union, held yesterday afternoon in Memorial Hall, with Archbishop Loyle in the chair. The society is a world-wide organization of upwards of 1,000,000 members, each pledged to daily reading of the Bible, which were attended frequently by groups of 300 children. The seaside services attract great crowds at English seaside resorts, it was reported, and are growing in favor.

S. V. Ware of Vancouver reported on the jubilee of the organization, observed at Albert Hall, London, England, last summer. D. S. Clarke of Vancouver, secretary for the western provinces, reported a membership of 25,000 in Canada, of which the Vancouver Island quota is 1,500. Miss Grease is the local secretary, and Miss Rice, the secretary for Up-Island points.

Reference was made to the services held at Crescent Beach for the last five years, under the direction of H. Burch and Miss Bury of that place, which were attended frequently by groups of 300 children. The seaside services attract great crowds at English seaside resorts, it was reported, and are growing in favor.

Rev. C. E. Cropper of St. Mary's Parish led the meeting in Scripture reading. Tea was served in the gymnasium after the meeting.

FALSE FIRE CALL CAUSES BAD WRECK

(Continued from page 1)

who have been observing the post office booth for some days, numerous false alarms having originated from that source. The boy will be brought before Magistrate Jay in Juvenile Court on Monday.

Hearing the sirens of the fire engine, Thomas Miller, driver of an eastbound Oak Bay street car, pulled up with the front of his car projecting fifteen feet into Douglas Street. The leading fire fighting motor passed safely southward and Deputy Chief Munro also passed, slowing because of the quickly-gathered crowd.

Coming west on Fort Street was a light sedan owned and driven by Edward Montgomery, 2890 Obed Avenue, with a number of passengers. Observing the congested traffic across Fort Street the driver turned his car into Douglas Street instead of stopping. As he did so the giant ladder truck cut across Fort Street. The vehicles met in a head on collision when making for the narrow right of way remaining in front of the projecting street car.

THROWN ASIDE
The impact of the light car was sufficient to throw the fire truck into the front vestibule of the street car, despite the efforts of driver Baylis, and the sudden shock threw Fireman E. Roberts clear over the nose of the

Harvest Thanksgiving services will be held in St. Mary's Church on Sunday afternoon. The preacher will be the Rev. A. L. Nixon. The service will commence at 3.15 o'clock.

Little Rock, Oct. 12.—Ray Hesse, of Joliet, Ill., automobile race driver, was killed during a race at the Arkansas State Fair grounds yesterday, when his racing automobile, traveling at high speed, crashed through a guard railing and plunged down a thirty-foot embankment. He lost control of the car as it rounded a curve.

Had Backache for Nearly Three Years

She Then Found Relief in Dodd's Kidney Pills

"I had backache for nearly three years," writes Mrs. Ed. Desayoux, a resident of Spanish, Ont. "I took six boxes of Dodd's Kidney Pills and today I feel fine. I never have to complain of my back now. I had previously tried all kinds of pills, but they never helped me. I have to thank Dodd's Kidney Pills."

Many women suffer periodically with backache and, as middle age approaches, the pain grows more severe. Rest may give temporary relief, but Dodd's Kidney Pills strengthen the Weak Kidneys and help the cause of the pain. A trial will surely convince you.

Her Wedding Ring is bigger than a Washtub

FIFTY YEARS AGO, Grandmother worked her weary way in a little circle—a circle symbolic of the narrow band that Grandfather had placed upon her trembling finger. After the fashion of this primitive period, she was a "good wife," giving her hours and strength to a hundred household tasks.

But times have changed. The modern man is no replica of Grandfather. He lives in a new and wondrous world. Daily he must face new problems—make new plans. For he is the product of an advancing age.

Just as your husband has been advantaged by labor-lightening services, you too must banish burdens that take your time and sap your strength. For the modern matron must have freedom—freedom to become her husband's partner in work and play. Her wedding ring must symbolize a larger

circle; a circle big enough to hold her hopes . . . and his.

Old-fashioned washday in the home is your biggest household handicap. You know full well the worry of washday; the bother of preparation; the steam and smell; the heavy baskets to carry; aching muscles; jangled nerves; a topsy-turvy home. And of course you must stay in the house—a Washday Prisoner.

But a needless prisoner. For there is a way out; a way that leads from fatigue to freedom. It is a trail that millions of women have traveled. And never would they think of turning back to yesterday's bother and backache. A modern laundry is ready now

to lift weary washday out of your home and out of your life—forever. Realizing the importance of its task, we have kept pace with Progress. Our modern laundry can be relied upon to wash clothes clean, and make them last long. And there is a laundry service that exactly meets your needs. If you have felt that the laundry is "too high priced," a pleasant surprise awaits you. Laundry service actually costs less than home washing.

Laundry-washed clothes are cleaner, last longer and actually cost less than home washing. Begin this very week to enjoy and profit by the leisure that the modern laundry has in store for you.

LAUNDRY-WASHED CLOTHES FREE FROM CONTAGION... SAY CITY PHYSICIANS

Not a single instance of disease due to laundry-washed clothes reported by health officials of 19 leading Canadian cities in recent Dominion-wide survey. "Ridiculous!" then authorities branded the old superstition that laundries spread contagion.

Complete observation of all city sanitary codes in existence was reported in Elizabeth Stone MacDonald, Home Economics expert who conducted the survey. For hygienic safety, the laundry is supreme.

TO-DAY'S GRAIN MARKETS

(By Branson, Brown & Co. Limited)
Winnipeg, Man., Oct. 12.—Wheat—Opened 1/2 to 3/4 higher this morning. The May futures showing the most strength and the market was able to hold firm under top levels. Trade volume was not large, there being a little buying by Chicago and New York interests, while the local crowd was bullish and supporting the market based on the firmness in Liverpool, which closed a little stronger than due.

There was plenty of wheat for sale at top levels and the pool was selling October wheat at 145 1/2. The bulk of the trade was spreading selling the nearby months against purchases of December and May. Direct exporters did nothing in the way of export business overnight, but the pool sold four or five loads at about two cents under present market levels, and it is reported that the pool have been selling a little wheat all week under market levels.

The load of supplies is getting pretty heavy and a broader export business would be welcomed by all concerned, but Europe continues to show very little interest and considers Canadian prices too high for any large business. Canadian exports for the past two months are away below normal. The demand for cash wheat is very slow this morning, and while offerings are still light, the demand is very thin and most shippers are doing nothing. Spreads are about unchanged.

WHITNEY LETTER

By Branson, Brown & Co. Limited

New York, Oct. 12.—Whitney of the Wall Street Financial Service to-day says:

RAILS AND OILS THIS WEEK

"Making allowance for the fact that within the period of a week the industrial averages recorded an advance of approximately twenty-seven points and that the rail group in a similar period advanced approximately ten points, the amount of profit taking which was absorbed in Friday's session, without other than moderate effect on prices, speaks well for the underlying strength of the list.

"Indications point to another satisfactory market this week, but one which will not be as buoyant as the past week, in fact, it will be entirely logical for the industrial group to slow up materially and indeed react since in a considerable number of issues the technical condition has been weakened by the elimination of its short interest. This development will have practically no effect on the two groups which, as previously stated, will feature the final quarter of the year.

"With relatively few exceptions, I believe that new buying this week should be concentrated quite exclusively in the rails and oils, and that at least for those who have trading positions, further advances in the industrial group should be used for taking trading profits.

COMMENT

"Attention is directed and the recommendation made to buy Bullard Company stock which represents a company successfully conducted for some thirty-five years engaged in the manufacture of specialty designed machines and tools and with virtually no competition. Outside of the general excellence of the company, a new factor has developed possessing tremendous possibilities. The company has perfected and is about to be granted patents on a process for eliminating the picking of steel. In its own plant it has been demonstrated that a picking operation requiring approximately two hours under the present methods, requires but four minutes under the new process. The possibilities are enormous.

"In the rail group look for leadership in Atchafalaya, Union Pacific, Nickel Plate, Chesapeake and Ohio in the investment type rails.

"Elsewhere continue buying in Erie, New Haven and M. & K. and T. The oils which should be bought have been mentioned so often here as not to require repetition at this time.

"I believe that exceptions to any reactionary tendencies in the industrial group will be found in Radio, in

which the buying range should be taken to include 48, in American Tel. and Tel. which is scheduled for a new record this week, in Pullman, in Gold Dust, which is expected to feature the food products group this week, and in United Fruit.

Bond Market Next to Move On Low Money

New York, Oct. 12.—H. P. Bliss of E. A. Pierce & Co. to-day issued the following on the credit situation:

"You may not recall that some months ago in a discussion over the credit situation, The Wall Street Journal pointed out that if the Federal Reserve would glut Wall Street with money the high speed speculation might be stopped. At least, it might be checked, because low money rates would cause heavy withdrawals of funds by foreign accounts, corporations, institutions and others who have been pouring their surpluses into collateral loans because of the attractive rates.

"The present drop in call money has started the discussion all over again, and the idea is being advanced more that the Federal Reserve is going to make money as cheap as possible, and consequently a shifting of funds from collateral loans into fixed income securities, such as bonds, will shortly be witnessed on a large scale.

"The street is also recalling that Secretary Mellon said 'Buy Bonds.' Whether or not the Federal Reserve has changed its policy, the injection of this question into the situation is interesting and worth bearing in mind."

WHEAT SHIPMENTS SMALL THIS YEAR

Chicago, Oct. 12.—United States exports of wheat last week were only 1,638,000 bushels, making a total since July 1 of 47,351,000, or 600,000 less than this time a year ago.

Total North American shipments so far this season are 87,703,000 bushels, compared to 153,972,000 a year ago.

This emphasizes the smallness of the world's demand for overseas wheat so far this season, owing to the active buying of domestic wheat by German millers.

Goodyear Rises to 375; Market Shake-down Puts Sound Issues On Counter

(Weekly Review of Canadian Stocks)

Over Branson, Brown, Wisely—Toronto, Oct. 12.—There have been evidences recently of liquidation in a number of sound issues that had not enjoyed a pronounced upward summer movement. Presumably, this was done to support marginal accounts on some of the leading speculative issues. Burt was down nearly 2, Canadian Dredge 5, Hayes Wheel 1½, Lake Superior 1½, Laura Secord 3, Maple Leaf 2, Page Hersey 2, and Steel of Canada 1½. Having regard to yields and current earnings, these shares appear conservatively priced. If a stock of such a character is sold in order to support weak speculative issues, the reason for their decline is merely a market affair and perhaps their merits at current levels have been enhanced by the decline.

In the case of all stocks named above, the companies should be able to show material increases in profits for 1929.

The rise in Goodyear common shares of 15 points to 375 followed the optimistic statement on the affairs of the company issued by President Carlisle. Record sales, earnings and financial strength are indicated for the period just closed.

VINEGAR DEAL ON

The rise in Canada Vinegar of nearly six points to above 41, is attributed

to official advice that certain interests have secured an option to purchase all the common stock of the company at 50 per share. Whether the option is taken up, or not, the reputation of this company has been enhanced by the development. Canada Vinegar has secured a strong hold in the vinegar business throughout the Dominion and is doing well. In view of fact that the vinegar business dovetails nicely into the distillery business, it is assumed in some quarters that one of the distillers is the interested party.

IMPERIAL OIL EASIER

While Imperial Oil shares declined a point, its subsidiary, International Petroleum, advanced a point. The latter stock has attracted buyers, because of the increase in distributions made this year, and the expectation that a fourth dividend of 25 cents per share will be paid in the final quarter equal to the September dividend. In this case distributions would be double that of 1928. It should be noted that as Imperial Oil owns 56 per cent of International Petroleum, the latter company's materially increased payments by International Petroleum.

Prior to 1919 the trade balance between the two countries was generally in favor of New Zealand but since that time imports from Canada have consistently exceeded New Zealand's exports to that country.

J. Vaughan Roberts Opens Own Office

J. Vaughan Roberts, who for many years has taken an active part in the business affairs of the community, has opened an office in the Union Building, 612 View Street.

During the years that he was connected with the wholesale grocery business, Mr. Roberts was closely identified with the activities of the Canadian Creditors' Association, being the representative of Vancouver Island interests on the board of directors of the British Columbia branch of the organization, and in recognition of his services was honored with the degree of M.C.I. by the Canadian Credit Institute.

With his wide experience, he is considered well fitted to advise particularly on matters pertaining to the credit and collection branches of business.

TRADE WITH NEW ZEALAND GROWS

New York, Oct. 12.—Trade between New Zealand and Canada has grown rapidly in recent years, exports from New Zealand to Canada in 1928 reaching the value of \$2,469,150, passing the \$2,500,000 mark for a report from the Assistant Trade Commissioner Charles F. Kumbel, Wellington, to the Department of Commerce.

Prior to 1919 the trade balance between the two countries was generally in favor of New Zealand but since that time imports from Canada have consistently exceeded New Zealand's exports to that country.

Exports from New Zealand to Canada consist chiefly of butter, sausage casings, wool, frozen and preserved meats, hemp and hides. Butter is by far the chief item, reaching the value of \$1,548,646 in 1928. Sausage casings, another important item of export, reached the value of \$451,074.

New Zealand's imports from Canada consist chiefly of manufactured goods, of which boots and shoes, preserved fruit, fencing wire, tools and implements, iron pipes, machinery, metal manufactures, and automotive equipment and paper are important items. Motor vehicles and parts are the largest item on the list and account for \$593,372 and \$593,323, respectively, in 1928.

Goodyear Rises to 375; Arthur Cutten Solloway, Mills Leading Bulls Open Victoria In Radio and Office Monday Simmons Bed; Rubber Firms Get Together

New York, Oct. 12.—Arthur W. Cutten and associates are interested in the market for Radio Corporation and are extremely optimistic regarding the corporation's possibilities.

This was brought out by reports in La Salle Street that Mr. Cutten was concerned marketwise in a radio stock that is active on the Chicago Stock Exchange. Asked concerning these rumors, Mr. Cutten said to The Wall Street Journal:

"There is only one radio stock in which I am interested and that is Radio Corporation of America, which is building with an eye toward the future. I am not interested in current earnings, but in the future outlook of the company. Current earnings may be only a flash in the pan."

There are several other issues which are favored by Mr. Cutten. One of these is the Simmons Company. His interest is based on the expansion programme now under way. He is content to receive modest dividends at this time and have surplus earnings applied to building up the company, he said. He did not hesitate to express the opinion that "anyone who has Simmons stock holds it, will make lots of money."

KODAK MAY SPLIT

New York, Oct. 12.—Recent sharp advance to a new record high in Eastman Kodak has been accompanied by reports that a split-up of the stock is in the offing. The company is having the biggest year in its history and estimates for 1929 are \$22,000,000, or about \$11 a share on the outstanding 2,056,219 no par common shares. This would compare with \$18.116,440, or \$12.69 a share last year, and the peak of \$20.14, or \$12.61 a share in 1927.

Expansion of the company's business recently has made advisable the raising of additional working capital through the sale of new stock. New shares sold totaled 205,756, at \$10, reducing the company \$2,056,000. Plans call for the expenditure of about \$15,000,000 in increasing the capacity of the Rochester plant, in addition to the construction of a plant for the manufacture of cellulose acetate at Kingsport, Tenn.

RUBBER PRICES TO RISE

New York, Oct. 12.—Rubber shares, particularly Goodyear, Goodrich and U.S. Rubber have advanced on reports of a better understanding in the trade, as a result of several recent conferences among executives. It is understood that a general agreement has been reached to advance the price of rubber to 10 cents a pound, from 9 cents per cent and the small order houses which have offered serious price competition to the tire trade will also advance their prices later. Such action, if carried out, would considerably improve the outlook for the leading tire companies.

MARKET RECOVERS

New York, Oct. 12.—That the market was overbid during the weakness of last week became evident during this week. Many weak long accounts were eliminated, but it was the persistent pressure from bear traders which brought about a technical condition warranting a substantial recovery. When it was shown that the market was meeting with what is described as "good" buying, the short covering started and has been continued on an active scale.

Sentiment improved, but conservative observers are advising clients against following the advance too far and are urging those who purchased at lower levels to take profits on the new upturn. They are looking for another setback, but believe real resistance will be encountered somewhat below the low levels reached by the leading stock last week.

One of the high-priced issues which has acted remarkably well during selling waves is American Telephone. Part of the buying has been for investment account, the account that there was comparatively little forced liquidation, indicates the large amount of stock which is out of the street and paid for outright by small holders. Telephone could easily develop into one of the outstanding leaders among the investment issues on substantial recovery.

Union Carbide is not obtainable at prices materially below the high record of the current year. The progressive expansion in the company's activities and the steady improvement in earnings which is looked for in the coming years, make this issue have a special appeal to the long pull buyer. The company has 116 different products, many of which have been trade names and are marketed through national advertising. This puts the business on an unusually solid basis. There has been some good scale buying in the last week.

International Combustion was heavily sold on a report that the dividend might be passed.

EASIER MONEY

Revival of bullish activities was given stimulus by a definitely easier tone in credit conditions, with call money dropping to 3 per cent. Part of the explanation of the current ease of money is to be found in the unusually liquid position of the leading New York City banks as reported by the condition statements of reporting member banks of October 2. On that date New York City banks, which were lending over one-third of the total loans of all reporting member banks, were borrowing only \$53,000,000 from the Federal Reserve Bank, or less than one-tenth of the borrowings of all reporting banks. New York City banks were borrowing less than Chicago banks, although loans of New York banks were over three times as large as Chicago banks, and they were borrowing less than banks in the San Francisco district.

MORE TOBACCO PROFITS

Further long-pull accumulation has been seen in the principal tobacco shares, with American Tobacco in de-

mand for financial interests close to the management and the stock selling up to a new high for the year. With about \$42,000,000 additional net profits to be divided among cigarette manufacturers as a result of the price advance, estimates were made of the gain in earnings to be shown by leading producers.

American Tobacco's share on a full year's business is placed in some quarters at \$5 a common share, or better, which would bring profits for the next year to around \$17 a share, without allowance for future growth of sales, which are now running 40 per cent ahead of a year ago. With an increase of \$1.30 a share estimated for Reynolds, next year's net is placed at \$4.60 a share; and Liggett & Myers' gains are estimated at \$4.50 with last year's profit at \$3.22 a share. Lorillard, as the smallest producer, will obtain the smallest part of the increase, but will benefit by the wider profit margin which will enable the company better to finance its advertising programme in Old Golds.

DR. DAVID WARNOCK, manager, Victoria office, Solloway, Mills & Company.

Solloway, Mills & Company Limited, known as Canada's largest brokerage house trading in oils, mines and grains, will complete their coast-to-coast organization with the opening of the Victoria branch at 631 Port street, on Monday.

The latest addition to the chain will be under the management of Dr. David Warnock, formerly Deputy Minister of Agriculture for British Columbia. He is also well known in Alberta, having occupied the same position in the Alberta government a number of years ago and as well represented a southern Alberta constituency in the Federal House.

Alterations have been completed on the boardroom at the corner of Fort and Broad one of the most commodious in the city. Full quotations are to be given from the Vancouver, Calgary and Toronto markets. A special grain service has also been installed giving direct connection with Winnipeg and Chicago wheat prices.

In conjunction with the brokerage service the company will install a complete statistical service covering all aspects of Canada's natural resources. Dealing in Canadian oil, and mining securities and grains, the organization has experienced field representatives stationed in the important centres of the Dominion. A daily news and bulletin service is transmitted to all offices whereby clients and the public may keep in close touch with developments.

The company does not promote or operate any non-remittance functioning strictly as a brokerage organization, Dr. Warnock said. News reports are as authentic and reliable as possible, and offered to the public uncensored. In addition a monthly house journal, "News From the Mines," circulating about 100,000 copies is issued, and is considered an authority in Canadian mining circles.

During the past year the organization has extended its activities from coast to coast; has thirty-seven direct offices in thirty-five of the principal cities of the Dominion, Newfoundland, also in New York, Chicago, Buffalo and Seattle. Seats are held by officials on fifteen of the leading oil, mining and grain exchanges, including the New York Produce Exchange, Standard Stock and Mining Exchange of Toronto, Chicago Board of Trade and all western Canadian Exchanges.

George Properties Close For Winter

Stewart, B.C., Oct. 12.—Operations on the George Enterprises and the George Copper, up the Bear River, have been temporarily suspended for the coming winter. During the past summer machinery was installed preparatory to more extensive development. The work carried on this summer was confined mostly to tunneling, and the results have been satisfactory.

The source of the high grade float found on this property was located, and the vein drilled on for fifty feet. This vein was narrow to start with, but in this distance has widened considerably and exposes a good grade of ore.

The main tunnel, 1700 feet to intersect a six-foot surface showing of chalcopryite carrying \$16 in gold, crossed the zone in depth and also cut a second vein which holds forth promising prospects. The tunnel started last year to intersect the lowest showing of copper was extended about twelve feet. The last five feet of this cross-cut show considerable chalcopryite and the face is well mineralized.

An average of sixteen men have been employed on the George Enterprises throughout the season. The work was done under the supervision of Stewart, Batten and Associates, consulting engineers.

Diamond drilling operations on the George Copper were suspended for the season this week, the crew coming down Wednesday.

\$100,000 Lake & Rail Warehouse & Elevator Corporation

Lessors of Warehouse, Elevator and Flour Mill to
INTERNATIONAL MILLING COMPANY

6% First Mortgage Sinking Fund Gold Bonds, Series "A"
Due December 1, 1931. Interest payable June 1 and December 1.
Principal and Interest payable at all Canadian Banks of Commerce branches in Canada and New York.

Denominations: \$1,000 and \$500. Redeemable at the principal.

Lake & Rail Warehouse & Elevator Corporation was incorporated in 1928. The Corporation owns approximately five acres of land on the inner harbor at Buffalo, with a waterfront of about 900 feet. The property consists of a ten-story four mill building, with a 4,000-bushel daily capacity; a grain elevator of 3,250,000 bushels capacity; and an office building and two-story four warehouse.

Payment of the bond interest and sinking fund requirements of the Lake & Rail Warehouse & Elevator Corporation Series "A" bonds is insured by the income received from a twenty-six-year lease of the property taken by the International Milling Company. The rental obligation of the International Milling Company has priority over the fixed charges of that company, and the lease stipulates that it shall be paid even in the event of destruction of the Lake & Rail property by fire. The consolidated net earnings of the International Milling Company (before property taxes) available for interest requirements on the above securities have averaged for the last five years over nine times interest requirements, and for the year ending August, 1928, were 14.88 times requirements.

PRICE: 101 and Accrued Interest, Yielding About 5.93%

As this is an American Corporation, the securities are subject to the usual Federal Tax, which is reclaimable by Canadian Citizens under the provisions of the Federal Amendment, Sec. 231, May 29, 1928.

FINANCIAL NOTES

New York, Oct. 12.—Corn Products Sales this year have benefited largely from the increasing use of corn sugar in the rayon industry, which gives the company a new outlet for its products. Earnings in the first half of this year were \$1.37 a common share, against \$1.25 for the full year 1928. Balance for the full year 1929 is expected to be around \$1.50 a share. In July the company placed its common stock on the market at \$18.75, and declared an extra dividend of 50 cents a share. Another extra dividend is expected for July 1930.

Sterling Securities is a feature of the investment trust division, rising to new heights on the move on a large turnover. Active demand for the stock was stimulated by the company's net earnings of \$12.12 in the first nine months of this year. This total was equivalent to 10 cents a share on the 600,000 class "A" common shares. These earnings represented interest and dividend receipts and profits from the sale of securities and did not include any trade profits. The company's balance sheet as of September 30, showed the firm in strong position, with investments of over \$10,000,000 in stocks and call loans amounting to \$10,305,061.

ADVERTISE IN THE TIMES

MINING STOCKS AWAY BELOW VALUE

The October First issue of our Stock and Bond Report contains the latest development news. Mailed free.

In consideration of the splendid development and production results shown by the better-class mining companies of British Columbia, stocks are selling away below what we believe to be their true value.

Lead and zinc stocks, such as Reeves-McDonald, Noble Five, Pend Oreille, Ruth-Hope and Whitewater, are unquestionably out of line and should be picked up before the market gets away.

British Columbia loses Thousands of Dollars each year

INDEED, it's true! Thousands of hard-earned Western Canadian dollars pass the doors of British Columbia every winter—on the way to California. Within a short time these Western Canadian residents—farmers, professional and business men—will be seeking a spot to take their well-earned winter's rest and holiday. Keep them in British Columbia.

The Winnipeg Free Press has been firm in its contention that British Columbia ranks with the best of winter resorts. It has constantly urged the people of the prairies to spend their winter vacations there—and their money.

Should you wish to know what these people are interested in, here's a partial list: British Columbia hotels, resorts, fruit and farm lands, homes for sale or rent, poultry and other small ranches, businesses for sale, investments.

Should you wish to get in touch with these good, financially sound prospects, then it is advisable to use the advertising columns of the

Winnipeg Free Press
(Daily)
And the
Free Press Prairie Farmer
(Weekly)

Your Best Salesman

Your best salesman is usually the one who thoroughly covers his prospects regularly. The Winnipeg Free Press and the Free Press Prairie Farmer cover the best of the prairie west prospects with a combined circulation of over 215,000. For rates, sample copies and further information, write to the Manitoba Free Press Company Limited, Winnipeg, Manitoba.

Over fifty million packages are sold each year.

NOGALAN TEA

'Fresh from the gardens'

CHAPTER XXXIII

Shallimar-Morris had come to visit Helen. Without a word of warning and with her luggage well packed with a killing wardrobe.

"But if you don't want me, old cauliflower, I'll dash along on my way to Canada. Would stop a moment with you, however, should you urge me."

She was laughing, and different. Her laughter was louder, but it tinkled musically. Helen puzzled over the change in her. She seemed restless, stirred, unhappy. There was pain in her eyes. Her dark beauty was somehow more brilliant, yet somehow clouded.

"To marriage," was the cryptic toast she offered when refreshments were brought.

Helen's silence repeated the word with unmistakable inquiry.

"This is his wedding day," Shallimar went on, and drained her glass.

"Let's go up to my room and you can tell me about it," Helen said, sensing a confidence. To listen to another's story might make her own seem less important, she thought. For it had appeared to her that nothing in the world mattered but her love for Bob Ennis.

Shallimar motioned to the tray. "Have it sent up, too," she requested and Helen nodded in assent.

A minute or two later they had made themselves comfortable in Helen's room and Shallimar plunged into her story without preliminaries.

"I fell in love," she confessed, "with an engaged man. He wouldn't break it off, and to-day he's saying, 'I will' to a girl of nonsensical beauty. Any listening to that? Not that it makes any difference—I mean about his being married now—but I can't forgive him for not refusing to give it up. He said if I was any kind of Diana I could get my man against any odds. We quarreled about it—and here I am!"

"And here you'll stay," Helen told her abruptly. Then, her voice softening with a note of sympathy, "I'm glad you came, Shallie, darling. I've been awfully lonesome for some of the girls."

"My grandfather was ill," Helen explained, "and . . ."

"Never mind," Shallimar broke in. "Are there any men about?"

"I'm afraid you won't stay," Helen laughed.

"At least until morning," Shallimar promised.

But by morning she had decided to postpone her stay indefinitely. Any man was game for her now. She was going to be reckless, ruthless, and revengeful where the male of the species was concerned. And she had met Bob Ennis.

Helen had telephoned Eva and invited her to dinner to meet Shallimar, knowing that her guest would prefer company and a later hour for intimate talk.

They had an interesting forty-five minutes at table—Shallimar simply wouldn't remain there any longer—without the restless fussing of her hostess of tidbits of gossip about school friends in return for a delicious dinner.

Eva was fascinated with her, a fascination in which Shallimar took keen delight. She saw that her scornful remarks about men were received by the younger girl with great respect. "Some fellow has tried a masculine trick or two on her and she's snowed under," Shallimar decided the while she smiled and curled her fine red lips contemptuously.

Helen felt impelled to remark that she didn't believe Shallimar was so bitter as she sounded.

arise she much preferred to trust to Eva's understanding and sympathy to help her make the most of it.

Shallimar would, intentionally or otherwise, interfere. Helen feared.

The darkly beautiful girl chose to interfere intentionally. Bob was just arriving home when Helen drove her car up to the curb and pressed the brake pedal for a smooth stop. As Bob's figure loomed up in the moonlight she felt a wild desire to call to him: "Bob! I love you! I love you!"

"Hello," he said, so quietly she was amazed at herself.

"Ah, a man, a tall man, and young, I vow," Shallimar said. Helen caught the meaning of her words. She had significance for her at the time. She did not know how deep lay the hurt in Shallimar's heart as well as in her eyes and that she was, for the present, viciously serious in spite of her mocking words and careless manner.

"Oh, Bob!" Eva called and he was compelled to stop, although he had already hurriedly turned away to enter the house, hoping to escape unobserved and seek his room before the girls got in.

Reluctantly he turned back, and tried to greet Helen as casually as he had greeted him. But his voice was raspy and the words jerked out discordantly.

"A savage," Shallimar characterized him to herself. "All the better, if only he's as good looking in a better light as he appears now."

A little later, a minute or two, she saw that he was looking at her. At least, that she hoped he would be. Eva had turned on a subdued light in a table lamp, but Bob, governed by long habit, got a good look at Helen, who was standing in a shadow, snatched on a bright overhead light and flooded the room with brilliancy.

"A little later, a minute or two, she saw that he was looking at her. At least, that she hoped he would be. Eva had turned on a subdued light in a table lamp, but Bob, governed by long habit, got a good look at Helen, who was standing in a shadow, snatched on a bright overhead light and flooded the room with brilliancy.

DOROTHY DIX

DEAR MISS DIX—I am twenty-three. Surely a third of my life is gone, perhaps half, and I never had a beau. I am not bad looking, dress well, am a high school graduate and have a splendid position with a very large concern. They say most old maids do not marry from choice, but if I should remain single it will be because I never had the chance to say "Yes" to the right kind of man. Am trying to treat this subject philosophically, but I am really worried. The fact that my parents are beginning to get just the least bit uncomfortable because I sit around alone all the time does not add to my peace of mind. I wonder if I expect too much? The man I could love must be a gentleman, well-bred, cultured, lovable, good-natured, good social standing and with a substantial income. What advice can you offer? MIMI.

Answer—Oh, I think you are rushing the Anxious Seat, Mimi. A girl who is only twenty-three has surely no need to worry about the danger of not getting married. Even the shadow of the spinster's Retreat hasn't fallen across her pathway and won't for years to come.

Perhaps the reason that up to now you have not had any dates is because you are the type of girl who appeals to older men and not to boys. Perhaps you have never been, not even in your school days, one of the flapperish, giggling, gum-chewing girls that boys as callow as themselves like to rush and play about with and crowd into dilapidated flippers with weird mottos painted on them.

Very often sane, sensible, dignified girls, and especially girls who are unusually intelligent, are passed over by the boys of their own age and are wallflowers in their youth, but are betters later on when they come in contact with older men who are capable of appreciating them. And very, very often the girl who has few beaux makes a far better match than her more popular sisters.

The girl who is beautiful but dumb, and who has nothing but a pretty face to recommend her, is at her best when she is very young. But the girl who has intelligence only just begins to come to herself by the time she is twenty-three, and she grows in attractiveness for the next seven or eight years, and so you see you have a long day before you in which to make your matrimonial hay.

As for the qualities you demand in a husband, they certainly sound like an inventory of a Fairy Prince and I hope he will come riding along on his milk-white steed and bear you off to your castle of dreams, and that you will live happily ever afterward. But, my dear girl, men who are gentlemen and who have elegant manners and fine social connections and who are kind and sweet and popular and rich to boot are about as scarce as hen's teeth and when they are found they are holed up by other women also desirous of having a perfect husband.

So I think you will have to scale down your requirements a little. Perhaps you could cut down the income a few thousand. Or do without a college degree. Or not require too much suavity of manner and so bring your demands more within the ability of the ordinary man to meet.

However, there isn't any use in borrowing on this score because when you fall in love you won't look at the man's bank account or care whether he is homely or as handsome as Valentino and you will think he is the most eloquent and entertaining man you ever heard talk when he tells you that you are simply "IT" with him and that he never loved before.

But if love should chance not to come your way don't make a tragedy of it and think that there is nothing in life for you because you haven't made a hit with men. You have your family and friends. Your good business. Your independence. Plenty of things with which to fill your life with interest and pleasure.

And don't marry just to be a-marrying and because you don't want to be an old maid. Don't marry at all unless the right man comes along. Just remember that a marriage is either a heaven or hell and that if you are not elected to heaven you are mighty lucky to escape the other place.

DOROTHY DIX.

DEAR DOROTHY DIX—I want to make money. Lots of it. Am twenty-five years of age, have a secretarial position with a good salary, but I have reached my limit financially in that capacity. Have entertained the thought of a tearoom or restaurant, but do not know whether this proposition is remunerative or not. My experience has been confined to office work, but I feel that now is the time to plunge while I still possess good health and activity and have a striking appearance. Have you any suggestions to make in the matter? MISS F. D. H.

Answer—One, and I want you to heed it. Before you invest your savings in any business of your own get a job in that particular line and work up from the bottom to the top so that you will know all the difficulties and just how to meet them.

Every door of opportunity in the commercial world is open to women now and there is just as good a chance for women to make fortunes as there is for men. But if they do they have to go about it just as men do and use the same tactics. They have to investigate the thing in which they invest their money with a wary eye. They have to be cautious. They have to be thorough. They have to learn to be good buyers and good collectors.

And women seldom go into business this way. They plunge into a thing without knowing anything about it. Some girls talker tells them about the good points of an investment and they jump into it without ever finding out the bad points and so lose everything they have. Every fraudulent investment concern has a long and profitable sucker list of women.

It doesn't make any difference what sort of business you go into it is the way you go into it that counts. Fortunes have been made out of tearooms and restaurants by women who knew how to cook and to cater and to buy and who picked out locations where there was a demand for such places of refreshment. And thousands upon thousands of other women have been bankrupt by tearooms and restaurants because they knew nothing on earth about how to run one, and got on the wrong street or on a country lane that nobody ever passed through.

So, Miss F. D. H., pick out your business first and serve an apprenticeship in it and then, when you have all the pitfalls at somebody else's expense then when you put your own money into a tearoom or a shop you will have at least a Chinaman's chance of making a success of it.

Also bear in mind that a good salary is a mighty safe and comfortable thing to have and that if you will save systematically and let the interest compound it makes a mighty reliable umbrella for a rainy day. Not everybody, and especially not every woman, has the executive ability to run a business successfully. Nor does the desire to get rich quick insure your doing it. Oftener it leads to bankruptcy. DOROTHY DIX.

DEAR DOROTHY DIX—Is a girl of twenty-four really in love if she feels embarrassed by the looks and slow ways of the man she is engaged to even though he is dear and kind and good and worships the ground she walks on? Do you think this couple will be happily married when the girl feels herself superior to the young man? Is it natural that a girl who has doting parents and a good home should feel kind of shaky about getting married although she believes she loves the young man? BUDDY.

Answer—I don't think that it makes for the happiness of any couple for the wife to feel herself superior to the husband. Women like to look up to their husbands and husbands like to look down on their wives, so the arrangement is mutually satisfactory. But it is quite otherwise if the wife condescends to her husband and is always criticizing and correcting his manner and his grammar and his pronunciation.

You often see a man married to a dowdy woman who doesn't know how to dress and who murders the King's English and who is as awkward and ill at ease in company and he never seems to be embarrassed at his wife's lapses or to mind them, but a woman writhes when her husband looks provincial or acts like a boob and when he voices ignorant opinions.

Any girl who has any sense gets shaky just before marriage and feels like drawing back. So does anybody who is about to jump off a precipice into the unknown. It is a scary business and enough to give anybody cold feet. DOROTHY DIX.

YOUR HOROSCOPE

SUNDAY, OCTOBER 13, 1929

Astrologers read this as a fortunate day, ruled by strongly benefic aspects. The morning is most favorable to the clergy making for appreciation and co-operation on the part of the people. The day is auspicious for church extension and for reform efforts on a large scale. It is a day stimulating to educational movements and inspiring to all who seek high attainment. The rule is believed to increase the chance of hyper-sensitive reactions to criticism, and for that reason parents should be wise in all rebukes administered to their children. While there is an adverse aspect governing satisfaction of money to-day, the stars seem to promise great contributions toward charitable and philanthropic movements before the close of the year. Under this direction of the stars the public mind may be depressed regarding the prevalence of crime and the indifference to law, observance, but gradually the nation

is to solve many of its most perplexing problems, the stars foretell. Scientific study of world conditions is to furnish many a key to change and general advancement of civilization is prophesied. The evening of this day is more propitious for the old than for the young. The stars seem to ignore lovers and their romances. Increase in the number of weddings and a falling off in the proportion of divorces is pressed. According to London, the coming holiday time is to bring England and the United States into closer accord. Prosperity is to make the Christmas expenditures even greater than in previous years, it is predicted. Persons whose birthdate it is have the suavity of a lucky year. Success may come through what appears to be persecution and enmities. Children born on this day probably will be exceedingly serious in mind and fearless in advocating right. Reformers and patriots belong to this sign. Molly Pitcher, American heroine, was born on this day, 1744. Felix Adler, scholar,

1891, and Martha Lamb, historian, 1839, also had it for a birthday.

MONDAY, OCTOBER 14, 1929

Similar influences in planetary government are strong to-day, according to astrology. It is a day for circumspect action in business and domestic affairs. In the morning there is a star read as affecting the mind so that its judgment is untrustworthy. The extremes of optimism and pessimism may be equally unfortunate. Under this direction of the stars it is

supposed to be easy to deceive and variations from the truth are said to be more than usually common. While this planetary government continues, men may fall into small devilish tricks of duty. They should beware of the first domestic camouflage. It is not a lucky day for seeking positions or for asking for promotions. Plans may be extraordinarily critical and difficult to please. There is a promising aspect for whatever constructive and progressive. This is a time to plan for future achievements.

The young now come under a direction of the stars that is believed to be most beneficial, making for a better understanding and fuller appreciation of their modern ambitions. Business and scientific men who have been recently graduated from colleges have the prospect of speedy rise to success. All the planetary influences appear to be toward a gradual stabilizing of world activities and a drawing together of the peoples of the earth. Again the stars foretell for India a plague that will be of serious character.

Warning that the conjunction of November 1 presages for England either a war or a great fire has been given by foreign astrologers. Jupiter will be in a place supposed to be especially favorable to the United States, Mexico and South China. Persons whose birthdate it is may encounter much that is puzzling in the coming year, but they should be patient and happy. Children born on this day probably will succeed through their own courage and perseverance. The subjects of this sign usually

are independent and exceedingly conscientious. William Penn, American pioneer, was born on this day, 1644. (Copyright, 1929).

\$200,000 BAIL DEMANDED

Winnipeg, Oct. 12.—Magistrate R. B. Graham created a new record for the Winnipeg police court yesterday when he set bail for Charles Galsky, charged with a \$200,000 offense against an eighteen-year-old girl, at \$200,000, the sum demanded being higher than any amount previously set by a magistrate of the city police court for any case.

HARRY LAUDER IS FISHERMAN

Famous Scottish Comedian,
Here Monday, Has Two Dis-
satisfactions, Reports Disclose

Sir Harry Lauder is a mighty fisher-
man. The canny little Scottish enter-
tainer, so far as known, has only two
dissatisfactions. He will spend long hours
with a fishing line, and on the slight-
est provocation he will run away from
the crowd and the noise of the city
for a few hours on the golf links.

At home, in Dunoon, Scotland, his
estate faces the Clyde, but it is not
there that Sir Harry gets his greatest
piscatorial enjoyment, although the
Clyde has many big game fish. He
prefers the mountain streams for
fishing, and there are many of them
in hills of Dunoon.

While in New Zealand, from which
he has only recently returned, Sir
Harry spent much of his spare time
fishing in some of the remarkable
streams with which that country
abounds, and his "catches" were re-
ported unusual both in size and
numbers. Anticipating the scepti-
cism of those who do not enjoy the
sport of trout fishing, Lauder had re-
turned with his largest rainbow trout stuffed
and mounted. One weighed ten and
a half pounds and the other slightly
over nine. He has sent them to his
home at Dunoon, Scotland, to greet
him on his return to hitherland
after his current tour. Local cronies
of the canny Scot are preparing for
some tall fish stories when he ap-
pears at the Royal Victoria on Monday
and Tuesday next.

On one of Lauder's fishing trips he

landed three striped bass, the largest
weighing twenty-seven pounds, after a
long and rather discouraging wait.
"I was losing heart," says Sir Harry,
"when I thought myself of beguiling
the fishes with a song. So I sang a
bit of 'I Love a Lassie.' When that
failed I told 'em a story—sure it was
a canny story—the story of the boots
who was polishing my footwear in
front of the door of my room. Says
another boy, comin' along, 'Wot yer
workin' their for?' 'Sure, I have to,'
says the first lad, 'that Scotchman in
their won't let go th' strings.' At that
the fish began to bite, and I pulled in
three in as many minutes."

PLANS ATTRACTIONS FOR DINNER DANCES

A. H. COWLISHAW
manager of the Crystal Garden,
who is now arranging special at-
tractions for the winter dinner
dances at the garden every
Wednesday evening. Although no
definite plans have been an-
nounced, Mr. Cowlishaw is consid-
ering vocal soloists as well as solo
dancers for these functions.

Sir Charles Villiers Stanford, Nineteenth Century Composer, Rated One of England's Best

Contributed Much to English Musical Works; His Songs
Have High Place in Music Literature; Sound Film Not
Yet Developed; Big Artists Enter New Field; Concerts
Will Continue All Time; Opera Is Alive Everywhere;
Offenbach's Operas Still Live; Trinity College Has New
Director; A New Life of Handel; Organ Recitals For
Business Men at 1 o'clock.

By G. J. D.

Sir Charles Villiers Stanford was one of England's most distinguished musicians of the nineteenth century. Indeed, he may be accounted one of that country's greatest composers of all time. He was a man of wide culture and knowledge and in many quarters his work carried great weight. He contributed generously to the repertoire of English works and his opera numbers reach about the 200 mark. He wrote seven operas and much incidental music to the works of the great poets. The "Dogberry" music of "Much Ado About Nothing" is particularly happy, and the Irish Rhapsody in D minor, which introduces "The Londonderry Air" is very effective. Among his choral works, his "Stabat Mater," "Reverence" and "Songs of the Sea" have been conspicuously successful.

He wrote seven symphonies and many orchestral works, and his chamber music was at one time played extensively. In the direction of these, younger British composers have, for the moment, displaced him, as they speak in a more modern vocabulary and by nature are less conservative and less patient.

SOME STANFORD SONGS

Besides much church music and choruses, his songs will, perhaps, find a place in music literature longer than anything else he did. In these he is most himself, uninfluenced by others—his chamber music was over-
influenced by Brahms. Three of his songs may be studied and included in the vocalist's repertoire: 1. "There's a Bower of Roses," 2. "La Belle Dame Sans Merci," and 3. "The Fairy Laugh."

The first comes in an early opera, "The Veiled Prophet of Khorassan," a work produced in Hanover in 1881 and once at Covent Garden. The original key was in D flat minor, but the published edition stands in A minor. Its compass is rather wide (C to high A) and needs a "mezzo" voice of some range and power. The accompaniment has a richer support chords in quaver movement and rises to a climax at the words, "Is the nightingale singing there yet?" The poem is by Thomas Moore.

The second is a fine dramatic song and would suit a baritone who has imagination. It is one of Stanford's early songs and is set to words by Keats. Its accompaniment is full of rich harmonies. At the words, "I met a lady in the meads," it changes skillfully in phrase, gaining music in rhythmic variety and, after further skillful treatment, returns to the minor key. There are dramatic movements later on, after "Kisses four" and "the latest dream I ever dreamed," with a close in G major, then suddenly to D minor. The climax to this song was interpretation and a good command of resource.

ONE OF HIS BEST

The third song is full of imagination and is one of the finest songs Stanford ever wrote. He was never happier than when dealing with Irish subjects and this Irish lullaby of Morris O'Neil's seems to have appealed to him deeply. The sense of mystery is conveyed in the opening piano part and when the voice enters to the word "Loughareema." The melody is an easy swinging one and a fine phrase is that which carries the whole down on the words, "The water's black as a deep." Some pianist's are delightful and the pianist in the accompaniment has some delicious little upward gurgling scale-like to the words:

"A little wave runs up the shore
As if it were on foot."
And again, first the smooth water,
then the fluttering moth and, lastly,
the almost inaudible gallop of the
Norman—surely all is the touch of a masterhand.

WHAT OF THE "TALKIES"?

That the sound-film—the "talkies"

—has come to stay is beyond question, but what will be made of it is another matter. To the writer it seems also to be far short and different from what might be made of it. At the moment the question of expense, with the resultant need of wide popular appeal, seems to operate as a development on purely artistic lines. For some time to come we may reckon on a succession of productions improving rapidly in technical achievement, and, as art, after the style of the "talking pool." More serious productions will doubtless arrive, and already we are told that famous singers are going over to a very profitable field for their activities. Chappell and his friends have been mentioned among these. Mary Garden, famous prima donna, is said to have recently remarked that concerts are a thing of the past. "I hear that opera in its present form is next to go."

Mary Garden knows New York, and other big American cities better than herself, but her own criticisms are difficult to credit that concert "are over" even in these large music centres. They are not "over" anywhere, and only a week ago I wrote of music's concert and recital outlook throughout England, Continental Europe, America and in Canada. Opera, for the moment, displaced him, as they speak in a more modern vocabulary and by nature are less conservative and less patient.

Offenbach still lives in his music! Some weeks ago that excellent theatre manager, Sir Nigel Playfair of London, gave a splendid production of Offenbach's "La Vie Parisienne" at the Lyric Theatre, Hammersmith. The opera was beautifully produced and dressed, and many of the fine acts took the fancy of the immense crowd, and the chorus shared honors with the principals.

THE NEW DIRECTOR OF TRINITY COLLEGE

Stanley Roper, M.A., Mus. B. is the new director of Trinity College. Roper is a Londoner, and received his early musical training at the Westminster Abbey Choir School, under the late Sir Frederick Bridge. He then, he won an organ scholarship at Corpus Christi College, Cambridge, and was for a time assistant organist to Westminster Abbey. Ten years ago Mr. Roper was appointed organist, composer and choirmaster of His Majesty's Chapel Royal, which include St. James's Palace, Buckingham Palace and Marlborough House. He left the Abbey in 1922, and took over the post of musical director of St. Margaret's, Westminster, and has officiated at almost all the fashionable weddings there.

The 1929-30 season of symphony concerts to be given by the British Broadcasting Company opens to-night in Queen's Hall. Twenty-three concerts will be given, and the conductors include Sir Thomas Beecham, Sir Henry Wood, Sir Landon Ronald, Hermann Scherchen, Franz von Holstein and Ernest Ansermet.

All the concerts during the season by England's new National Chorus are to be broadcast. Three principal soloists will be given, and many "novelties" will be heard.

The last symphony concert of the summer at Bournemouth took place on Saturday, Wednesday, October 2. Sir Dan Godfrey, conductor of the Bournemouth Municipal Augmented Orchestra, has a prodigious winter season at the magnificent New Pavilion.

The last of the 1929 "proms" at Queen's Hall took place on Saturday last. The occasion took the form of a popular Saturday night programme of music by various composers. One familiar with these concerts can picture the parting scenes and the picture of enthusiasm that usually prevail. There is no other place in the world like Queen's Hall during the reign of the "Promenade." The nightly attendances are always great and musical people "rub shoulders" together. The night at the "Prom" is unforgettable.

NEW LIFE OF HANDEL

Newman Flower has just completed a new life of George Frederick Handel. Some time ago he completed a book on Schubert. Both are treated enthusiastically and are voluminous. The Handel book occupied him four years. He seemingly loves detail, for nothing escapes him. On the first page we meet Handel's ancestor arriving at Halle, whither he had journeyed from Breslau, as a journeyman coppersmith. The remarkable man, who was Handel's father, was grandson of this coppersmith. It is only by reading the history of Handel's father—George Handel—that we realize how near to not being born at all the famous composer was. The father of Handel was thin-lipped, determined, obstinate, silent man. His marriages seemed to have the appearance of chance or accident. As a boy he was apprenticed to a barber-surgeon, who had a young wife. This barber died with startling suddenness leaving his practice and a wife not yet thirty-one. George Handel was scarcely twenty-one, and, seeing the practice going begging and Anna, the wife willing to marry, he got the practice as a dowry on his

marriage to her. His wife died when he was sixty, and six months after her death he proposed and was accepted by Dorothea Taubert, aged thirty-two, daughter of Pastor Taubert. His first child died, but the second, a puny infant, became the greatest Handel, who fought his way through life, and now lies in Westminster Abbey. The importance of this part of the book is very great, as it shows the character of Handel's father and sets the key to his son's performances. Old George Handel loathed the idea of his son as a prodigy, which at that time social conditions attached to the position of a musician. Through the Duke of Weissenfels, who noticed the musical genius, young Handel followed music as a profession, and became a pupil of Zastrow, an organist at Halle, a musician of much experience and knowledge. Handel responded to his master's enthusiasm with such zeal that at the age of eleven he left Zastrow as a finished organist. Even with all this Handel's father softened when he saw the boy's talent, and when he went to Berlin, the Elector wrote his father imploring him to hand over his son that he might take responsibility for young Handel's training, old George Handel commanded his son to pack up and return home at once. The boy obeyed soon after these events his father died.

Further details of the wishes of his father appear in the book and continue to the time when the boy undertook the duties as organist of the Halle Cathedral, which occupied a position and his last studies at the Halle University, and proceeded to Hamburg, where he met Johann Sebastian Bach, another talented musician, and the two became friends. The author draws a vivid picture of the famous Bernard Kellner, who did so much for seventeenth century German music. Later Handel produced his first opera, "Alcina," which again brought his enemies back to the wall and fought on. From Hamburg he came to Italy. Then he went to Germany again, but with the full flush of eager manhood he went to England and made a clean and complete conquest. This part of his life is of course well-known to nearly all musical people. Handel's last visit to

his native place must have made a bewildering impression on him, for the book describes the many changes since he left for English shores, particularly the grief he felt when he learned that Bach had made several unsuccessful attempts to meet him. The passage of Handel across the stage of life recalls Hannibal's triumphant passage across the Alps.

UNIQUE SPIRITUAL LIFE FOUND IN LONDON
The city of London, England, besides its prodigious business activities, has a spiritual life not often spoken of. Nowhere are such contrasts of "phases of churchmanship," in ritual and types of musical service, to be found as in London. St. Margaret's, Westminster, is an instance of a church filling many parts. It is closely associated with the House of Commons, and is a favorite church for weddings, especially "fashionable" during last spring and early summer. It is a parish church, for it has a congregation drawn from the neighborhood, in addition to others from a distance, and it has long enjoyed a musical reputation. There is always an anthem at both services, and congregational singing is encouraged in the following manner: The first canticle to a setting, and the second to a setting are sung on Sunday by the congregation, and on the following Sunday by reversing the process. New hymns are first introduced by the choir in unison (singing alone), and again in parts. St. Margaret's is well-known for its organ recitals, which are given at 5.30 on Saturdays, which have been consistently maintained since the days of Edwin H. Lemare, when he was organist there from 1887 to 1902.

The late Edwin Stephenson and Reginald Goss-Custard have since followed in these recitals. Christ Church of Vancouver has for a number of years been famous for its Saturday "twilight organ recitals." St. Margaret's has recently started a series of recitals at 1.15 on Fridays, and many musically minded business men from the large office staff of Whitehall and large number who welcome the opportunity of hearing good organ music on a big, successful Walker three manual organ, in the quiet and devotional atmosphere of an old and dignified Anglican church.

AT THE THEATRES

"BIRD IN HAND" CLOSES TO-NIGHT

To-night Victoria playgoers will be given their last opportunity to see John Drinkwater's celebrated English comedy, "Bird in Hand," at the Royal Victoria Theatre.

This clever and most amusing comedy of rural English life has been imported by Lee Shubert, the prominent theatrical producer, and so as to assure Canadians that they would see in English what it enjoyed more than a year's run at the Royal Theatre in London, he placed Mr. Drinkwater in complete charge of the selection and direction of a special all-British company that will tour the leading cities of Canada and the United States. "Bird in Hand" is Drinkwater's first comedy, marking a distinct departure on his part from more serious dramas, such as "Abraham Lincoln," which brought him international fame some ten years ago, and others such as "The Divine Lady," "Robert E. Lee," and "Mary Stuart." "Bird in Hand" that he owes his fame, and greater fame, for it was the first rank of comedy writers and proved him to be one of the foremost dramatists in England.

The play deals with life in rural England but treats with a subject that touches every family intimately, no matter what nationality, telling its story with a conflict of old English morals and modern youth, making the whole thing one of the most delightful and humorous comedies that have come out of England in years. It will be played here by Freda Bruce Lockhart, Olga Bladen, Percy Rhodes, Dennis Morgan, Elvira Madigan, Richard Littlejohn, Douglas Jefferies and Arthur Ridley.

GRIPPING PLOT TO FANNY BRICE FILM AT THE COLISEUM

"My Man," Fanny Brice's widely-read novel, will have its final showing at the Coliseum Theatre this evening. The feature to start at 7 o'clock and 9 o'clock. Miss Brice, who is a clever actress as well as a brilliant writer, plays the leading feminine role in her own story and gives a splendid and creditable performance. She is a talent in a rather difficult role in "My Man."

Produced over the new talkie machine, recently installed at the Coliseum, Miss Brice's voice is heard to perfection. She has a pleasing charm to her voice and every syllable is clear and distinct. The story is of the age-old love between man and woman, set of course in this picture to modern times and conditions. The plot is a gripping one and the splendid cast well enacts the various roles.

MARIE PREVOST IS HEARD IN SONGS IN "THE FLYING FOOL"

Although Marie Prevost had never been on the stage before the advent of talking pictures, she sings two songs in "The Flying Fool," starring William Boyd, that are bound to be popular. "The Flying Fool" are "If I Had My Way," "In That Way About Baby," and "The Flying Fool" by George Green and George Wagner.

Where To Go To-night

THE SCREEN
Capitol—Douglas Fairbanks Jr. in "The Careless Age."
Coliseum—Fanny Brice's "My Man."
Columbia—Corinne Griffith in "The Divine Lady."
Dominion—Marie Prevost in "The Flying Fool."
Playhouse—Olive Borden in "Love in the Desert."

THE STAGE
Royal Victoria—John Drinkwater's comedy, "Bird in Hand."
Crystal Garden—Swimming and Dancing.

E. BARRINGTON'S "DIVINE LADY" AT COLUMBIA THEATRE

The best-selling biographical novel of recent years, E. Barrington's "The Divine Lady," has reached the screen at the Columbia Theatre. First National staged it on the most elaborate scale of any of its big productions, with accurate historical backgrounds and thrilling reproductions of naval battles in Lord Nelson's time. It deals with the romances of the famous Lady Hamilton, starring Corinne Griffith in that role.

OLIVE BORDEN IS DESERT HEROINE AT THE PLAYHOUSE

Olive Borden, piquant brunette screen beauty, who reached stellar heights in phenomenal time after her entry into filmdom a few years ago, is portraying one of the featured roles in "Love in the Desert," her third picture for F.B.O. this season, at the Playhouse Theatre. A few months ago she was featured with Jack Pickford in "Gang War," the thrilling photoplay of San Francisco's underworld which has proved a whitening success, and following that Miss Borden played the lead in "Sinners in Love," another F.B.O. winner.

CARMEL MYERS HAS TALKING ROLE IN "THE CARELESS AGE"

Carmel Myers, who is seen in one of the two feminine leads in "The Careless Age," the First National-Vitaphone all-talking picture which is showing at the Capitol Theatre, will again sing in

Week-end Cables and Special Dispatches From Across the Atlantic

London's Aristocratic Russians Oppose Recognition of Soviet "Tiger of France" Preparing For Death; But Not Ready To Go Yet

Clemenceau, Now 88, Still Holds Spirit Of Fiery Old Warrior

The Tiger of France is preparing for death. He's eighty-eight now, is Georges Clemenceau, shown upper left in his last photo, and he says philosophically that he probably will not see another birthday. Meanwhile, in the simple little cottage at Vendee, pictured below, he works on his memoirs. Upper right is the marble monument which will mark his grave.

Special Dispatch to The Victoria Times
PARIS, Oct. 12.—"I have quite made up my mind to die some day, probably within a year. But not yet awhile, for I have too much work to do."

M. Georges Clemenceau, fiery statesman, "Father of Victory" and, since the signing of the peace treaty, a philosophical recluse, chuckled sarcastically at a group of Parisian newspapermen who assailed his windworn little cottage overlooking the sea at Vendee and inquired after his health.

He was eighty-eight years old the other day, and he spent the birthday working on his memoirs, which must be finished before his death. His doctor, eminent Paris specialist, had gone to Vendee, and this gave rise to reports that the premier might be ill again.

He certainly didn't look it when his peace disturbed, he shouted at his visitors what would be the literal translation of:

"Get the hell out of here!"

"THE TIGER" TO THE LAST
He was his old self. "The Tiger," at eighty-eight, dominant, crusty and formidable, but after his first outburst there appeared that characteristic twinkle in his eye. He remained long enough to make a few stinging remarks that would indicate that even in his death he would have a last ace up his sleeve to surprise and outwit the people of his beloved France. He warned his listeners that when he dies they won't know about it until even his remains are beyond their reach.

"Anyway, it's not going to happen suddenly, even though you would like to see me pass out in such a way as to give you a good story," he said. "I'll die slowly and I've already made all arrangements."

"If I die in Paris, they will put me in a coffin as soon as I am dead and ship me to Vendee without drum or trumpet. In that way nobody will be bothered by my obsequies, not even myself. If I die at Vendee I will be right on the spot and it won't be the least trouble to anybody."

INTERMENT IS PLANNED
M. Clemenceau has made all plans for his interment in a park near his modest country home. There is already one grave there, that of his father, A. Georges Clemenceau, and beside it there is a place ready to receive the remains of the "Grand Old Man of France," as Lloyd George once called him.

A marble stone has been erected to stand in front of the two graves. The spot is isolated among the trees.

At the foot of the tomb of his father and his own grave, Clemenceau has erected a marble monument. It is the work of the sculptor Suard, and represents a helmeted Minerva, designed by "The Tiger" himself from sketches he made during a trip through Greece long ago.

By his remarks, his friends believe ways oversleep themselves on the Sab-

he is determined that no state funeral shall be given in his honor and that his burial, probably without a service, will be done as soon as possible after his death. If he has not so ordered, he almost certainly would be accorded all possible honors and a funeral similar to that given Marshal Foch.

EXPLAINS HIS FAITH
M. Clemenceau's lack of belief in a hereafter is already well known, but he added a word when he was on the subject of his death:

"Concerning my philosophy," he said, "I am an atheist, but not in the ordinary sense of the word. When a fine woman once reproached me for destroying her faith I replied to her and to the Jesuit at her side:

"When I go to bed, it is with the hope that I shall sleep well, and not with the hope of waking up."

KING AND QUEEN STEADY READERS OF NEWSPAPERS

Reuter's Special to The Victoria Times
London, Oct. 12.—While all the members of the Royal Family are of an active rather than a studious temperament, they are versatile—if not omnivorous readers.

The King is perhaps a greater reader of newspapers than any of his family. All phases of public and social life interest his Majesty, and accordingly he is a regular reader of the daily and periodical press.

The Queen, too, reads the morning papers thoroughly as part of her routine duties each forenoon.

The Prince of Wales has a catholic taste in daily reading, while the Duke of York's interest in engineering and mechanics is reflected in his choice of papers and books. The literature of the motor car makes a special appeal to him.

NO SLEEPING IN ON THIS PARSON

Reuter's Special to The Victoria Times
London, Oct. 12.—People who write to the papers complaining that their precious sleep is disturbed by the ringing of church bells should read about John Fletcher, the saintly vicar of Madely, the bicentenary of whose birth falls this week. Perhaps, then, they will give thanks that they did not live in "the good old days."

Some of Fletcher's parishioners continually absented themselves from early Communion on the plea that they slept through the service.

Prince Denies Plan to Sell Alberta Ranch

Says He Will Likely Come Out For Visit Late Next Spring

He Is Now Kept Busy Paying Visits For King; Travels By Own Aeroplane

Reuter's Special to The Victoria Times
London, Oct. 12.—Looking bronzed after his golfing holiday at Sunningdale, the Prince of Wales has returned to St. James's Palace to complete the plans for a lengthy programme of engagements.

October is a busy month for him, and if weather permits he will not doubt use his new private aeroplane for some of his visits to the provinces. He is now undertaking many duties hitherto carried out by the King, and during his Majesty's period of convalescence has kept in close touch with his Royal parents for this purpose.

Meanwhile, Port Belvedere, almost bordering on Windsor Forest, which the Prince has taken as a country residence, is undergoing structural alterations. A keen lover of morning exercises, the Prince is having a gymnasium built there—one of his recreations since he abandoned hunting.

Several interesting additions are being made to this residence to enable the Prince to entertain, which, however, will not be on a big scale.

THE PRINCE'S RANCH
The rumor which recently circulated in London that the Prince of Wales was thinking of selling his Canadian ranch has been denied. On the contrary, his Royal Highness is more firmly attached to the place than ever, and although of necessity he had to forego his customary visit this year, he hopes to be able to go there for a short holiday in 1930, probably in the late spring.

Meantime his manager, Professor Carlyle, has been over here buying pedigree stock to be sent out to Calgary, and the Prince has spent some pleasant half-hours listening to his report on the ranch's progress and the results of some experimental stock-breeding work. The Royal ranch has long been recognized as one of the best-equipped in Alberta, and has been responsible for introducing many new strains of both cattle and horses into the West. It was originally purchased by the Prince of Wales on the advice of Lord Minto.

SUN BATHING FOR KIDDIES, LANSBURY PLAN

Reuter's Special to The Victoria Times
London, Oct. 12.—A London provided with agreeable pleasure grounds for the people is the ideal of George Lansbury, the First Commissioner of Works, who this week made a tour of parks and open spaces in London.

At Greenwich Mr. Lansbury noticed two children paddling on the steps leading down to the Thames.

"They must have their beach and pleasure place where they can forget the equator of the big streets," he said.

Mr. Lansbury announced that an anonymous donor had offered £5,000 towards the cost of providing facilities suggested for health and pleasure purposes in London parks. The offer is conditional upon the same amount being subscribed by the Government.

In addition, cheques from two other persons for £500 each have been received.

"What I have seen to-day has impressed me with the big possibilities for improvements in the parks and open spaces," said Mr. Lansbury. "Of course all these schemes are purely tentative at the moment. The Office of Works cannot set in a Mussolini way, for there are many people to be consulted, and what we want is to have all these schemes on a co-operative basis."

SUN BATHING FOR CHILDREN
Mr. Lansbury added that he wanted to see at the Serpentine, in Hyde Park, a shingly beach for bathing, and especially a part of the water reserved for children.

Another spot, he thinks, would be splendid for sun-bathing. It is a stretch of turf dotted with trees near the Zoo.

"My idea is to start sun-bathing for children only," he said. "I realize starting anything like this turns upon carrying the public and Parliament. There are a lot of arrangements to be made, but I hope to have sun-bathing for the kiddies, both at Greenwich and here, before long."

Colony of "Whites" Happy In New Freedom; Princes, Dukes and Titled Women Are Artists, Shop Owners, Teachers and Leaders In Society

Reuter's Special to The Victoria Times
LONDON, Oct. 12.—London's Little Russia is greatly excited over the fact that although the British Socialist Government has already made one abortive attempt to renew diplomatic relations with Soviet Russia, it expects to make another try some time this fall.

London's Little Russia was rather pleased when the last Tory government booted the Soviet diplomatic and trade representatives out of England. It will be equally displeased if relations are resumed. Little Russia in London is mainly White, and the Whites never can tell what mischief the Reds may be up to.

A NEW WANDERING RACE
It is estimated that since the revolution, more than two million Russians have left their country. They are scattered all over the face of Europe. The biggest colonies are in Berlin, Paris and London.

In the two former world cities are whole quarters which are inhabited by Russians. There are Russian restaurants and vodka bars, Russian theatres and cabarets and shops. There are, of course, aristocratic Whites, and scores of Russians are working as taxi drivers. They are conspicuous by their almost total ignorance of the language of the country and by their almost total lack of knowledge of the streets and locations.

AN ARISTOCRATIC COLONY
London's Little Russia is quite different. There are no Russian taxi men. The police authorities are too rigid in their examination of applicants. There are no Russian theatres and cabarets, but there is a Russian Orthodox church. London's Russia is largely made up of aristocrats and artists.

Some of them live on what they saved from the wreck of their fortunes.

Lydia Lopokova, once a famed dancer, she's now a professor's wife.

FINE PICTURE PRICES TOO HIGH, SAYS G. B. SHAW

Reuter's Special to The Victoria Times
London, Oct. 12.—George Bernard Shaw, in a note which he has written in connection with what is called an exhibition of pictures by Gertrude Harvey—it will be possible to buy any picture in it for £5—has something to say about art prices.

"In the economics of fine art there is no more tragic chapter than the history of prices," he states. "All my life I have been confronted in picture galleries with price lists consisting of hundreds of guineas attached to pictures for which no sane person, even of the millionaire class, could be expected to sacrifice more than £5, and outside the galleries were seedy artists, borrowing artists, begging artists, stealing artists, drinking and drugging artists, despairing artists, and dying artists. While on the pavement sat the scavengers to whom they shamelessly devoted the name of artists, with pennies enough pouring into their caps to save them quite comfortably from the razor, the pistol and the gas oven."

"Wisely did Mr. Tunks say when Mr. Roy Whistler painted the walls of the Tate Gallery at so much per square foot like an honest tradesman. 'Artists, your place is in the kitchen!'"

A TRAGICOMEDY
The Irish poet Yeats, whose name Englishmen sometimes rhyme with Keats (an error excused by a natural association of ideas), has told us how his father, a portrait painter of genius who held his own with G. F. Watts, was led by the hundred guinea mania to believe that he could afford to spend more than three months painting a single landscape from nature. But at the end of the three months spring had changed to summer, which involved repainting for another three months. By that time summer had changed to autumn. Before the necessary readjustments were complete the snows of winter had changed the landscape out of recognition. Yeats perceived that, as the subjects remained comparatively stable for fairly long periods. Only as they refused to give him sittings (as well as guineas by the hundred), he had to learn his business properly and polish off his job in a reasonable time as a house painter must."

THE WOOLWORTH PLAN
"Mrs. Harvey is a flower painter," continued Mr. Shaw. "Now there is no nonsense about flowers: they cut down the three months available for the landscape painter to three days or less. Recognizing the quality of Mrs. Harvey's work, I called her attention to that great American genius, Mr. Woolworth. I reminded her that I, Bernard Shaw, had been glad to receive £5 for so many of the best criticisms I ever wrote, and that George Russell, the painter, supported A. E. the poet, by editing a paper on week days and on Sundays painting an Irish (or Tipperary) landscape of extraordinary quality for which he easily found a purchaser at £5. This first one-woop show of £5 pictures is held in the practice room of Miss Harriet Cohen, the pianist, at 13 Wyndham Place, Bryanston Square, for a week."

course, aristocratic Whites, and scores of Russians are working as taxi drivers. They are conspicuous by their almost total ignorance of the language of the country and by their almost total lack of knowledge of the streets and locations.

AN ARISTOCRATIC COLONY
London's Little Russia is quite different. There are no Russian taxi men. The police authorities are too rigid in their examination of applicants. There are no Russian theatres and cabarets, but there is a Russian Orthodox church. London's Russia is largely made up of aristocrats and artists.

Some of them live on what they saved from the wreck of their fortunes.

Princess Lieven, now is Lady Studd, wife of the Lord Mayor of London.

social butterfly, much in demand. Another who is in a way a part of the London colony is Grand Duke Dmitri, who married the rich Cincinnati heiress, Miss Emory.

Grand Duke Michael, uncle of the late Czar, lived here for thirty years until he recent death. His son, Count Michael Torby, a painter by profession, exhibits here. The Grand Duke also left two married daughters in London.

Princess Lieven, a daughter of the Grand Master of Court Ceremonies of the late Czar, is the wife of Sir Knut Studd, who is the present Lord Mayor of London. She, therefore, is the presiding hostess at the Mansion House, where the Lord Mayor always lives. Another often seen in society is the wife of Sir Henry Deterding, the

been placed at her disposal by the King. With her lives her son, Prince Vassili. Both rather shrink from society affairs.

Another of royal lineage is Prince George of Russia, son of Grand Duke Constantine. By day he runs a west-end decorating shop. By night he is a

enormously wealthy head of the Royal Dutch Oil Co. She was Lydia Kenderoff, daughter of a famed Russian general.

Two famous dancers have married into well-known English families. Tamara Karavina married Henry Bruce, British Minister to Bulgaria, and Lydia Lopokova is the wife of J. M. Keynes of Cambridge University.

TITLED BUSINESS FOLK
Among the titled shopkeepers are Princess Soubatoff, whose husband was the head of Caucasian nobility; Princess Labanov, who runs a dressmaker's shop, and Princesses Putyatina and Marie Galtzine, who sell women's hats. Prince Vladimir Galtzine runs an antique shop and Prince Troubetzkoy helps his wife run a fashion shop.

M. Bark, former Russian Finance Minister, and Count Kleinmichel are financiers in "The City." Prince Minsky is professor of Russian literature at London University and Baron Meyendorff, vice-president of the old Russian Parliament, is connected with the London School of Economics.

QUEEN ELIZABETH LAUGHED AT THESE DANCES

"Merrie England" and the spacious days of Queen Elizabeth with Maypole and Morris Dance are being given new life in the Old Country within the present century and so great is the popularity of the revival that Hyde Park, the great London rendezvous of rank and society, has been gay with annual festivals of folk dancers in colorful motion. A century of industrialism has not been sufficient to kill the ancient urge and Cecil Sharp, thirty years ago, was astonished to see countrymen in an English village, fantastically appressed, come dancing through the snow one Boxing Day to the strains of a concertina. Eleven years later he founded the English Folk Dance Society which to-day has a membership of 15,000 with over fifty branches.

Lay-out shows groups of folk dancers in action: an English Folk Dance; Douglas Kennedy, leader of the English Folk Dance Society, doing a particularly snappy step accompanied by Joan Sharp, daughter of the founder, with Folk Dance Society which to-day has a membership of 15,000 with over fifty branches.

BRITISH MOVE FOR TOURISTS SUCCESSFUL

Reuter's Special to The Victoria Times
London, Oct. 12.—There can be no doubt of the success which has attended the activities of the Come to Britain Movement, of which Lord Derby is chairman.

For many years now we have allowed a rich harvest to slip through our fingers, but the experiences of this year should enable us to gather more richly next summer.

The season is now over, and in a retrospective glance the officials of the movement declare that it has constituted a record and that the thousands who are leaving our shores are doing so with a fixed determination to come back accompanied by their friends.

Complete statistics are lacking, but in May and June alone 30,000 Americans and Canadians entered our shores, and the total invasion approached 40,000. The figures for July and August will, it is expected, be found to be at least half as high again—a clear record.

Much of the credit for this state of affairs must go to those who had the ingenuity to devise circular tours commencing from the port of arrival of the visitors and lasting for anything up to three months.

King Absent At Partridge Shoot Parties

Doctors Don't Want Him to Take Chance on Expeditions

Prince and Brothers Going to Sandringham For Bird Season Gatherings

Reuter's Special to The Victoria Times
London, Oct. 12.—Despite the excellent progress the King is making at Sandringham, His Majesty is not able to join the partridge shooting parties this month on the Royal estate.

The coming of the autumn will bring with it a certain element of risk as regards outdoor occupations for the Royal invalid, and, although the sheltered position of Sandringham with its surrounding belt of pine woods is considered highly beneficial for the King's health, it is unlikely that the excitement and possible discomforts of a shooting expedition will be approved by his Majesty's doctors.

Up to the present the King has confined his walks abroad to the beautiful gardens immediately surrounding the house and the weekly visits to Sandringham Church.

TO SHOOT AT SANDRINGHAM
The Prince of Wales and his brothers are all expected to visit Sandringham during the partridge season, and shooting parties will be arranged for their benefit, to which, following the King's custom, many local landowners and tenants will be invited. Invitations to these parties are the more valued because the King himself, one of the finest shots in Europe, selects the names with a special regard to the prospective guest's qualifications as a shot.

Prospects for the partridge season are good at Sandringham, but it is unlikely that any shooting will be done until the end of the month, when the Duke of Gloucester is expected to join the King and Queen for a few days.

NAVAL LIMITATION LESS COMPLICATED NOW FOR BRITAIN

Reuter's Special to The Victoria Times
London, Oct. 12.—The problem of a limitation or a reduction of naval armaments is much less complicated than it was before the Washington conference of 1922.

Capital ships do not enter into the calculations of the present negotiators. Their limit in numbers, tonnage, and gun-power was set by the Washington Treaty, and the talk is now of cruisers. Agreement on cruisers has its difficulties, but it should be easier of achievement than the more complicated allocation of battleships and battle-cruiser strengths that was the outcome of the Washington conference.

A British cruiser tonnage of 340,000, against 300,000 tons of the United States, appears to be the basis proposed from our side, allowing fifteen 10,000-ton cruisers in the British navy, and eighteen to the American. This leaves us with 180,000 tons of smaller cruiser types to America's 120,000. As things are at present, the relative strength of these lower categories of ships is more in our favor than tonnage figures suggest, for, with hardly an exception, the fifty-two cruisers we have in commission were all built during or since the War, while the majority of the thirty-two American craft are over twenty years old. Not present, but future strength is, of course, the point of negotiations, but it is important to bear the existing position in mind.

Some memories are going back to the pre-War days when Winston Churchill was at the Admiralty, and the navy of Germany was regarded as a menace. We had been forced by circumstances to abandon the two-power standard, which imposed on us the maintenance of a navy equal in strength to the combined navies of the two next strongest powers plus ten per cent "for security." It was impossible to keep pace against Germany and the United States. Mr. Churchill adopted, instead, a standard of sixty per cent superiority in capital ships over the next strongest naval power, and at the same time gave the famous invitation to Germany to join in a "naval holiday" by suspending building for a year. Germany did not accept, and the fatal competition in armaments became keener than ever.

A Cave In the Highland District--By Robert Connell

A LITTLE party of us started out last Saturday to visit a small cave in the Highland district. It was reported to me three or four years ago by the late Mr. Mitchell of Millstream, and I paid a hasty visit to it shortly after. It is reached by a most delightful drive along the old Millstream Road, which carries the hallmarks of an old-fashioned thoroughfare. It is a rugged country, yet it avoids all serious hills. Nevertheless, one has charming glimpses of hill and lake, to say nothing of a wealth of autumnal foliage with all its lovely range of coloration. The Millstream is crossed and one of the old limekilns of early days passed, but in the luxuriant growth of the roadside both are almost lost, though a few years ago they were conspicuous in the landscape. For some miles there are no houses except the old Hanington

one, and then the little Millstream settlement with its school perched high on a hill is reached. Just as the Mitchell house is sighted the road forks, the left-hand one passing on to Stanich, as the signboard says, the other being Munn's Road. Following this right-hand road the cave is reached half a mile or so down. It occurs in a long boss of limestone by the roadside. It is not easily found, and there are no landmarks to guide one. It just has to be looked for. Perhaps the best "sign" is a small slough or swale on the right just after passing an old house well above the road on that side. The rock with the cave borders the slough on the town side. It is hard to see because the opening is very narrow, just room to squeeze in, and it is concealed by growth and by fallen stone. But there it is for him who looks.

Crawling inside with a flashlight you find yourself in a low cavern. There is just room to stand upright in the highest part, provided you are not too tall. The faint light is reflected from irregular walls of grey marble, so smoothed as to have lost the bright and glittering appearance of its freshly broken surface. It thus resembles compact limestone rather than marble. On the left is a broad sloping ledge. This again leads upward to cavities high in the roof, cavities that are worn and rounded inside. Two of these were occupied by very large crickets, one in each, the only animals we found in the cave. Hard fringes of lime depend from above and you have to be careful of your head in the semi-darkness. In many places, particularly along the edges of cracks, the marble is altered and replaced by opaque white carbonate of lime, deposited by the

water that has eaten into the marble and become super-saturated with lime. The length of the cave is about fifty feet, but it is not accessible for more than thirty, and then only with difficulty. Its width varies, and it narrows greatly as it proceeds further in. The only plants seen were an extension within of the moss about the entrance and a very tiny white fungus, not more than half an inch high, growing in the dark of a crevice among broken rock and earth. There is an accumulation of dark brown earth along the base of the wide ledge about halfway in. Under foot there are evidences of deeper erosion of the marble, but it is mostly hidden by fallen pieces. HOW THE WATER EATS THE ROCK

My impression on my first visit was that the cave had been eroded by an underground stream, but after this fuller examination I feel sure that the agency has been that of many tunnels rather than a single stream. Those tunnels have come from above, bringing into the receptive bosom of the marble the rainfall of winter. Marble and limestone are peculiarly subject to the influence of acids, as anyone knows who has seen vinegar poured on chalk or shell, both composed of lime. A brisk effervescence takes place, and if continued the lime disappears leaving an earthy sediment. Now rainwater contains appreciable quantities of acids, such as carbonic acid, nitric acid and sulphuric acid, and although these quantities are not great enough to make us aware of them, their accumulated influence on so susceptible a material as limestone is a very serious thing. That is why in limestone countries caves are very common, and their extent is such as to make this little cavern of the Highlands like a mouse-hole

compared with the crater of a volcano. But the same causes are at work in the one instance as in the other, and it is this that gives a cavern of even such small proportions an interest to a geologist.

You have to think of the rain first working on the exposed outer surface and gradually eating it into little pits and hollows. These are enlarged and further deepened, and as the water accumulates in them they eventually lose their identity and become merged in each other. So in heavy rains quite large bodies of water reach the interior and still further assist in eating away the marble until eventually you have the condition of to-day. Some of the slower dripping water redeposits its limy load on the surface of the rock in crusts, identical with the material of the stalactites found in larger caves.

Gotham's Ritzy Avenues Are Models For Civic Betterment Throughout World

Park and Fifth Avenue, and Other Associations Fighting Ugly Commercialism, Are Now Able to Dictate the Community Policies

By HORTENSE SAUNDERS

NEW YORK—Why streets go wrong was a matter of chance and hazard in this and other large cities until the Fifth Avenue Association organized some twenty years ago to reclaim wayward thoroughfares and protect and cherish those in good standing.

Now, the oldest of all organizations for fostering street consciousness, it still is the leader of them all, and maintains a sort of clinic for others' civic problems. Not only has it supplied advice and inspiration for cities on this continent, notably Detroit, Boston and Kansas City, but has extended into Germany, England, Ireland, Sweden, Mexico City and faraway Nagoya, Japan.

On account of its phenomenal growth and its limited area, New York early had to face the problems that came more slowly to other cities—that of keeping the character of a street, once it is developed, and protecting residential sections from being swallowed up by business and to staying factories from encroaching upon established commercial sections.

ZONING IDEA SPREADS

Only ten years have passed since these zoning laws became

effective in this city, but they have had such an influence in moulding architectural development of the city that now more than ninety-three cities have adopted similar ones.

For instance, Toronto, Canada, sends in for information as to how it may be able to control the growth and style of their main thoroughfare. It is coming to a point in its development where it faces what New York met twenty years ago.

Detroit writes in to find out how the Fifth Avenue Association managed to banish begging and peddling from the avenue, and how they went about it to secure suitable ordinances and legislation.

Los Angeles consults them to find out how they handled the problem of electric and projecting signs, and how they were able to keep them off the street. And so it goes.

HOW NECESSITY AROSE

It was when the lower part of Fifth Avenue went "factory" and threatened the street that had been exalted as the country's most magnificent shopping centre, and most expensive home section, that merchants and property owners of the Fifth Avenue section realized the

Here's the change that only forty years have wrought in the Manhattan district that now includes the ultra-exclusive Park and Fifth Avenues. Lower Park Avenue is pictured at the top as it appears to-day. Below is the same area in the inelegant 80's. Two of those partly responsible for the change are Charles Louis Picard, upper left, and Michael Friedsam, lower right, presidents of the Fifth and Park Avenue Associations.

necessity of resisting this invasion.

When it organized, the founders had no idea how far-reaching its work would be. Now other streets and sections have followed suit until New York has a highly developed civic pride, that works in groups rather than collectively.

THEY RUN THEIR STREETS

The Park Avenue Association was organized to keep that section smart, exclusive, and of course, expensive. The Washington Square Association is pledged to save that section as a high class residential quarter, and to retain the old landmarks so far as it is possible, while the Broadway Association keeps an eagle eye on the carnival street of the world.

By organizing the streets, it is possible to dictate the policies. Fifth Avenue allows no electric signs, while Broadway fairly gives bonuses for them. The Park Avenue Association keeps off the busses that are such a feature on Fifth.

While each section must build according to its particular section, it does to a large extent dominate the type of architecture

and the calibre of the business represented.

The Fifth Avenue Association awards yearly prizes for the most beautiful buildings erected in its area and for the most expert jobs of remodeling.

Park Avenue is really included in the Fifth Avenue section, but it has an organization of its own that is purely commercial, and for itself—"to make profit for and derive a profit from Park Avenue."

AN ELEGANT THOROUGHFARE

The idea was to keep Park Avenue expensive and exclusive. It had become, through something of an accident, the street with the most elegant apartment houses, with the highest and most prohibitive rentals, with the ritziest restaurants and a reputation for being swank and swaggy.

When Gramercy Park and Washington Square were the fashionable parts of the city in Civil War times, upper Park Avenue was a commons and railroad yard. There were no brownstone palaces and copies of French chateaux, such as were making Fifth Avenue the talk of the world.

So there were none of the sorrows of seeing the old palaces go, such as Fifth Avenue has had to experience. She has paid dearly for the beautiful apartments that are across the park, because each is the site of an old home, of an elegance such as can never be replaced.

NOT FIFTH AVENUE OF OLD

Incidentally, to-day there is not an Astor or a Gould on Fifth Avenue, and only one of the Vanderbilt palaces remain in the upper fifties. It is estimated that it costs General Vanderbilt \$2,000 a day to hold that location for a private residence.

The Fifth Avenue Association, after working for years for the Thirty-Eighth Street tunnel that will relieve traffic congestion in mid-town New York, has just had its plans accepted. It was back of the plan to spend a million reconstructing and rehabilitating Central Park. It is proud of the fact that the value of the section it embraces has quadrupled in the twenty years.

Michael Friedsam is president of the Fifth Avenue Association, and Charles Louis Picard of the Park Avenue.

HE MIGHT HAVE BEEN RICH—WORTH BILLIONS—LIKE HENRY FORD, BUT HE SOLD HIS STOCK BACK IN 1906

Albert Strelow, Still a Detroit Carpenter, Looks Back On the Days When He, Ford and Others Pioneered the Huge Motor Company of To-day

ON THE front porch of his modest cottage, sits a grey, wrinkled, stoop-shouldered man of seventy-six, scanning wistfully the setting sun and rueing the day when he sold out to Henry Ford.

Twenty-three years ago Albert Strelow was an important stockholder in the original Ford Motor Company. He was worth \$100,000 and commanded a force of 100 workers in his own carpentry and contracting firm. His home was a fifteen-room "mansion" and he had a country residence on the St. Clair Flats.

To-day, Albert Strelow is bent and tired. He was forced to retire nine years ago because of severe rheumatism. Now heart trouble has set it and he finds it more and more difficult to do something that would bring him money. He lives alone, his wife having died three years ago.

DOESN'T EVEN OWN AUTO

He can't afford an automobile—not even a second-hand one.

Broken in health and in fortune, Strelow contemplates rather stoically the days when he held the opportunity to become a millionaire like Ford and Couzens and the rest of their more fortunate and farseeing partners.

"Yes," he recalls, "I knew Ford back in '86 when I built the first Edison plant here and Ford came to work for the com-

pany. I lost track of him, however, until 1903, when Ford got out of the old Cadillac company and wanted to start his own firm."

Strelow then had a shop on the corner of Bellevue and Mack in Detroit. He had been doing jobs for Alexander Y. Malcolmson, a coal dealer for whom James Couzens, now United States Senator from Michigan, was working as a clerk. Malcolmson had met Ford the year before and was prepared to back his new "horseless carriage."

"Malcolmson came to me and said:

"'Albert, I want you to put up a shop for me, back of your place. I want to build some automobiles.'"

FORD NOT PROSPEROUS THEN

"'Who's with you?' I asked.

"'When he mentioned Ford I hardly remembered him, so I asked to see him. Malcolmson pointed him out to me. He looked shabby, wore a yellow overcoat that was patched at the elbows. His pants were bagging at the knees—well, he looked like a tramp to me.

"'Alec,' I said, 'do you want me to put up a factory for that man? I won't do it.'"

It was after much further persuasion that Strelow finally built the factory; he said, at a

cost of \$7,000, advancing his own money.

When it came to organizing the Ford Motor Company, in the early part of June, 1903, Malcolmson and Ford took fifty-one per cent of the proposed stock, evenly divided between them. They offered the rest to John S. Gray, a banker, and uncle of Malcolmson; Vernon S. Fry, Malcolmson's cousin; the

Dodge brothers, John and Horace, who built the first Ford cars; Rackham and Anderson, attorneys for Ford; James Couzens, Strelow and two others, Charles H. Bennett and Charles J. Woodall.

FORD DEMONSTRATES CAR

Gray, Fry and Strelow were hesitant about investing in this company. Ford drove the experimental car around the shop

and through the streets, to show that it could run. He gave the prospective investors a ride.

Finally, and after much hesitancy, Strelow decided to invest \$5,000. Gray offered another \$5,000 at first, but later was prevailed upon to make a total investment of \$10,500.

Each of the Dodge brothers had put in \$2,500, Strelow recalls, but were later induced to add another \$2,500 each. The others, Couzens included, presented notes for their stock or most of it. Gray, having most money in the company, was made president, Ford vice-president, Malcolmson treasurer, and John Dodge and Horace Rackham were added as directors.

In a year the notes were paid up by the dividends the stockholders received—100 per cent on their investment!

"The next year we got 300 per cent on our original investment," says Strelow, "but after that the company paid nothing."

FORD AND OTHERS BREAK

That was when the break came. In March, 1906 dissension arose between Ford and Malcolmson.

"They had \$450,000 which they could have paid out in dividends that year," says Strelow. "But Ford and Couzens took another factory on Mack

avenue and started building another machine with the money."

There was the difference. One group wanted dividends. The Ford group wanted to turn the money back into the business.

As a result of this dissension Ford bought Malcolmson's share in the company for \$175,000. All that it cost Malcolmson originally, according to Strelow, was \$1,500!

"I was a close friend of Malcolmson, Gray was an uncle, Fry a cousin, so we sided with him and sold out, too.

SELLS TO COUZENS

"The Canadian company had been organized in 1905, and the Ford Motor Company of America held fifty-one per cent of its stock. My share was 31.8 shares. When Couzens bought my Ford stock, I handed him my Canadian shares also—for nothing.

"Now that Canadian stock is worth a fortune!" What his original Ford stock is worth to-day, Strelow wouldn't dare to estimate. At any rate, this man who might have been a millionaire, whose name might have been known as well as those of Ford and Couzens—this wrinkled and rheumatic and kindly old man now sits on his front porch and merely contemplates the day of his great opportunity.

RAM FETCHES \$1,525

This Rambouillet ram was sold for \$1,525 at the annual ram sale of the National Wool Growers' Association in Salt Lake City. This price topped last year's record by \$500.

FIRST FORD PLANT IN 1905

ALBERT STRELLOW WHEN HE WAS STOCKHOLDER WITH FORD

FORD WAS STANDING IN THE STREET—'DO YOU WANT ME TO PUT UP A FACTORY FOR THAT MAN?—I WON'T DO IT!'

THEY ALL TOOK A RIDE IN THE FORD CAR

STRELLOW WANTED TO RE-INVEST THE PROFITS

ALBERT STRELLOW

Strelow's \$5,000 investment in three years brought him \$45,000—a comfortable profit. But, turned back into his own business, it gradually dwindled by ill luck until to-day nothing is left of this and his original \$100,000 fortune.

Regrets! He throws up his hands wearily.

"What shall I think of it! I have no regrets, I make the best of it. I have no grievance against anyone. I just make the best of it," he repeats.

School Spirit Raises Crystal Garden Roof

TWO THOUSAND KIDS MAKE WELKIN RING CHEERING SWIMMERS TO VICTORY

TAKE two thousand exuberant youngsters bubbling over with school spirit, add two or three hundred excited competitors, throw in the dads and mothers and school teachers, and then stage the big show in a great hall like the Crystal Garden, where every shout rings through the building like the roll of artillery fire, and that is a night to be remembered.

It is five years since school swimming sports got their real start in Victoria, and last Saturday was a striking demonstration of the important part they play in the school life of Victoria and district.

To get the spirit of the great occasion one must picture the setting. That is in view of the fact that no talkie-movie was taken.

TENSION AND EXCITEMENT

Victoria's fine swimming clubs may stage galas. They may bring Johnny Weismuller and other stars of the aquatic world to Victoria, and the best of luck to them, but they will never create a greater atmosphere of tension and excitement than the annual school gala, when every kid of Victoria and the vicinity is interested, five or six hundred young competitors are out for honors, and the mothers, fathers, brothers, sisters, uncles and aunts of every one of them are following the races with an enthusiasm only equalled by that of the young rooters yelling their loudest for the school representatives.

If noise could actually raise a roof, the plate glass dome of the Crystal Garden would be leading the Graf Zeppelin on another round-the-world flight.

It is the day of days for the competitors. The tempting fifty-yard stretch of blue, still water in a spotless white bed invites any well-trained youngster keyed up for victory to plunge in and sweep everything before him. The crowds filling the towering seats make it a fitting arena for the battles to follow.

Two thousand kid spectators are all keyed up to the highest pitch of excitement. Every one has a brother, sister, school pal or school team out for honors. And every one is out to cheer and shout their favorites to victory. If shouts and encouragement alone could spur swimmers on to victory, every race would have been a dead heat.

UP IN THE AIR

Those 2,000 school kids weren't all on their toes, as the sport writers say.

They were up in the air.

"Come on Ethel!" "Come on Mabel!" "Come on Gerty!" "Hurry, hurry, she's beating you!" "Oh! Oh! Oh!" "We won, we won. Whoopie! Hurrah! 'Ray! 'Ray!" girls shouted in piercing shrills, on the verge of hysteria with enthusiasm and excitement.

They weren't on their toes. They were up in the air. At each shout they jumped and clapped their hands, and as the race grew more and more exciting, they clapped harder and jumped higher.

The girls are mentioned first for politeness not because their enthusiasm exceeded that of the boys. There wasn't a boy in the building who didn't have his favorite in the school and in the individual races. And the lusty lunged young enthusiasts needed no megaphones.

THROW DIGNITY TO THE WINDS

It was not only school kids that were swept away by the spirit of the occasion. Teachers, in their excitement, threw dignity to the winds. Staid businessmen of Victoria lost themselves in the heat of the occasion as they saw their sons or daughters fighting for victory.

When there was no personal touch to the race for them, the thrill of seeing the great crowd keyed up as two plucky contestants fought it out every lurch of the course carried them away anyhow.

Before the great crowd had settled down to wipe the perspiration of excitement from their brows after one great battle, another was in progress.

DANCING FLAPPERS INTRIGUED

Even two dancing flappers, who wondered at first what it was all about, were caught on the crest of the wave.

Attending the Crystal Garden for the weekly Saturday dance, they were astounded to hear the shouts ringing out blocks away and were more astounded on entering the building to find it jammed with kids and adults all waving their arms or jumping, shouting, cheering and apparently half crazy.

They took their seats with the insouciance of the modern young lady to kid's events. Nonchalantly they lighted cigarettes and watched the mad scene, aloof, indifferent and dignified.

"Suppose this will be over soon so we can dance," one remarked to the other.

"Hope so," was the reply. "But look, there's Gertie Johnson in that race . . . and she's going to win. Come on, Gertie!"

It only took that personal touch to link the two dancing flappers with the rest of the crowd. With their enthusiasm stirred up over the success of their favorite in the heat, they naturally followed her triumphs to the finale, and were soon carried away like the rest of the crowd.

GRIPPED EVERYBODY

It was one of those occasions where the excitement gripped everybody. Even the Crystal Garden attendants, who have seen the great Weismuller and other stars, were intrigued. Between the brisk business of selling ice cream cones and candy, the refreshment stand attendants followed the exciting races. Lifeguards and other workers helped to spur their favorites to the finishing line.

The recently-appointed manager, A. H. Cowlishaw, was as busy as a one-armed paperhanger seeing that everything ran smoothly. Even at that, the excitement of the races got him. Bill Irvine, the enterprising photographer, battled all handicaps and objections as he fought his way through the crowd to find a place to take a flashlight picture.

HE WAS ANNOYED

He lost it through the clumsiness of a reporter who jarred his camera at the crucial moment, and his language was more lurid than the flash—justifiably—which temporarily blinded the great audience.

Lieutenant-Governor Randolph Bruce, Premier S. F. Tolmie, Mayor Ansonby and a number of other distinguished citizens arrived to take their places in a reserved section in the midst of the enthusiasm, and the band played.

RABID PARTIZANSHIP

They walked in on an impressive spectacle. The sides of the tank were crowded with young competitors, who obtained a prized position by virtue of being on call for races. Two minutes after they took their seats a school team race was in progress, and every kid there was a rabid partisan, demonstrating his partisanship by the power of his lungs.

Anyone who has either never been in a race or taken an active interest in one may find it hard to appreciate the excitement. There is a thrill in winning a solo event for the winner and the crowd.

There are few things more exciting than seeing two keen swimmers fighting neck and neck, stroke for stroke, all the way over a fifty-yard course, with no one having the race tucked away until the frantic, desperate stretch for the finishing point—and then for the crowd a flash and a splash that leaves everyone in suspense until the judges go into momentous conference before they can name the winner.

Then the thrill for the winner when the judge taps him on the shoulder first and announces his name through the megaphone.

Oh, boy! Briggs must have had that in mind when he started the famous cartoon series, "Ain't it a grand and glorious feeling?"

TEAM RACES

If there is anything that can beat that, it can only be the team races. There was nothing that stirred the school spirit more during Saturday's great gala. There was excitement all the way and sustained suspense throughout. A gripping story in three thrilling chapters, and each chapter leaving the issue in doubt. It was even more exciting for the competitors.

Picture the nine lads at the starting point, three for each team. The pride of the school and everything resting upon them. It's a real honor to be selected, but if you can only help the school to pull off a victory—can life hold anything more for the moment for a schoolboy? The eyes of all your school chums are upon you. They are just as keen as you are for first place. Is there a lad alive that asks anything more than to be the hero of such an occasion, except perhaps to win the blue ribbon for deportment?

Then, to cap it all, picture the boy, usually the captain, who is the last man for his team—the crucial position. He waits anxiously while his teammates do their stuff, and he knows to a hair just about what they can do. Bill has just enough speed to make it even fighting on the first lap, and the school is yelling for him to step on it and get a lead on the first lap.

TOO MANY ICE CREAM CONES

Bill doesn't make the grade. Fighting for all he is worth, he holds even for most of the way, but towards the finish he begins to weaken. If he had laid off the ice cream cones until after the race, he might have made it, but he's dragging behind, but using every ounce of energy he has. A bad start—first man finishing leaving six yards to be picked up to get second place and eight yards to get first.

Jack, in second place—pretty speedy, but the slowest man on the team—plunges in with a lead to overcome. He proves the kind of young sportsman who shines best under a test. He pulls up on the boy holding second place for his team, with every lad from his school at the gala working himself into a frenzy of excitement.

"Pass him, Jack! Pass him! You're gonna beat him! You're gonna beat him!" they yell. Jack not only passes him, but cuts the distance between first and second places.

GETTING CLOSER

Then the battle changes to a race for first place instead of second. There is not enough

distance left to make it possible, but the excited shouts from the side would remind him; if his school spirit didn't, that the closer he cuts that distance the better chances he is giving the last man of his team to make a race of it.

The young captain, on whom everything depends, tries his best to keep calm under all the strain and excitement as he watches the battle and sizes up his own prospects. He leaves the cheering for the others and saves his wind for the contest.

Overcoming the bad start, his teammate has touched three yards behind the first and one yard ahead of the last man. He has seen one rival flash into the water ahead of him as he waits for his own gun to finish.

He knows that each school has saved a speedy man for the final test. It is up to him. First man proved hard to overtake. Last man for the school swimming third draws up and challenges both the others. All three swim so close that from the seats it is impossible to tell which is in the lead.

The excited shouting before seems like a whisper compared with the noise now.

THE CUP FOR THE SCHOOL

Then they finish in a hurdle, but keen-eyed judges have placed them. The young captain finds Jack's big effort and his own great battle have changed the fortunes of war and Bill's disappointing show, and they have won the cup for their school.

Lindbergh's reception in New York was no more enthusiastic than a reception from schoolmates after a race like that.

There never was and never will be a greater moment, and that is not excluding the first pay cheque, weddings, coming of ages and other events of relatively minor importance.

These team races rank first in importance, perhaps, as representing schools' bids for honors, but the school interest doesn't end there. Every swimmer and every diver in every race comes from some school, and all the young rooters on the sidelines check up on the victories. The name of the winner and the name of the school share honors in the shouting that greets every victory.

Congratulations are in order to everyone who has anything to do with the school gala. For creating school spirit they cannot be beaten. For encouraging clean sportsmanship they are unequalled. It is a pretty safe bet that anyone who saw the gala will agree that it was the biggest sporting event of the year. A handsome trophy for the school winning the most points should keep the school spirit up to the same high pitch next year.

Ladysmith Ready For Industrial Activity

By Times Special Representative

LADYSMITH is a seaport at the entrance of Oyster Harbor, seventeen miles south of Nanaimo, five miles north of Chemainus and fifty-nine miles north of Victoria, on the E. & N. Railway, and is on the Island Highway. Ladysmith was established to fill the need of the then Wellington Colliery for a port from which to export coal.

The town took its name from the famous town in Natal, South Africa, which had been relieved after the memorable siege just about the time its western namesake was taking shape.

Some of the streets are named after British generals who commanded during the South African War, such as Buller, Symonds, White, Kitchener, Roberts, Warren, Gaisford, French, Baden Powell and Methuen. Of these, only the two last named are now living. There is also one high point northwest of the town known as Epion Kop. Near this summit is built the Ladysmith public school.

Ladysmith was called into existence by the need of the then Wellington Colliery Company for a port from which to export their coal, and on the site selected stands the Port of Ladysmith. It is said this company badly wanted to send their coal via Departure Bay or Nanaimo, but were given no encouragement by the other coal companies in operation at these points, so selected this port as an alternative.

The coal company erected a first-class system of wharves and coal bunkers. The facilities at this port, for giving quick dispatch, are unrivalled on Vancouver Island.

It is a point, too, at which the C.P.R. cars are received from the Mainland ferries and sent north and south. The number of freight cars daily leaving Ladysmith, loaded with freight, varies between thirty and forty-five, carrying chiefly coal, lumber and poles. The latter go over in large numbers, and large freight boats occasionally call to load poles at the wharves.

MUCH BUNKER TRADE

In Ladysmith's very busy period large numbers of ships came in for bunker coal, quite a number do so to-day, but not as many as formerly. One line of steamers remains faithful to Ladysmith, and that is the Admiral Line, who make their weekly call. When the South Wellington and Extension mines were closed down recently they stopped for a while, but on the reopening of

these mines, the Admiral Line of steamers came back again.

BUILDINGS BROUGHT IN

The first man to build in Ladysmith was A. G. McMurtrie, who came from Dumbarton, Scotland, in 1886, to Vancouver Island, living at Wellington and South Wellington before coming to Ladysmith. Mr. McMurtrie really rebuilt an hotel called the Abbotsford, he had brought from old Wellington on the E. & N. Railway in 1899. Mr. McMurtrie was also at one time owner of the first hotel built in South Wellington, the Alexander, which was burnt down. There are a number of others who came from Wellington and Nanaimo, including Mr. Provis, whose wife, Mrs. Provis, is a sister of Capt. Pamphlett, who recently distinguished himself on the high seas.

It is in Ladysmith one finds the answer to "Old Times from Northfield," who asked, "Where be all the 'oues gone?" "Ere some on 'em be," one man told the writer, and strangely so, here one finds homes that have seen service in the busy days of North and South Wellington. Even the Methodist Church from Northfield has found its way to Ladysmith.

CROSSROAD STOPS

A conductor on the E. & N. Railway well remembers bringing as many as ten freight cars daily for some time loaded with sections of houses from the former prosperous mining towns to Ladysmith. This conductor is W. E. Fletcher, who also well remembers when there were no stops on the E. & N. Railway between Nanaimo and Chemainus, and how one old pioneer, Mr. Page, was in the oyster business, and how the train would stop at the Diamond Crossings for one bag of oysters weekly and take them to Victoria. "Even a sack of oysters was worth stopping for in those days on the E. & N. Railway," he recalls.

KEPT TWO HOMES

One very odd feature during the building of Ladysmith was that certain restrictions were enforced in regard to any miners who wanted to work at the Extension Mine. It is said that prior to Ladysmith's existence, Extension miners were able to lease lots for \$100 per month at Extension from a Mr. Bramley, who owned most of the land there. These cheap leases permitted the miners to build themselves comfortable homes, which many did. After Ladysmith got going, an order from the mine owners came into force, and it is said was strictly enforced, that

all men who worked at the Extension Mine had to live at Ladysmith. Many miners who were married, and had homes in Extension, were thus compelled to room and board at Ladysmith and their families stayed at Extension. These men went home for the week-ends, and so were actually keeping two homes. It was a rather peculiar method. Thus the miners passed his home daily to and from work but could not live there during their working days.

One reason given was that the coal company was now in the real estate business at the new town of Ladysmith and naturally felt that those working for them should give the company a little patronage in their land dealings. Another reason given was that so many business houses went up, hotels also, that the new Ladysmith business men appealed to the mine owners to help them to get some of the miners' business. It is said that this appeal got sympathetic hearing because the coal company were just as anxious to see Ladysmith grow as were the business and hotel men of those days. The miners who had their homes at Extension could see no humor to the added costs brought about by these changes. Even to-day many of Extension miners live in Ladysmith and go to and from by the miners' trains every shift, though to-day it is not compulsory.

WAS BUSY TOWN

Ladysmith was so busy at one time that there were no less than eighteen hotels, always full. At one time Ladysmith had a stove works and built very fine stoves, too. Some are to be found in Ladysmith homes to-day. There was also a shingle mill, now gone. The Ladysmith Lumber Company has been in business for many years, with a branch at Nanaimo. This had various owners, but is still doing business.

The oyster business started by Mr. Page is still carried on by a Mr. Jones, formerly of the Jones Hotel, who recently imported the large Japanese oyster, some said to be a foot long. This business employs about five men, and the demand for these oysters and the native is very great.

INDIANS PROTEST

At one time the town had a clam factory, but this was later moved to Sidney, near Victoria. All sorts of stories are in existence about the closing down of this industry. One is that the clam factory took all the Indians' food and busi-

LADYSMITH CENOTAPH

ness away from them and that it was necessary for them to appeal to the government for money. It is said this was the principal reason for closing.

COAL CONTROLS

Coal, of course, has played the biggest part in the life of Ladysmith, and does to-day, the opening and closing of the Extension or South Wellington mines is quickly felt in this town. Only recently the mines were closed for a few months, and Ladysmith was hard hit, but on reopening a more hopeful and cheerful feeling exists.

It is this uncertainty that the responsible authorities must try and prevent if possible. Here is a very pretty and very clean town for a mining town, with fine homes owned by many of the miners and many excellent hotels awaiting more prosperous times. In the meantime there

is an air of uncertainty that should not be. The vast expense in the making of this town should not be allowed to go backward. At one time the record day's coal tonnage reached 2,000 tons, but to-day it is much less than this. It is said that James Dunsinuir and one of his officials, Mr. Little, took off their coats and assisted to make this record.

Some of the doubtful say the coal is getting less, and we shall never see the same tonnage again. Others, and particularly one man who seemed to know what he was talking about, remarked there is all kinds of good coal.

SMELTER PAYROLL

Another side of the ledger shows that the Tyeo Smelter Company had something to do with Ladysmith's prosperity in the past. At one time, in the early stages, the smelter employed very few white men; about twenty. The rest were Chinamen. This continued until the eight-hour law went into effect, then more white men were employed to the extent of around one hundred. Before the passing of the eight-hour law the smelter men worked in twelve-hour shifts, so that this change in working hours resulted in shorter hours and more white men being employed.

There is no reason why Ladysmith should not be smelting to-day, in the opinion of residents. If the town was a good smelting town years ago, the same situation is there to-day. There are the same good wharves, which cost lots of money. There is the same harbor, where the ships came from as far south as South America and as far north as Alaska. What is more, the Ladysmith people have, from time to time, heard speakers from election platforms tell them almost the date of the reopening of the smelter or the building of a more modern one.

The Ladysmith people have lived so long on promises that any future politician who mentions smelters will have to have the owners or the builders of the new smelters on their platforms with orders to start and not future promises.

SPORTING COMMUNITY

Ladysmith needs no introduction when football is mentioned. Up-island and Mainland teams know what fine brand of football this town served in its busy days. In fact, sports of all kinds when it is possible to field a team they will try and find one.

MERRY FIREMEN

In every town at one time or another there

is some unusual event that stands out prominently. Some years ago the Jones Hotel, opposite the Abbotsford Hotel, was burned down. While the volunteer firemen were trying to put out the fire, it was noticed that there were many more volunteers than was usual. The reason was soon noticed. Three or four barrels of beer had been taken out of the hotel, supposedly to a place of safety, had been rolled down the hill. Someone found a tap, a barrel was tapped, and from glasses, jug and tin cans many drank the health of the proprietor, and drank hearty. So merry did the volunteer firemen become that they almost forgot their fire duties. Thus they made merry while Rome was burning.

Many of Ladysmith's people find employment in the big mill at Chemainus; others work at logging camps in outside districts, and others are coal miners and surface hands at the South Wellington, Extension and Granby mines.

CHALLENGE POLITICIANS

All Ladysmith people ask now is a return to their former busy days, and for those who have made various promises about the reopening of the smelter to get busy and not do so much promising. They assert that if the politicians would put into practice all that was promised before election time, Ladysmith would soon be the very busy port she was some years ago.

This town could, on account of its beautiful location and outlook, take care of a very large tourist trade in season. Located on a fine slope, from a high point to the waters edge, Ladysmith should be a very healthy place to live, but what the Ladysmith people desire most is a quick return to the full dinner pail.

There are fine stores, hotels, good schools, a fine hospital, a convent, several churches and a fine big post office. Ladysmith also has its weekly paper, The Ladysmith Chronicle.

Not to be behind her sister city of Nanaimo, Ladysmith is going to have the talkie pictures as well in the next few weeks.

There is no legitimate reason for Ladysmith going backwards, and with proper care and foresight she should become a busy port in the near future once again.

Despite the uncertainties Ladysmith has recently gone through, a higher proportion of taxes were paid this year than was reported by many towns going through more prosperous times. This is a very creditable performance and indicates a town worthy of good support industrially.

A side view of Ladysmith.

A one-time scene loading coal at Ladysmith wharves.

The first hotel built, The Abbotsford, Ladysmith, by the first Ladysmith resident, Mr. McMurtrie.

A PAGE FOR THE CHILDREN

TRAFFIC GUARDS BY SCHOOL STUDENTS ARE GIVING GOOD RESULTS

Many Centres on Continent Teach Traffic Safety in Classrooms, and in Actual Practice on Streets.

Wet and slippery pavements, fallen leaves which lie in unsuspected places; and the hurry, hurry, of school days, make the fall season one where the motto, "Stop, Look and Listen," is doubly important. Accidents do occur from sheer misadventure, where no one has been careless, and the mishap is just bad luck. On the other hand, most accidents occur when one or more people have been careless at the same time.

By far the greater number of mishaps that take place in city streets come from collisions between pedestrians and cars. Sometimes it is the fault of the car, sometimes that of the walker; and quite often both have contributed to the incident. Realizing this, many cities on the continent have instituted regular traffic instruction in the schools, beginning with the general exodus from school buildings at the hours of release, and extending to the crossing of intersections nearest the schools.

In one such centre traffic patrols are chosen from among the older boys and girls. These are placed on duty for five minutes after the school bell has rung, to watch all roads and intersections where children must cross the street. The students are given traffic badges, and their mission is to guide the streaming lines of children safely across the street. Thus, at a busy intersection, a student will be placed on guard at each corner. If cars and other motor traffic are in sight, the student will hold children on the curb until the vehicles have gone by. Then he will send them across in safety. Under this system the older boys and

girls learn to exercise an individual responsibility for the safety of others; and the younger children quickly learn what is expected of them, and in time take their places as patrol guards, too.

Each day a different set of school guards are placed on duty, and in this manner the practice runs right through all classes, among the older boys and girls. The juniors are not given traffic duty, but from being regulated by their playmates they learn to "Stop, Look and Listen," and to put that rule into practice wherever they may go.

The plan has worked well in a number of centres, and may be extended when the merits of the system are brought to the attention of those whose duty it is to guard the lives of the hustling, hurrying population of Canadian schools.

Quickness of wit will never take the place of deliberate care in avoiding dangerous situations, as one old fireman told another who had asked what was better than "presence of mind" at a fire. "Absence of person," he replied, and that is ever true.

It is never safe to run across a street, no matter whether there appears to be time or not. It is hunting for trouble to hold on to a street car or other moving vehicle, while cycling. Running on damp and leaf-strewn paths where walking would serve, is taking a needless risk. If there is an "If" in it, don't do it. "I could do it if," "I could reach that if," and countless more guesses have proved themselves not to be right.

Above all do not follow the pack. Because a crowd runs this way or that, is no reason why it would be safe to follow them. Seconds are not so important but that one or two more will make any real difference. Take time, plan your path, and "Stop, Look and Listen," whenever there is a guess about it.

BEDTIME STORY

UNCLE WIGGILY'S LONDON BRIDGE

Copyright, 1929, by McClure Newspaper Syndicate

(By Howard R. Garis)

Not far from Uncle Wiggily's hollow stump bungalow was a brook of running water, or a running brook of water, whichever you like to call it. Not that the water ran the way you do when you want to go to school, but it flowed along swiftly, and seemed to whisper to the white stones on the bottom, and the green grass on its banks.

"What a lovely brook you have near your bungalow, Uncle Wiggily," grunted Mrs. Twistytail, the pig lady, as she stopped one day in the shade to rest herself, for she was very fat like a sack of flour.

"Yes, it is a pretty brook except when I want to get across it," spoke the rabbit gentleman.

"Why isn't it a pretty brook then?" Mrs. Twistytail wanted to know.

"Because," answered Uncle Wiggily, "I must either hop a long way up or a long way down the brook, on the bank, to find a place where it isn't wide so I can jump across."

"Why don't you jump across the brook right here near your bungalow?" asked the pig lady.

"The water is too wide," said the rabbit. "If I tried to jump it here I should fall in and I don't like to get wet. It

The pig lady gave a little jump.

makes my fur all stick together like damp leaves."

"Pooh! Nonsense!" grunted Mrs. Twistytail. "That brook isn't at all wide! I'm sure I could jump it here without going up or down to find a narrow place."

"Try it," said Uncle Wiggily, with a vanilla flavored twinkle of his pink nose. So the pig lady gave a little run and a little jump, but instead of leaping over the brook she fell her splash—right into it.

"Oh, I beg your pardon!" grunted the pig lady, who was very polite. But the brook didn't mind in the least, not being hurt, and went on bubbling and babbling as before, while Uncle Wiggily helped Mrs. Twistytail pull herself out.

She was quite wet and her dress looked like a bathing suit, only more so, and Uncle Wiggily wanted to laugh but, of course, he was too polite. But he was doing some thinking.

"Perhaps I should move my bungalow farther up or down the brook," thought Uncle Wiggily, while Mrs. Twistytail was with his wife and Nurse Jane having her dress dried outside while she made herself wet inside with hot tea. "I mean to a more narrow place. 'Then,' went on the rabbit gentleman, 'when I'm in a hurry to get across I could easily jump without waiting to go all the way around or having to ask somebody to give me a ride over in a boat.'"

For often Uncle Wiggily got across the wide part of the brook in a boat. Only it wasn't everybody in Woodland who had a boat or, if they had, they didn't come rowing along when the rabbit wanted them.

So it went from day to day, with Uncle Wiggily trying to think of a way to get across the wide part of the brook without jumping over and falling in. He had tried many times to leap the brook without getting wet at the wide part, but never could.

Then, one afternoon, Uncle Wiggily heard some little animal girls singing a play song like this:

"London Bridge is falling down,
My fair pussy!"

For they were pussy cat girls playing the game.

"Ha! That's the idea! A bridge!" exclaimed Uncle Wiggily. "Why didn't I think of that before! I will build a London bridge across the brook here at the wide part near my bungalow and I can cross when I please."

So he asked the help of many of his animal friends and in about a week they had built what Uncle Wiggily called his London Bridge. It was made of corn-

stalks tied together with cobwebs and while not very strong would easily hold up a rabbit.

"Now I'm all right!" laughed the bunny gentleman and he went over his London Bridge many times, just for fun. It saved him a long hop in getting across the brook.

So things went along for a while and one day, when Uncle Wiggily was on the far side of the brook, across his bridge, he was hurrying home to his bungalow with some hot cross buns for his wife. Though if you ask me why the buns were cross I can't tell you.

And, all of a sudden, out of the bushes jumped the Wolf, who began to chase the rabbit, running very fast.

"But I can play that game, too!" said Mr. Longears and he began to run. He reached his London bridge and ran across. The Wolf came over the bridge after him. But when the wolf was in the middle of the bridge it broke and let him down into the water, for the bridge was only strong enough for a rabbit and not for a wolf. So the wolf was almost drowned in the brook and Uncle Wiggily was saved. Then, when the bad chap had swam away, London Bridge was built up again and all was well.

And if the gold fish will let the baby carriage go for a ride in the bottle of milk, I'll tell you next about Uncle Wiggily's china rabbit.

CANADIAN STOCK JUNIOR CONTESTS

More than 5,000 boys and girls on Canadian farms, members of the Boys' and Girls' Swine and Calf Clubs, in various parts of the Dominion, will be involved this year in the annual competitions conducted by the Canadian National Railway's Department of Agriculture in connection with these clubs.

For the sixth successive year, the Canadian National System announces its plan of assistance and competition for the Swine Clubs, conducted and fostered by the various provincial and federal agricultural authorities. Added to this is the competition for Calf Feeding and Cattle Breeding Clubs, inaugurated last year.

Keen interest is centring around the new Calf Club contests, and it is expected that the number involved in this contest will approach the 4,000 mark. Last year, there were 112 Calf Feeding Clubs, with 2,496 members, and thirty-five Boys' Cattle Breeding Clubs, with 437 members, operating in five provinces. The greater number of these was in the province of Quebec, but the clubs are gradually expanding in the other provinces, and a much larger number will be ready for the contests this year.

The Swine Club contests, which culminate at the Royal Winter Fair, at Toronto, in November, in the contest for the Dominion championship and possession of the trophy presented by W. D. Robb, vice-president, in charge of colonization and agriculture, will be conducted along the usual lines. The members of the demonstration team will consist of two boys or two girls, or brother and sister, between fourteen and twenty-one, on May 1 of this year. Members must be members of a swine club, at least ten members of which are raising not less than thirty pigs. The members of the team must care for at least two pigs for four months preceding date of the fair, and must exhibit the pigs either at an agricultural fair, school fair, or club fair.

The winners in each provincial district when going to the point where demonstrations are held will be guests of the Canadian National while traveling over their lines. The district winners compete in a car-lot competition at a provincial point, and these teams will also be guests of the company on their lines. The provincial winners in each case, receive gold medals from the Canadian National and are guests to the Royal Winter Fair, where they compete in the Dominion contest.

In the Cattle Club contests the teams shall each consist of two boys, or girls, or brother and sister, and for the preliminary contests those eligible will be a team from each of the Calf Feeding Clubs operating under the joint policy of the federal and provincial governments, and a team from each of the Boys' Cattle Clubs which have been in operation for not more than three years. No team having won a trip to the Royal Winter Fair in previous competitions will be eligible.

The provincial champion teams will each receive gold medals from the Canadian National Railway and these teams will be guests of the company at the Royal Winter Fair and will compete in the Dominion contest for Dominion championship and possession of the trophy presented by W. J. Black, Director of Colonization and Agriculture of the Canadian National System.—Canadian National Railway Magazine.

THE DOLLIES YAWNED SO WIDE THAT THEY FRIGHTENED EVERYONE

Miss Cinders Thought She Would Have To Go Through Life With a Gaping Mouth, But Madame Chuckle Invented a Quick Cure.

The small pert dolly seated on a great chesterfield, an oasis of green on a desert of brown, blinked rapidly a number of times, and then yawned alarmingly. Wider and wider opened her mouth, until she grew worried about it, herself. But the yawn was not to be stopped, and wider and wider grew the gap, until, with a distinct cracking noise, the yawn ended, but her mouth stayed open wide.

Teddy Bear, who had been gazing at Miss Cinders, the dolly, in astonishment, put a paw to his mouth and coughed politely. "These long rainy days do make one feel sleepy," he said, to hide the embarrassment of the moment. Then, as he had received no reply, Teddy Bear glanced again at Miss Cinders, and became fixed with surprise, for her mouth was still open, and her frantic efforts to close it seemed without avail.

Of course, all this took place after the children had gone to bed, otherwise the toys would not have been moving and talking so recklessly as they now did. Teddy Bear called the rest of the group together in haste. There was a black Goliath, somewhat the worse for wear; a pink and white Mama doll, with all her front teeth out, and a great mop of golden curly hair, from the glory of which her eyes could hardly ever be distracted; a white woolly stuffed pussycat, with real whiskers and a bushy tail, and several scores of tin soldiers, belonging to the boys of the house.

The toys gathered around their playmate, staring at Miss Cinders in her unpleasant fix, until their mouths began to open, though gazing too fixedly at what they saw. Madame Chuckle, the Mama doll, bent over Miss Cinders, and flattered about in an agony of desire to help, but quite lost to know what to do. Teddy Bear rubbed his furry chin with one paw in a pensive attitude, but he could think of nothing useful, either. The other toys scratched their heads and wondered, but none seemed to be able to think of a remedy.

There stood Miss Cinders with her mouth wide open, and unable to close it. There, too, stood the toys, grouped around her, wringing their hands or their paws and growing more frightened every moment.

Teddy Bear, caught suddenly unawares by the terrible powers of suggestion yawned broadly, and his mouth remained wide open, too. Madame Chuckle broke into the famous laugh which gave her that name, and ended in a stifled yawn which just missed the same disastrous result. She did get her mouth closed again, but only just in time.

At this instant, who should come into the room but the Jester, a clown dolly from a playtoy circus troupe that the

boys had been playing with sometime before out in the hall. Jester took one look at the awestruck group, and then went through his jokes as fast as he could remember them. Here was an opportunity not to be missed.

The jokes only made the dollies the sadder, for still Miss Cinders and Teddy Bear stood with their mouths so wide that their noses had almost disappeared from sight.

It was Madame Chuckle who found the way out of the fix for the dollies. "I know," she said, "I will get the castor oil. Mamie Cinders can't stand it, and I am sure that will make her close her mouth again." With that, Madame Chuckle fairly flew to the medicine chest and returned with a large bottle of castor oil. "Now, Mamie Cinders, open wide," cried Madame Chuckle, and uncorked the black, terrifying bottle.

Miss Cinders gave one look at the dreaded oil, and then her mouth snapped shut. Teddy Bear suddenly followed suit. All the toys danced around in a ring with joy. The mention of the nasty draught had accomplished the cure. The rest of the evening was spent in congratulating Madame Chuckle, who bore it very well, indeed, and laughed a great deal, as praise was heaped upon her.

But the excitement had taught Miss Cinders a needed lesson. After that, when she felt a yawn coming on, she covered her mouth with her hand, as all little people are supposed to do.

Running Away

One day I found our garden gate unlatched, and then thought I, "I'll push it open a wee bit."

And watch the folks go by."

But no one came along at all; So I put one foot through, And after while the other foot— The rest of me went, too!

I walked so boldly down the street That those who looked at me Must think, "How brave to go alone This little child must be!"

But I knew mother would be scared, Though I was not at all; So I just hurried back real fast Before she'd have to call.

—By Edith Bolar, in The Sunbeam.

A SLIGHT ERROR

Teacher—"Are there any more questions you would like to ask about whales?"

Small Girl—"Please, miss, what's the Prince got to do with them?"

HER FREE PASS

Little Edna came home from her first visit to Sunday school, carrying a small bag of sweets.

"Why, Edna, where did you get the sweets?" asked her mother.

Edna looked up in surprise. "I bought them with the penny you gave me," she said. "The vicar met me at the door and got me in for nothing."

THE TINYMITES

(READ THE STORY, THEN COLOR THE PICTURE)

The next thing that poor Scouty knew, the lollybird that grabbed the shoe began to circle round and round. And, by, but he flew fast. 'Course Scouty trailed him for a while and then he shouted, with a smile, "Hey, just what are we playing and how long is this to last?"

"Ha, ha," the lollybird laughed loud. "It really makes me feel quite proud that I can fly away from you. I'm pretty good, I guess. For looks, of course, I'm sad, at best, but that's because of how I'm dressed. I'm rigged out like a lollypop. It's awful, I'll confess."

"Oh, shucks, you're looks don't worry me," said Scouty. "Just come here and see how fast I'll grab a hold of you and maybe spank you, too. You've holdy interfered with me and I'm as mad as I can be. What business have you, flying round with Clowny's wooden shoe?"

Again the bird laughed loud and long, and then said, "So you think it's wrong for me to grab a shoe from air and hold it in my bill? Well, finders' keepers is a thought that you have surely heard. You ought to let me keep this little shoe. Oh, come now, please be still!"

By this time Scouty grew real mad. Said he, "For you it will be sad if once I get a hold of you. I'll break your tail in half. Then I will bite your candy back and give you one good solid smack. When I have done some things like this I guess you will not laugh."

Then came a chance, while Scouty raved. It was the real chance that he craved. The lollybird flew right up close and Scouty took a dive. The bird's tail was a long, slim stick and Scouty grabbed it mighty quick. They both began to tumble and the bird cried, "Sakes alive!"

Graptolites, Trilobites and Brachiopods and Work of Murchison, Geologist

By Robert Connell
Noted Island Naturalist

THE EARLY life and training of men who have distinguished themselves as scientists and naturalists I have always found a fascinating subject. In many instances the later career is clearly foreshadowed in what one can only describe as natural tastes. The desire to know nature seems to be innate, born with certain persons as if it were an inescapable destiny.

Yet I am not sure that if we knew all the facts we should not find that the original impulse comes from outside and from the enthusiasm of some one with whom the child is thrown in contact—parent, friend or teacher. Darwin first learnt the nature of plants at his mother's knee. Buffon, the great French naturalist, got his first taste for geology from a German tutor of an English friend. Linnaeus was inspired by his uncle. Some were handicapped by ill-health in their boyhood days and thus missed the ordinary training of the school to obtain the free life of the fields and hills, where they met with men whose tastes led them to exercise their powers of observation and reflection on what they there saw. Others again were influenced by the books written by naturalists. On the other hand there are those whose tastes only develop comparatively late in life and whose earlier years show no trace discernible to us of the direction afterwards taken.

In the year 1823 Roderick Murchison, a recent convert to the study of geology, and travelling westwards to the counties of Devon and Cornwall on rocks and fossils intent, happened into a quarry in the vicinity of Bath. He found the quarry already occupied by "a tall grave man with a huge hammer on his shoulder," and recognizing in him a brother geologist he found that he was a Lieutenant Lonsdale, a retired Peninsular officer who had served under Wellington at Waterloo. As Murchison himself had participated in the retreat of Sir John Moore after Corunna there was a preliminary tie of interest, and it was further strengthened by the fact that both men had taken to the study of geology after leaving the army. They became fast friends and co-workers. Lonsdale's chief work was done in the study of ancient corals, and his knowledge of these made him for long the most distinguished authority in the world on these fossils.

"MY HEART'S IN THE HIGHLANDS"
It is not altogether a coincidence I think that Roderick Impey Murchison, whose name was to

be indissolubly connected with the system he named after the ancient Britons, a Celtic people of Wales, should himself have sprung from the northern Celts. He was born at Tarradale in the county of Ross and Cromarty, and a few miles west of Inverness. His family were warm supporters of the Stewarts, and his great-grandfather fell at the battle of Sheriffmuir in the Rebellion of 1715. His grandfather was thus left to struggle as an impoverished tenant farmer, but he had the satisfaction of seeing the family's state revived by the success of his eldest son. This Murchison went to India as a surgeon and retired after seventeen years there with a moderate fortune. With this he purchased the estate of Tarradale and revived the old Highland customs so far as it was possible. He married a Mackenzie of Tarradale and had two sons of whom Roderick was the younger. As might be expected, the boy was brought up in a thoroughly Gaelic atmosphere, among Gaelic legends and songs and with the music of his native tongue everywhere about him.

His father's delicacy of health, however, led to the removal of the family to England, and there he died when Roderick was only four. His first school was Durham Grammar School, where he went at seven, and from there he went to the military college at Great Marlow at thirteen. He did not distinguish himself in classwork and only passed his examinations with difficulty. But he was gassed at fifteen as an ensign in the Thirty-sixth Regiment. He served under Wellington at Vimiera. Then he joined the forces of Sir John Moore and took part in the celebrated retreat from Corunna, to which we are indebted for the fine memorial poem of Charles Wolfe. At the close of the long Peninsular campaign Murchison retired to civil life and married a beautiful and accomplished woman, to whom not a little of his future career was due. Mediterranean, however, he gave himself up with enthusiasm to field sports and became noted as one of the greatest fox hunters in the midland counties of England. Sir Humphrey Davy was then at the height of his career as scientist and lecturer, and Murchison heard him at the Royal Institution. In a conversation afterwards Davy suggested to Murchison the taking up of one of the natural sciences, and the suggestion was warmly seconded by Mrs. Murchison, who was herself greatly interested in natural history. The seed took root, and in a very short time Murchison began to see the hills and valleys he had loved to roam, among under a quite new guise. To the affection for them rooted in his Highland associations was now added what one might call an intellectual affection, the offspring of his growing interest in their constitution and history.

IN THE LAND OF THE SILURES

For the next few years we find Murchison's geological education proceeding apace though not along the lines to now associate with a geologist's training. Instead of the classroom of a college we find the budding scientist mingling with the geologists of his day, Sedgwick, Buckland, Lyell and others. He joins the infant Geological Society, and his first paper is read before its members in 1825, when he gave some of the results of a trip through Sussex, Hampshire and Surrey. He was a persistent and indefatigable traveler and in many of these excursions he was accompanied by his wife, whose skill as an artist furnished illustrations of his researches. In 1831, however, he found his most notable field of work. The Rev. William Buckland, father of Frank Buckland, the great authority on British fishes, was Professor of Geology at Oxford, and one of Murchison's new friends. Desirous that the new geological student should find a worthy field, that is, one with real problems to be solved, Buckland suggested to him that he take up the study of certain feebly developed sandstones lying below the Old Red Sandstone on the borders of Wales. His friend, Sedgwick, took the Carnarvonshire area while Murchison began in Herefordshire and Radnorshire, and from thence across central Wales. Eventually their combined labors covered all those parts of Wales and the north of England where these ancient greywackes, grits and limestones occur. The work occupied many years and they were assisted in it by the labors of many local geologists whose collections of fossils and observations were placed at their disposal. Professor Branner of Stanford University once told me that on his visits to Great Britain, nothing surprised him so much as the number of amateur geologists and especially of clergymen devotees of the science. Murchison and his friend were indebted to many such.

William Smith, the father of geology, was still alive and hearty. Murchison met him at Scarborough about 1830. "A man after his own heart," who in turn said of the younger man, "He has an eye for a country," one of the best testimonies a geologist could have. Smith had shown that strata may be identified by the fossils they contain, or in other words, that there is a "succession of life in time," and under the guidance of this new principle he had classified the formations of England between the Carboniferous or Mountain Limestone and the Cretaceous or Chalk. Beneath lay the Old Red Sandstone, about which Hugh Miller wrote what the great Owen called the "most fascinating book ever written on a geological subject," an opinion many of us will still agree with. Under its 10,000 feet of sandstones, limestones and slates, the rocks to which Murchison and Sedgwick devoted their efforts, while below them again came the green-grey and purple slates, grits and conglomerates

to which they applied in 1835 the name of Cambrian.

Working steadily, then, through the rocks of Wales and the eastern borders below the Old Red Sandstone, and carefully collecting and correlating the fossils found in them, Murchison and Sedgwick had no difficulty in arriving at the conclusion that the rocks in which the latter had been exploring were older than those investigated by Murchison. As to the older they agreed to give the name of Cambria, the ancient name of Wales, so the younger they dedicated to the Silures, the Celtic tribe occupying of old the district in which these rocks were most characteristically exposed. Hence the names "Cambrian" and "Silurian."

THREE ANCIENT FOSSILS

The three most characteristic fossils with which Murchison and his fellow geologists came in contact in the Silurian are known as graptolites, trilobites and brachiopods. All of them are invertebrate or backboneless animals. The graptolites were so named by Linnaeus from their likeness to writing on the slates in which they are found. They consist typically of a slender hollow rod along which, on one side, is a series of little cups, giving an effect like that of a fret-saw blade from the angle of the tops. In these closely-arranged cups lived the little animals, who thus shared a communal life, independent in respect to their functions but united by a thread of living material from which fresh cups and their occupants arose. Sometimes the rods were straight, sometimes curved. In some species they radiate from a centre in a form like that of a long and slender-armed brittle starfish. In others the rods resemble the junction of two wires in a piece of chicken-net; in others two rods were united at one point and spread in the shape of a wave; while still others had two rods placed back to back with cells on the two outer sides.

The graptolites were at their best in Cambrian times but they were abundant during the whole of Silurian time when they abruptly ceased to exist except in fossil form. Not so the brachiopods or lamp-shells which are still with us though their company is but a shadow of that great army that inhabited the seas of earlier days. Seven of the ten families of brachiopods were in existence in Silurian times, and it was then they reached their greatest numbers and development, so that the Silurian has been called the "Age of Brachiopods." They are called popularly "lamp-shells" because of their resemblance to the old-fashioned Roman lamp. Like a clam the lamp-shell has two valves, one of which is larger than the other and the beak of the larger turns over that of the smaller. The over-curved beak has a small hole in it through which the animal puts forth a stem of muscle and attaches

itself to a rock or other object. It is this curved beak with its opening that constitutes the brachiopod's resemblance to the ancient lamp. Although the shelly covering makes the lamp-shell look like a quite distinct group of animals, it belongs to a quite distinct group of animals. The shells are different, to begin with, for in the clam, oyster, etc., the valves are "right and left," along the sides of the animal, while in the lamp-shell they are "back and front." Then the lamp-shell possesses a curious process which is really a prolongation of the sides of the mouth, forming two coiled arms fringed on one side with rapidly moving hair-like filaments that serve to send the particles of food from the water to the mouth. The arms are supported in many lamp-shells by a spiral framework of limy composition, rather like a conical spring coil. In others it is of a much simpler fashion, as in our local living species found off the mouth of Victoria Harbor, where it is little more than a loop. There are other features distinguishing lamp-shells from ordinary shell animals but these are the conspicuous ones.

The trilobites are "three-lobed animals belonging to the arthropod or joint-footed" race, which includes the crab family at one end and the insects and spiders at the other. Except for their much greater size they must have looked not unlike the wood-lice or "slaters" that love to harbor under boards and stones, or the sow-bugs of our shores. But they still more resembled the king crabs found off the Atlantic coast of the United States, and in the West Indies. Resembling more like that of the scorpion, which they resemble in the development of the embryo. The evidence from embryology is of great weight with zoologists, and it may be said to be the deciding factor in the placing of the trilobites, for as the embryonic life of the king crab resembles that of the scorpion, so that of the trilobite resembles that of the king crab. In the words of a distinguished paleontologist, "the young Linnaeus (or king crab) so nearly resembles the young of certain forms of trilobites as to be barely distinguished from them." The trilobites reached their maximum development in lower Silurian times, a period which was separated from the Silurian by Lapworth in 1879 after long years of discussion. After the example of Murchison, and Sedgwick's names he called it the Ordovician, in commemoration of another ancient Celtic tribe of the Welsh borderland. But although the trilobites were a waning group they were like Charles II., an unconquerable time in dying, for they lingered on into the Carboniferous when they became extinct. But they form a prominent feature of all collections of Silurian fossils.

THE GREAT TRAVELER AND GEOGRAPHER

Murchison continued his travels and geological

researches unrelentingly throughout his life. He traveled extensively in Europe, exploring and studying the volcanic regions of the Auvergne, the Alps and the Urals. He thus became almost more widely known to the public as an explorer and geographer. His possession of wealth was, of course, an immense asset, and in a day when large private benefactions like those that have made possible the recent great expeditions to Central Asia were not easily available he was able to take with him the necessary companions and equipment, to remain in the field as long as he wished, and, what was still more important, publish at his own expense the results of his investigations. He was, from his financial position, a tower of strength to the young Geological Society of London as well as to the Royal Society. His home, presided over by his beautiful wife, became a noted salon where the notabilities of the world of art, science and literature met and were met. When he was made Sir Roderick the title added indeed more to his prestige than a similar distinction would do to-day when honors of that kind are too widespread and indiscriminate to serve as certificates of merit. His contemporaries give us impressions of him that show at any rate that he looked the part. Tall and wiry, he retained his youthful erectness to the last, and in the words of Drake, "it was united in his case with a certain pomp and dignity of manner which at one time recalled the military training of the Peninsula days, at another the formal courtesy of the well-bred gentleman of a bygone generation." Or, as another says, "He was a gentleman indeed."

Not the least of his activities were those associated with the Geological Survey, and the Royal School of Mines, both of which he was largely instrumental in beginning and carrying on. He was for some years director of the Survey, and was persistent in his pressure on the government to take up colonial surveys. He urged the search for gold in Australia and the sending out there of unemployed Cornish miners as prospectors. This was before the days of the great Australian gold rush.

Murchison died October 22, 1871, after a short illness. His death was hastened by that of his wife, who died two years before him. With his passing, the geological world lost one of its greatest members. Owing so much himself to the advice and assistance of others he was at all times the friend and counsellor of the weak and doubtful and the encourager of the struggling beginner. He wrote his books and memoirs in a fine picturesque style, and his "Siluria," in spite of its technical character and the advances of knowledge through years of further study and comparison, remains one of the classics of geology. Murchison Island in the Queen Charlotte group was named after him by Dr. G. M. Dawson in 1878.

Canada to Have Largest Pavilion At Great Buenos Ayres Exhibition

CANADA'S participation in the British Empire Trade Fair at Buenos Ayres, Argentina, in the spring of 1931 will be of a dignified nature as befitting the largest and oldest Dominion in the British Commonwealth of Nations and is calculated to further cement the commercial and national friendliness which exists between Canada and the Republic of Argentina.

The Canadian pavilion is to be the largest individual pavilion in the fair grounds and will have a frontage of over 310 feet in one of the chiefest locations of the world-famous Palermo Park, where the exhibition is to be staged. The Canadian pavilion is to be placed at the head of a broad approach, flanked by grass slopes, trees and flower beds. This approach leads to the main gates on Avenida del Sarmiento. On either side of this approach are buildings which are being refaced to give the appearance of an Old English village of the Tudor type. With this setting, the Canadian building however will stand out in relief in a more modern architectural design with a striking facade of a dignified

appearance and housing, what is planned to be one of the most striking of Canadian commercial and industrial aggressiveness.

Palermo Park, which is in the heart of the City of Buenos Ayres, is the home of the Argentine Rural Society, which annually stages its stock and agricultural shows, considered to be the biggest and most important of their kind in the world. The permanent show buildings are being adapted for the British Empire Trade Fair and the pavilion secured by Canada is being remodelled under the direction of J. O. Turcotte, Canadiana exhibition director. When remodelled the pavilion will be a standing monument of Canadian dignity and aggressiveness. Armorial shields of the different Canadian provinces will be used extensively in the decoration work. The interior of the building is being remodelled to permit Canadian exhibits being displayed to the best advantage. One of the main features of the interior decorations will be a huge frieze measuring 600 feet long, wherein will be painted typical scenes of Canadian resources, industries, commerce and

Canadian Pavilion for British Empire Trade Fair at Buenos Ayres.

trade activity from coast to coast. Other scenic effects will be utilized to depict more vividly the natural and commercialized splendor of Canada.

The British Empire Trade Exhibition is the first "All-British" show ever staged in a foreign country and promises to be the biggest and most comprehensive exhibition ever held on the South American continent. The staging of the fair, which is intended to be a truly representative of the British Empire and its manufactures, synchronizes with a determined effort on the part of British and Canadian manufacturers to further develop trade with South America. Buenos Ayres, which is the most important city in South America, having a population of approximately two and a half million and controlling approximately eighty per cent of the total purchasing power of the whole continent of South America, is the local location for such an exhibition. Buenos Ayres is generally known as the "Show Window of South America," and compares favorably in splendor with Paris, Vienna and other European cities of beauty.

CANADA is committed to an aggressive and expanding trade policy in relation to the South American markets. The inauguration last year of the Canadian National Steamship services from Canadian Atlantic ports to Buenos Ayres and other South American ports was one of the main steps in carrying out this policy, by making available to Canadian manufacturers a direct and reliable method of transportation for their exports. Participation in the Buenos Ayres exhibition will enable Canadian manufacturers to display their products to the best advantage to a large proportion of the South American markets. Furthermore, through the establishment of additional trade commissions, the possibilities of South American markets are being more extensively examined by a staff of experts who are recording, for the benefit of Canadian exporters, the most advantageous methods of securing a fair share of the trade of these countries. In Buenos Ayres, Major E.

L. McColl has been instrumental in greatly increasing Canada's trade prestige and has been taking an active part in promoting the British Empire Trade Fair. Major McColl has been visiting in Canada this summer and has interviewed hundreds of manufacturers on the possibilities of enlarging their trade connections with Argentina, Chile and Uruguay.

Under A. S. Bleakney, Canadian Trade Commissioner at Rio de Janeiro, the further possibilities of the Brazilian market for Canadian goods are being carefully investigated. In the past few months additional offices have been opened at Lima, Peru, under G. R. Stevens, whose territory also includes Bolivia and Ecuador, and at Panama City, Panama, under J. A. Strong, whose territory takes in Venezuela and Colombia.

Canadian exports to South American countries in the fiscal year ended March last totalled \$22,600,000 as compared with \$27,400,000 in the preceding year. Imports from these countries totalled \$26,500,000 in the past fiscal year.

Fifteen Nations Have Enlisted In "Golden Rule" Child Aid Foundation

THE modern business man has the world for a market, and a billion and a half people for possible employees and customers. He has learned to think easily in millions, and, if need be, in billions. He should no more be afraid to tackle a world-wide problem in philanthropy than of invading a world market in commerce.

C. V. Vickrey, executive vice-president of the Golden Rule Foundation, had that to say when he returned from an international conference at Geneva.

It is a world-wide programme of philanthropy that the foundation has undertaken, and at Geneva at the International Club, famous men and women from fifteen nations sponsored the movement making Golden Rule Sunday, December 8, the

official day to be observed internationally in the interests of suffering humanity. Then, people of every nation and religion will be asked to unite in a practical expression of the Golden Rule.

PLEADS FOR CHILDREN'S LIVES

"We cannot profess to believe in the Golden Rule," continued Vickrey, "and stand idly by while innocent children die. We cannot plead ignorance or immunity since the cable and radio have made the world one neighbor for philanthropy as well as commerce."

For twelve years Vickrey was the guiding genius of the Near East Relief. He initiated Golden Rule Sunday six years ago, and since then the custom has

spread to fifty countries. With the needs of Near East orphans cared for and their conservation programme for the next five years assured, the plan for child relief has broadened to include China, India, Africa, the Americas. Wherever the need is found to be pressing, the foundation will make an effort to meet it.

"Generous philanthropists in the past," said Vickrey, "have given, not because an orphaned child was hungry on the shores of the Aegean or the Black Sea, but because an orphan child was hungry. The appeal was that of childhood and not of geography."

WIDE NEED FOR AID

"To-day, some of the most urgent needs in the world are in other areas. Millions are starving in China. Probably more

C. V. Vickrey . . . a problem in humanity, not geography.

children have died for lack of food in China alone during the past twelve months than there are children in all Palestine. Every year a million babies under one year of age die in India for lack of proper care. In our own land thousands are dying every month of preventable and curable diseases. This foundation is one in which Catholic, Jew, Protestant, Moslem and Buddhist can unite.

"Lack of even elementary educational opportunity in China, India and Africa affects at least 136,720,000 children. The results, naturally, spell illiteracy, ignorance and superstition."

"With millions of children in China the innocent victims of fighting and famine, it is planned to stress the work in

that area this year, working through already organized channels of relief. Some aid prob-

ably will be given to organizations working with orphaned refugees in Europe. The re-

mainder of the work will be done in the United States or its territories."

belonged to her own maid. But when she called out, "What do you want?" there was no answer.

As Sir Arthur had done, she investigated. The figure disappeared through the outer door. But that door was closed and locked.

At dinner she related the occurrence to the general. Recalling his own experience, he was deeply mystified. But there was more to occur.

That same night, their youngest son, a boy of eight, who slept in the same room with them, started up out of his sleep, calling out in a frightened voice:

"What do you want, ayah (nurse)?" This remark was in Hindustani.

Lady Becher noted that the boy's bed was faced toward the door of her dressing room and the bath. He, too, had seen the figure of a native woman.

She quieted him until he fell asleep. But she and Sir Arthur, their minds filled with conjectures, did not doze again for some time.

Whence came this apparition, they asked themselves. Would it return again?

It turned out that it didn't. Inquiry of former residents brought the information that it had been seen before—but only on the first night or so after the house was occupied by new tenants.

Some years before a handsome native Cashmere woman had been murdered

in a hut a few yards below the house. The crime had taken place immediately under the outer door to the bath and dressing-room through which the supposed apparition had entered and left.

Was it the ghost of this woman which came back to haunt the house? And if so, why?

Perhaps, in life, the beautiful Cashmere had come into the house at night clandestinely for reasons which ultimately resulted in the murder. The striking circumstances in connection with the incident is that the figure was seen by three different persons without either having heard of it before. (Copyright, 1929, by Republic Syndicate, Inc.)

The pier-viaduct bridge across the mouth of the Tay, near Dundee, Scotland, has 85 spans with a total length of over 10,500 feet.

On the Canadian side of the Niagara River there are three large hydro-electric developments at Niagara Falls.

The actual number of languages throughout the world was recently set by the French Academy at 2,796.

Although the war has added a few words to the English language, the number is said to be less than 10,000.

From 11,000 brains weighed, Topinard finds an average weight of 1,261 grams for men and 1,290 grams for women.

The grey substance represents thirty-seven to thirty-eight per cent. of the total weight of the brain.

Psychic Adventures Of Great Men And Women

Three Persons See What Seems to Be Ghost of Murdered Woman

By J. P. GLASS

Military men are frequent witnesses of psychic occurrences. Bismarck, General Buller, General Fremont, Oregon, Earl Roberts, Pickett and many others have related instances of sup-

ernormal aspects. None surpasses in interest that described by General Sir Arthur Becher, formerly a high officer of the British staff in India, that country in which

occurs so much that seems mystical to the Occidental.

The hot season being at hand, Sir Arthur went up to the Hill Station of Kussowle to look over a house he and his family proposed to occupy until cooler weather arrived.

It being too late to get back to Calcutta he decided to spend the night in the house. The place proved comfortable and he dozed off into a sound sleep. But in the middle of the night he was suddenly awakened.

Standing near his bed and also close to an open door which led to the bathroom was a native woman.

"Who are you?" called out the general, jumping from the bed.

The figure retreated silently into the bathroom. He followed hastily, but when he entered he found the room empty.

The outer door of the bath was locked. It was impossible that the woman could have escaped through it. Yet she had. There was no other exit.

Sir Arthur went back to bed, pondering and fell asleep. What did it all mean? Was he the victim of a hallucination?

In the morning he wrote on a door-post, "Saw a ghost." But he did not

mention the circumstances to anyone. He did not expect there would be a sequel.

In due course and his family moved in. Lady Becher decided that she would use as her dressing room the room in which the general had slept on the previous visit.

At 7 o'clock on the evening of her arrival she went to dress for dinner. Going to her wardrobe to take out a gown she chanced to glance through the open door into the bathroom.

Standing there was a native woman!

Lady Becher never allowed a servant in her room while dressing. Her first thought was that the figure she saw

Going to her wardrobe to take out a gown she chanced to glance through the open door into the bathroom.

A PAGE OF INTEREST TO WOMEN

Fashions, Fads, Fancies and Home Life

PATOU SEES STYLE RENAISSANCE

Evening Gowns' New Length Influences Day Frocks

By JEAN PATOU

Paris, Oct. 12.—Undoubtedly feminine fashions have entered an era of evolution. I feel particularly gratified at this because I sincerely believe my efforts have contributed to this spirit of renaissance made manifest especially during the last two seasons. To-day all the traditions of Haute Couture are being respected. Fashion creators once more are compelled to furnish every season a sustained and constant effort. The fact of having presented one successful collection by no means allows the couturier to rest on his laurels for the succeeding season.

After the period of stagnation we all suffered from there has succeeded one overflowing with new ideas, the result of searching and ardent studies. These ideas are apt to appear exaggerated in their original expression, but they never fail in interest and soon become attuned to their proper key.

I think that this Haute Couture will prove conclusively, in its very desire continually to create something new, its tremendously vital spirit. The modern couturier has proven by his ready adaptation to the intense and accelerated rhythm of modern life, that he is capable of meeting every exigency.

NEW SILHOUETTE IS PATOU'S CREATION

I have been told that the silhouette I created last season marked an epoch in the history of contemporary fashions. It was sufficiently new for me to rest on this success and continuing on the same theme still another season. I concluded, however, that it would be vastly amusing and more sportlike to set to work once more and create a collection on the same "leit-motif" but with new and characteristic features.

These features have perhaps upset preconceived ideas as to what I would show. I have, for instance, placed the waistline somewhat higher than in my summer collection, but it is by no means "Empire." Skirts are uniformly long for evening wear; with me the uneven hem is a thing of the past.

Practical day dresses have undergone no great radical change. They show unmistakable signs, however, of the tendency of greater length apparent in evening gowns.

THERE'S TOUCH OF FANTASY IN EVENING GOWNS

Nowadays it is in the evening gown

Patou raises the waistline in a charming black lace and georgette evening gown and places a huge satin bow high with trailing ends to emphasize the new line. (Right) A tight yoke, a full, intricately cut skirt and a cowl collar on a Patou evening gown of pale pink chiffon illustrate the interesting new lines that give subtle charm to fall styles

and its accompanying wrap that one must seek proof of the creator's latest efforts. Every fantasy is permissible in an evening gown and only in this realm can a woman's craving for real elegance and sumptuousness be fulfilled.

My new silhouette is very significant: a practically high waistline and a skirt length which can be but becoming to most women. Women will once more be enveloped in mystery!

SIMPLICITY IS MARK OF REFINEMENT, TECHNIQUE

One of the most important features of the new styles is that they will demand all the technique of tried artists to be successful. A model

gown will require several fittings by people thoroughly competent and knowing the traditions of their calling. Any formula that is easy and capable of being grasped by the crowd soon becomes for that very reason of very little value.

In all branches of art an apparent simplicity is characteristic of refinement and perfect technique.

ENGLISH FABRICS AND TWEEDS WILL REIGN

So far as materials are concerned, English fabrics and tweeds will dominate this winter. I have also used quite a number of plain and fancy wool jerseys. All sweaters feature the higher waistline and are reminiscent

English Fabrics Are Smart; Coats Will Be Shorter

of the Russian blouse rather than the established idea of a sweater.

FULL LENGTH COATS WILL DISAPPEAR

While a spirit of exuberance and fantasy will pervade feminine fashions, this will always be tempered by the desire to preserve the lines of a woman's figure.

Full-length coats will seldom be seen. They will be replaced by coats of varying lengths. The three-quarters length will be most popular, I think, and this has been brought about by the influence of the fashions of the 'eighties.

PATOU REVEALS HIS NEWEST COLORS

My new colors this season are dark and light dahlia and a particular shade of red. The first has that dark bluish purple tint to be found in the flower. I also feature a certain shade of emerald green and, as usual, a good deal of black.

Women have tired, I think, of all-over prints. I have used printed shawls and handkerchiefs with plain borders for a number of printed dresses and these mostly in lightweight wools. For afternoon and evening wear I have rather abandoned "ting" velvet for a short-pile velvet. This looks newer. Moires and failles also lend themselves to the new line.

WINTER TO BRING CHANGE IN FUR FASHIONS

Fur fashions will also undergo quite a change this winter. Short jackets will replace the full-length fur wrap. These are more practical. The active, modern woman cannot be impeded by the weight or extra length of a fur coat for day wear. This change necessarily heralds the return of the muff and neckpiece and the muff, this winter, will also replace the bag.

THE LAST STAND OF INDIVIDUALITY!

This is my twenty-first collection since 1918. I would like to believe that my efforts have borne some influence on fashions. At any rate, with each season, I find my experience growing.

It may be true that progress is bringing us nearer and nearer to standardization, but the master of real elegance—an essentially French tradition—will always be the Parisian couturier. It may also be that this span of Haute Couture will prove to be the last refuge of individual creative art.

SETTING FASHION FOR EVENING

Patou's black flat crepe evening gown was chosen by Toke, New York stylist, in her recent Fashion Forum, as the evening gown most likely to set formal fashions for women this year. Unusual points of this model are its princess cut, its clever godet train, its cowl back which blouses charmingly, its uneven all-around length and its full lower edge.

White Pajamas
A stunning new lounging pajama set of white satin, with an amusing little sleeveless bodice much trimmed in exquisite deep ecru lace. The flaring pajamas are edged in lace and the three-quarter coat is lace from the waistline down.

Autumn Modes Make Women More Feminine

SOCIAL SCENE REVEALS CHIC NEWNESS IN FALL STYLES

By BETSY SCHUYLER

New York, Oct. 12.—Autumn clothes not only change Milady's silhouette. They change her gestures, too.

I mean this quite seriously. Watching smart women on Park Avenue, at the races, dog shows, and even in the evening at the theatre or smart restaurants, I observe that the new coats that fasten securely and no longer need holding shut, leave women's arms quite free. This makes carrying a purse a thing of formality. The glove that fits the hand that carries the purse and the purse itself attract much more attention swinging free from the body than they ever had when Milady's hands and all that it held was intent on keeping the coat wrapped about her.

In like manner, the longer, more graceful garments have a way of making women self-consciously feminine. This changes the stride of sports clothes into the more careful and leisurely step.

FIGURE OF SMARTNESS

Muriel Vanderbilt found a use for her free hand at Belmont Park last week. She carried quite the gaudiest and smartest personal Belmont hat seen, printed black and white, with a tremendously long handle. This smart lady wore a fitted coat collared in a perfect natural silver fox, a beauty. Her mother, the famous Virginia Fair Vanderbilt, looked very petite beside her, wearing a black two-piece suit, with fancy white facings edged in tiny pointed scallops. She wore one gorgeous bracelet of antique type and carried a large, handsome snakeskin bag in just the shade of silver that her one-strap sandals were.

Mary C. Whitney sponsors purses to match her different suits and coats. Lunching at Pierre's the other day, she wore a smart tweed coat in tawny autumn tones, with shawl collar, and carried a tricky looking bag, "longer than wide," of the same fabric. Leather fashioned the handles and diamond shaped flaps where the handles joined the tweed. It had a slipper fastening.

If you are thinking of fur this winter, look at your bank account first. For even the neckpieces appearing on the best throats this autumn are regal in their beauty. Elmore Hutton has one of the new sable scarves that has a fancy cut, with several skins winding their elegance hither and yon until some heads are on one shoulder and some on the other.

Anne K. Carley

The way fur collars autumn things is stunning, though. Frances Otley has a grey tweed coat, collarless and cut in a V line. Along comes a grey squirrel scarf, attached in the back, that ties like a stock and fills in the vacancy in front. Chic and different.

Mrs. T. Marlow Robertson has a polka dotted worsted ensemble that uses shaved lamb the color of its grey dots to collar it in quite a novel manner, a turn-down collar like an open-necked sports shirt. Her hat deserved a word of mention, black and grey velvet, striped to make a soft

frame for her piquant features. It turned back from the face in the new manner, so becoming to come, trying to others.

New fall fabrics are subtle in their patterns, even when they have stripes, dots and other designs that were wont to be gaudy. Virginia Thaw wore a mighty smart beige, brown and burnt orange worsted frock, with scarf collar and loop trimming up the sleeves and down the front, that was tremendously easy on the eyes.

Anne Carley has a new slate blue suit for fall that makes much of buttons in the way the bloused coat fast-

Virginia Thaw

ens across the hips and the open cuff sleeves fasten on the wrists.

The fitted silhouette is given preference by nine out of ten chic women arriving home from the other side. Valerie French wears a quality brand new creation in the form of a tight bodice, very full and very long sea-green chiffon skirt and above sleeves. Diana Guest brought back a plum-colored flat crepe outfit, long fitted and decidedly fitting. She has a little velvet chapeau of smartly contrasting tone of purple to top it.

Mrs. T. Marlow Robertson

IT IS TRAIN TIME FOR MILADY

Old Traditions Revived In New Evening Gowns

PARIS, Oct. 12.—An evening dress without a train would have been an anomaly in pre-war days. Then it was an obligatory feature and in the train resided practically the whole characteristic of the evening gown.

Then came the rush of post-war days and the exaggerated simplification of everything pertaining to fashion. The train had by then disappeared and was replaced by its very antithesis—the chemise frock. Until a very short time ago, many people had reached the state of mind when the very mention of a train to them appeared ridiculous and hopelessly out of date. They asserted that women could never again be bothered with such a useless length of gown.

To these people the discreet and timid appearance of the train for evening wear comes as a surprise, yet to the discerning eye this fashion feature was but a question of time. What could the dipping hemline herald but a gradual lengthening of the skirt? It was but a short step to the train, and judging by the persevering efforts a few of us have made it seems that trainless gowns will prove to be the exception at any formal reception during the winter.

It is particularly gratifying to find smart women so ready to adopt a style of evening gown that carries on the old traditions of splendor and dignity. It has always been the ambition to revive the really formal evening gown, always becoming and in harmony with its surroundings.

Some have gone further this season and have frankly added a train to a few evening wraps. This movement is accentuated by an opulent fur trimming and I would like to think that these new coats bear a resemblance—perhaps very faint—to what used to be called a "manteau de cour." An innovation such as this could only be made possible by the fact that women have accepted the really long dress for evening wear and if a train has not yet acquired the length and importance it once possessed, at least it no longer is disguised in the form of floating panels reaching to the floor. It now forms an integral part of the dress and as such will surely attract women.

The train is coming in. Left to right: An evening gown of Patou's new "light dahlia" has a smart train in mouseline. Another handsome evening dress by Patou reveals a modernized version of the train. A formal costume of mouseline de soie, in red, likewise features the train. And the train is a startling novelty in a regal evening cloak of short-pile velvet in "dark dahlia" trimmed with silver fox.

They Braved Alaska's Blizzards For Gold--And Found the Poorhouse

Aged Veterans of the Klondike Rush Now Look Back On Stirring Days of '98 From Seattle County Farm

IN THE King County Poor Farm at Seattle are sixteen tired old men whose eyes still reflect the shine of a lost dream as they live on Seattle's charity—paupers waiting for the end.

Thirty years ago they went to the Klondike in the great Alaskan gold rush of '98, when any man who was lucky could make himself a millionaire by following a gleam through the lonely, frost-bound valleys.

They went north for gold—went north to make themselves rich—

And now, thirty years after, they are in the poorhouse!

Sixteen of them there are: sixteen old men, stooped and weary, not at all like the sixteen hardy fortune hunters who were so sure, so very sure, once upon a time, that they were going to stumble right across the rainbow's end.

They went after gold, and they found gold. Some of them found just a little and some of them found a good deal. But all of them lost what they had found. Here they are, the sixteen gold-seekers who stormed the Klondike in the day when Dawson and Skagway and the Yukon were words like trumpet calls—here they are, inmates of the county farm, with nothing left to do but talk over old times and figure up the chances they missed.

HE MISSED FORTUNE BY MEREST CHANCE

One old chap, the dean of the

lot, can remember even before the days of '98. He lived in Alaska before any one knew there was gold there. As he sits here with his cronies, penniless, he has the consolation of knowing that ten years before gold was discovered, he pitched his camp in the Klondike on the very spot where George Carmack was to make the gold discovery that set the world mad. "Furs, and trading with the natives, was our job then," he explains. "Maybe the Indians always knew there was gold there. I don't know. I never seen an Indian yet excited about prospectin'. Sensible, ain't they?"

Then there is another one, named F. Martin, whose Indian partner, in '96, tipped him off to a good location near Cook's Inlet, where hundreds of thousands of dollars worth of the yellow metal was fairly crying to be taken out of the ground. He located there with the Indian. Then the Indian, needing whisky, sold out to a stranger for \$10—and the stranger froze Martin out.

"Every man has one break in life," says Martin. "Every man has one real chance. That was mine. I never came again. I tried my hand in Porcupine, up above Klukwan, and later in Ruby and Iditarod. But all I ever dug up was the other fellow's old tin cans!"

BROKE—BUT CLINGS TO GOLD STICKPIN

Bob McDonald is the Beau Brummel of the place. He still

"Baking the embers of long dead years" are these inmates of the King County Poor Farm near Seattle, Wash., all veterans of the great Klondike gold rush of 1898. Left to right, back row, are: William Miller, Mike T. Scanlon, Henry Fritz, Robert T. McDonald, Tom Constan, Michael Hasset, and Bert Emmanuel; front row: Charles Eichstadt, Henry Pippin, John Loughery, Martin J. Callaghan, William Smith, F. Martin, George England and Al Street. Below is an old picture of George England, showing him with his dog team in Alaska in 1898; also a picture of Skagway and a boom town of tents and rude cabins with numerous saloons, gambling houses and dance halls.

has a visible memento of the gold he used to own—a gold nugget stickpin which he wears in his spotted tie every day, was the first nugget he and his partner "panned" on Bonanza creek.

"Sort of a keep-sake," he says. "When I finger it, sometimes, it helps me to remember I wasn't always like this."

These sixteen Klondikers can remember the wild days of the boom towns; the wild days of Skagway and Dawson City, when there were a dozen poker games in every saloon, and the players made their bets in pure gold dust, staking incredible sums on a single draw, shoving the gold they'd risked their lives for out on the bare tables to back their luck. They've played in such games, these sixteen, and they still play.

PLAY POKER NOW FOR BURNT MATCHES

Poker is a popular game here. The Klondikers play it often—with burnt matches for stakes! There was one player here a few months ago, though, who was different. He came to the farm as "Kid" Brown, erstwhile dance hall proprietor at Valdez, and a spectacular gambler when the Klondike was in its heyday. He was broke, old and sick when he got here—but he used to play gaily with the other burnt-match gamblers.

"Kid Brown's down, but he won't be out until the doctor counts ten," he used to tell them. Then he'd explain that he still had an interest in fabulous Wyoming oil properties. Some day, he'd say, he would yet be rich. . . . They liked to hear him. He kept their spirits up, even if it was sort of absurd.

Then, one day, a lawyer called to see him. Brown signed cer-

tain papers and went away with the lawyer. A little later it was learned that his Wyoming oil properties had begun to pay. Now he is in Wyoming worth a quarter of a million.

But he was the exception. The rest of them haven't any hope.

TWO WOMEN ARE AMONG VETERANS

There are two Klondike women here, too.

One is Mrs. Harriet Duryea, graduate of a famous Boston music school. Her husband is still in Alaska, sending her, from time to time, what money he can, and writing, hopefully of "getting a stake" and coming back to rescue her.

The other is Mrs. Anne Duran. Her memories of Alaska are bitter. Her husband, a Wisconsin railroad engineer, took the gold fever in '98. They sold their comfortable home and went to Alaska together. Their two children are buried up there. Her husband failed to find gold, they came back to the States broke; then he died. Now she is in the poor farm with the others.

Tom Carstin, who made his "stake" lugging fifty-pound loads on his back in the biting cold on the Dyea trail, in competition with the starving pack horses, doesn't care much about his presence in the poor farm.

"Lost my family in a fire up Hunker Creek way. Hunker's near Dawson. Cashing gold away with nobody you love to spend it on ain't what the poets say," he remarks.

Then there is Mike Hasset. For seven years he was the prosperous foreman of the rich Alaska-Juneau mining properties. He came back to the States well-to-do. Then he hit bad luck, lost his health, slid into the county hospital and, finally, landed here in the poor farm.

"TEETH THAT DON'T FIT" PROVE WORRY NOW

Mike Scanlon, perhaps, expresses the spirit of the sixteen. He says:

"Tain't good for old folks to be hatchin' round together always. Whoever thought, trampin' in the snow over Chilkooot Pass, that we'd ever be sittin' on iron bunks in a place like this, complainin' of cheap teeth that don't fit, and so broke that buyin' a paper is as serious as investin' in a ticket round the world!"

"Well, boys, we had our fling. Got more out of it than the fellows that stayed at home nursin' their bank accounts. I've no regrets. And if I had a good sure grubstake next spring I'd be hittin' it up for a little old creek in back of Haines' Mission—I know darned well there's gold there."

That's Mike Scanlon's attitude. Mike doesn't care much about poetry, but perhaps the poet who wrote the following has someone like him in mind:

They sit at home and they dream and dally, Baking the embers of long dead years; But you go down to the Haunted Valley, Light-hearted pioneers. They have forgotten they ever were young. They look your souls at an unknown tongue. But the Flame of God through your spirit stirs. Adventurers—oh, adventurers!

Henry Ford's Great \$5,000,000 Museum to Show "America That Used to Be"

Famed Buildings Are Moved and Erected At Motor Manufacturer's Detroit Institution to Be Opened This Month

A SOLID ten-acre section of the "America That Used to Be" will be thrown open for public use on October 21 by the man who is in a large measure responsible for the "America That Is Now."

Henry Ford's \$5,000,000 Museum of American Antiquities will be opened in the presence of notable men. President Hoover will be there, and Thomas A. Edison, celebrating the fiftieth anniversary of his invention of the incandescent electric light. Harvey Firestone, Mm. Curie of France and many others.

The presence of these people will make an occasion of it. But even if nobody of any fame at all were to be present, the event would be notable. Ford's museum is an amazing thing.

BUILDINGS COVER TEN ACRES

It covers more than ten acres on the Ford estates in Dearborn, and it includes—well, practically everything that anyone interested in the America that Used to Be could possibly want to see.

The development of American industry in all of its phases is shown in the museum. The habits and customs of by-gone generations of men are brought to life. The visitor can see how people lived, what they ate, what

they wore, how they played, how they tilled their farms and made their tools and built their houses and traveled from place to place and got their education, from colonial days down to the present.

And for the most visitors, probably, the interest of the thing will be increased by the fact that it is the work of Henry Ford—Henry Ford, whose mile-long production lines of flivvers were the cause of the obsolescence of so many of the exhibits in his museum.

FAMOUS BUILDINGS MOVED

A great many famous buildings stand here—buildings moved for hundreds of miles from their original sites, erected exactly as they were before.

Thomas A. Edison's famous Menlo Park laboratory, in which the household electric light bulb was devised, stands here, with Edison's original laboratory equipment intact. Both were moved from New Jersey and re-erected. Nearby is a two-story frame house—Mrs. Jordan's boarding house near Menlo Park, where Edison, Samuel Insull and other engineers lived in the early days. This house was the first building in the world to be lighted by electricity. Not far away are the machine shops in which the elec-

tric dynamo was invented, and nearby is the laboratory that Edison used for forty years in his experiments at Fort Myers, Fla.

Standing off to one side is the little red school house which Ford attended as a boy in the little Scotch settlement near Dearborn. Not far off there is the postoffice which the people of Phoenixville, Conn., built in 1803. Luther Burbank's office, built at Santa Rosa, Calif., is there, too. A little farther on are the old Loranger saw and grist mills from the River Raisin, near Monroe, Mich., besides another grist mill built in Haverhill, Mass., in 1798. Also present is the old Caleb Smith blacksmith shop, immortalized by Longfellow, brought intact from Uxbridge, Mass.

The buildings, interesting as they are, constitute only a small part of the museum, however.

MANY VEHICLES EXHIBITED

In one section there is an amazing collection of vehicles, showing types of practically every form of transportation ever used in America. There are the colonial gigs, the ancient calèche of the Pilgrims, the old mail coaches of Revolutionary days, the famous Conestoga wagons and prairie schooners, the Concord coach, the Pennsyl-

Here are typical scenes at the great Museum of American Antiquities that Henry Ford will throw open to the public at Dearborn, Mich., October 21. Photo in the circle is the "little red schoolhouse" in which Ford went to school as a boy, moved intact to the ten-acre museum grounds. At the right, Ford is shown seated in the kitchen of the old Botsford Inn, an early Michigan tavern which he has moved to his estate. At the left, below, is a view of Thomas A. Edison's famous Menlo Park, N.J., laboratory, rebuilt exactly as it used to be for the Ford museum. The lower picture shows construction of the main exhibit building, modeled after Independence Hall in Philadelphia.

vania buckboat that used to be called the "Adam and Eve Wagon," because it was built for two; the first American light spring wagon, the phaeton, the ordinary buggy, the victoria, the rockaway, the racing sulky, the ox cart, the light sleigh for winter use—and, of course, the first of all the fivvers, quaint and angular with its high wheels, its kerosene lights, its tiller and its exposed flywheel.

To finish this collection there are samples of modern automobiles.

LOCOMOTIVES ON DISPLAY

Ford's collection of locomotives is no less complete. One part of his museum looks like the round-house of some historically-minded railroad. Practically every type of early locomotive is represented here, together, of course, with examples of the modern ones.

Adjoining the locomotive exhibit is an exhibit of threshing machines. Historians say that Ford has a sample of every kind of threshing machine ever used in America, from the primitive flail down to the most modern motorized machine. There is also an exhibit of ploughs, from the affair used by the New England colonists to the huge gang ploughs of the wheat belt, which

cut fourteen furrows at once and require a 300-horsepower engine to pull them.

Following these is an aviation section, in which every type of aeroplane is represented. Rubbing elbows with it is an exhibit of, literally, scores of sawmills, both waterpower and steam, large and small, representing all periods of American history.

ANTIQUES IN PROFUSION

Then there are exhibits it would take a book to catalogue completely: exhibits of spinning wheels, hand looms, clocks, sleighbells, andirons, looms, baby cribs, doll beds, quilting frames, dinner gongs, hoop skirts, pipes, spoons, forks, shovels, dresses, hats for men and women, jugs, vases, pottery, cupboards, candlesticks, chairs, lamps, sleighbells—well, practically everything that you can possibly think of. Each of these things is shown in all its variations, from colonial times down to the present day.

There is even a collection of puzzles, beginning with the brain-teasers used by the first settlers and coming straight down to the crossword puzzles of the present day.

If you have gathered from all of this that Henry Ford has preserved a pretty complete picture of old-time America, you are correct.

YOUR CHILDREN

By OLIVE ROBERTS BARTON

Life is full of tough spots for all of us and we strike a good many of them long years before we're grown.

The new boy in the new school must be wondering about now why he's been picked on to stand all the ragging he's getting at the hands of the old timers. For of all life's tough spots, this is just about the toughest—and to pass the acid test of being a good sport and a good fellow takes about all the patience, stamina, courage, and endurance one small human being is capable of holding.

The worst of it is that there isn't much that can be done about it—unless, of course, it continues to be a

matter of endless bullying and abuse. Then I'd say it was permissible for parents or school authorities to step in and investigate. If the initiation turns into an inquisition and the new boy is neither rejected nor admitted to the holy-of-holies, in other words, the gang, but systematically and persistently mistreated as the weeks pass by, I'd look into it; sometimes it can be traced to jealousy or dislike of a single member of the crowd who agitates the others to do his dirty work.

Then it is a simple matter to handle, of course.

THE WAY OF BOYS

But usually the crowd who puts the new arrival through a course of sprouts, to see what he's made of, are well, just boys. They will probably be his loyal friends in a very little while, if he can just hang on, not bear spite, and put up sufficient battle to prove that he's not a sissy.

Do I think he should have to prove that he's not a sissy by allowing the other boys to get him down on the pavement and pummel the breath out of him? Or pick out a chosen dele-

gate to match fists with him? Or any of the thousand ways boys think up to gauge the mettle of the untried one?

No, I don't. And I know you don't, either—but the boys do, and who can understand boys? Individually yes. Collectively, no. I don't believe there is a psychologist on earth who can understand the codes and motives that rule boyhood—en masse!

And the male brotherhood won't accept another member until he measures up to the accepted standards of the clan. It's that way everywhere.

HAZING IS DIFFERENT

Without question, college hazing is often carried to unnecessary and brutal extremes, not for the purpose of testing the grit of the freshman, but for the amusement of his tormentors. Its original motive has been lost, as a matter of fact. That is something else.

But here I am speaking of younger boys and their peculiar methods of annexing new members to the crowd. Tell your boy to grin and bear it, if he can. Everything will likely come out

all right. It takes a little time. He may lose a necktie and get a black eye, but they may be the price of a little stiff starch that will be the making of him later on. You can tell if the initiation gets out of bounds. But be sure it is out of bounds before you interfere. And don't sympathize too much of too openly. It's his affair and I'd let him take care of it.

New Flavors The family will appreciate it tremendously if mother manages to get new flavors on to the table. A dash of celery salt in the mashed potatoes, powdered ginger and lime juice on honey-dew melon, or a bit of garlic rubbed on the salad dish adds interest.

Evening Slippers A pink and silver brocade slipper has a tiny vamp poke of gold and silver ankle strap fastened in front with a tiny brilliant and a square heel of silver.

Fresh Persimmons Nothing on earth makes a more luscious dessert than sliced big, ripe persimmons, served with heavy cream.

The Woman's Day

By ALLENE SUMNER

George Bernard Shaw, self-termed "expert on sex appeal," made the statement the other day that the only method of creating sex appeal is by clothes.

"The voluptuous woman of the nineteenth century was a masterpiece of sex appeal," said the savant. "She was clothed from the crown of her head to the soles of her feet. It was amazing. Everything about her except her cheeks and her nose was a guilty secret which you had to guess."

"Women have taken a large step toward nudity and sex appeal has vanished."

has slipped up on his premise, which is a pre-supposition that what is beauty or sex appeal to one generation may be the same to another.

Shaw grew up in the Victorian age, his first romantic dreams were concerned with one of the thoroughly upholstered ladies of that day. He probably still thinks of feminine beauty in terms of curves and of sex appeal as something which creates a future guilty feeling.

STANDARDS OF "IT"

Why should the young man of today, brought up in the age of the flat-chested, scantily clad, straight-forward, boyish little flapper, have any romantic ideas about the "Diamond Lil" figure of the Klondike days? It seems to me just as natural for one of today's youths to argue that no woman with a rigid, constricted figure, rats in her hair, a bustle and an artificial manner could ever attract him in the least.

This whole question of one generation's trying to set standards for another is the same one that is at the

base of the old question, "Why children leave home."

Whether it is ideas on locomotion, sex appeal, what constitutes a good dinner, or style in dress, the years bring such changed ideals that what was accepted as correct yesterday may be all wrong to-morrow.

Therefore, it is only the rare occasion when one generation can set standards for another. Even morals and religion change, proving that nothing in life is static and absolute. It is a brave person, therefore, who defines criteria for himself and then declares them universal.

FLYING CO-EDS

New York University has opened a department of aviation for women. This is the first university that has met the growing demand on the part of women to learn to fly. It probably will be followed by similar universities, and before we know it, thousands of young daughters will be asking, "Mother, may I go out to fly?"

The universal appeal of the air to youth is much written about. I find myself wondering why no one says much of the mother and father behind each youngster who have put a couple of dollars into learning and caring for said youngster, only to see him or her rush to the air, and possibly wreckage.

Surely parents deserve a word of high praise for the way they have made themselves say, "Hands off. My children have a right to live their own lives and even lose them, if they will."

That children have such a right every rational person knows. But it seems to me that being a wise parent to-day is much harder than in the early bicycle days, for instance. There are so many wise parents abroad to-day indicates to me a growing universal belief in individual freedom that is bound to make bigger persons of folks.

The first use of electric motive power on the railroads in this country was on the Baltimore and Ohio road in 1825 at Baltimore.
